

# Help your team get the right info, when they need it.

Tired of losing information in emails, chats, files, multiple information systems, and with every employee's turnover?

Efficiently store, organize, link, and structure knowledge for your organization with XWiki. It adapts to your team's structure & needs, whether it be an intranet, documentation, knowledge base, digital workplace, or a custom solution.

## Why choose XWiki?

### Adaptive wiki for competitive teams

XWiki is an enterprise-ready open-source platform designed to streamline collaboration and knowledge management within teams. It also has easy-to-use tools for migrating from Confluence and others.

### Advanced compliance

By selecting XWiki you choose a European solution that is private-by-default and commits to respecting the WCAG 2.1 AA and BSI C5 through openDesk.

### True digital sovereignty

Your company's data is exclusively yours to access on the preferred type of deployment - on-premises or on cloud (hosted in Europe). Manage access with granular permissions, configurable on all wiki levels.

### Human support at your service

Our team of experts is always here to help with implementation, technical issues, and learning the ropes of XWiki.

### Open source (now and forever)

XWiki has been ethically built by XWiki SAS in the last 20 years with the commitment of keeping it open & free. Never experience vendor lock-in again.

# Privacy and collaboration? ...yes, you can have both!

# CryptPad

Looking for a secure alternative to Google Drive or Microsoft 365?

CryptPad is an award-winning office suite that is end-to-end encrypted and open-source. It blends real-time editing, granular access settings and collaboration features for your team with the highest level of security for your information.

## Why choose CryptPad?

### Secure your information

Ransomware attacks, data-leaks, and other security risks are on the rise. Ensure that your business information is properly secured with end-to-end encryption.

### Full-featured collaborative office suite

From a suite of 9 office-ready applications to team-drives and granular access-control, your needs are fully covered by CryptPad.

### A dependable support team

Our expert team will help define your needs, setting up your instance, maintaining it over-time, training your employees, and giving support to your users.

### Legally compliant

CryptPad is an enterprise-ready European solution that is private-by-default and commits to respect the GDPR & Bundesdatenschutzgesetz (BDSG).

### Open source (now and forever)

CryptPad is actively developed by a dedicated team at XWiki SAS, a company with 20 years of building open-source software. CryptPad is the result of creating a private-by-design office suite for people & teams valuing privacy & collaboration.
