exeon

LIMITED TRY + BUY OFFER

Valid from 27 October to 31 December 2026

What happens after login inside your critical applications?

Exeon makes the activity of users, admins, and service accounts inside critical applications visible and helps detect relevant deviations early.

Behavioral security monitoring of SAP

For SAP, Exeon combines behavioral analytics with concrete detection use cases across identities, transactions, tables, and privileged activity.

Unusual SAP activity

Detect new or unusual transactions, actions and behavioral patterns, even when valid credentials are used.

Sensitive data access

Identify unusual access to HR, finance or other sensitive tables as well as abnormal export patterns.

Privileged & admin activity

Monitor new admin logins, role and authorization changes, critical actions, and suspicious configuration changes.

Unusual user & device behavior

Detect anomalous logins, new devices or countries, and deviations from learned user behavior.

Monitoring of other critical applications

Want to analyze a different business-critical application? Depending on available log data and technical fit, we can also assess ERP, CRM, core banking, finance, HR, or custom business applications.

ERP | CRM | CORE BANKING | FINANCE | HR | CUSTOM APP

TRY + BUY THROUGH YEAR-END

The offer includes setup and onboarding for one qualified application plus use of Exeon.UEBA through 31 December 2026. The earlier you start, the longer you can learn normal behavior, investigate anomalies, and gain insights from your own application data.

Continue without another setup fee

If you sign an Exeon.UEBA subscription with a minimum 12-month term by 20 December 2026, the existing setup carries over. No additional onboarding or setup fee applies for this application.

Test with your own application data. Make user behavior visible. Then decide.

Terms & Conditions: Offer valid from 27 October 2026 to 31 December 2026 with the promo code: BehaviorTrial2026. Includes setup and onboarding for one qualified application plus use of Exeon.UEBA through 31 December 2026. Subject to technical feasibility and suitable log data; scope and relevant use cases are jointly defined during qualification. The price covers setup and onboarding and is non-refundable, regardless of whether a subscription is subsequently signed. If an Exeon.UEBA subscription with a minimum 12-month term is signed by 20 December 2026, the existing setup carries over, and no additional onboarding or setup fee applies. Cannot be combined with other discounts or promotions.
