

Summit10

WE ARE
PET FOOD

MADE FOR YOUR PET, NOT FOR YOU

ABOUT US

At Summit 10 we are inspired by the love for animals, and this can be seen in all our recipes. We are demanding in the choice of our ingredients and in the manufacturing process of our products, using only the best technology.

We want to contribute to the well-being of pets in a natural way, bringing to market products that are healthy, balanced and customised. A product for each pet according to its age, size, sensitivity and lifestyle.

It is a philosophy that drives us on in our passion to

discover and explore advances and trends in the agri-food industry and which is embodied in the constant development of new products.

We are proud that, after nearly 20 years working in pet nutrition and health, today thousands of cats and dogs in Europe, Asia, South America, and the Middle East are fed each day with our products and we are driven by a passion to innovate and carry on helping to improve the quality of life of pets.

INGREDIENTS

All our recipes are made with high-quality natural ingredients and free of genetically modified organisms, with which we manage to offer tasty, balanced and top quality products to cover each of the different nutritional needs of pets, in each of their life stages. In addition, we do not use artificial colourings, flavourings or preservatives.

ORIGIN

We are demanding in the selection of the suppliers we work with. Our ingredients are sourced from local and reliable suppliers with the highest quality standards.

We use our own, 100% natural appetite enhancers, giving our recipes a unique and recognizable flavor.

INNOVATION

We prepare our recipes with the latest technology, preserving the natural nutrients of each ingredient.

Our fresh meat injection system allows us to elaborate recipes that stand out for their high quality, palatability and digestibility.

SUSTAINABILITY

In order to contribute with the environment, our packaging is environmentally friendly by being recyclable.

Moreover, our ingredients are free of genetically modified organisms and the formulas contribute a better well-being of pets. We actively make a better world for them.

Whole Choice

The best selection of natural and fresh ingredients allows us to obtain multi-protein recipes based on fresh boneless and grain-free meat. The contribution of fruits and vegetables, together with natural pre and pro biotics allow us to obtain tasty and highly healthy recipes.

Grainfree

Pets benefit from recipes with up to 40% fresh meat and a single source of animal protein. We achieve holistic, grain-free recipes suitable for the highest requirements in dogs with dietary conditions such as food allergies and intolerances.

Life Stages

Super Premium recipes made from the best chicken meat and rice. Contains at least 10 ingredients that help strengthen the pet's immune system. Highly balanced and vitamin-rich multiprotein diet that improves the health of our pets.

NATURAL INGREDIENTS

Natural ingredients that encourage the growth of intestinal flora in various ways. Intestinal flora makes it possible to absorb nutrients from the intestine into the organism. If the flora works correctly, the immune system remains healthy.

The aim is to have a beneficial effect on digestive well-being whilst reinforcing the animal's immune system.

FRESH CHICKEN

A source of high-quality, easily digestible, and palatable proteins, with a moderate fat content.

RICE

A source of complex carbohydrates (mainly starch) that is very easy to digest.

GREEN PEAS

Source of plant-based proteins, fiber, and complex carbohydrates (mainly starch).

GINGER

Contains compounds such as gingerol and shogaol that have potent anti-inflammatory effects. It also promotes digestion and relieves digestive problems such as nausea, vomiting, indigestion, and flatulence.

MIX OF HERBS

Natural antioxidants that strengthen the immune system and promote the health of the gastrointestinal tract.

APPLE

A good source of dietary fiber (mainly pectin), which also provides vitamins, minerals, and antioxidants (flavonoids, quercetin, and pahnolic acid).

DRIED EGG

A source of high-quality, easily digestible, and palatable proteins, with a high content of monounsaturated fatty acids and immunoglobulins.

LIVER

HYDROLYSATE

A source of high-quality, easily digestible, and palatable proteins.

FISH

A source of high-quality, easily digestible, and palatable proteins, with a low fat content.

FRESH SALMON

A source of high-quality, easily digestible, and palatable proteins, with a high content of omega-3 fatty acids (mainly EPA and DHA).

SALMON OIL

A highly palatable concentrated source of energy, which also provides essential omega-3 fatty acids (such as EPA and DHA), vitamin A, and antioxidants (astaxanthin), with antiinflammatory properties.

POTATOES

A source of complex carbohydrates (mainly starch) that are easy to digest, provides energy and allows obtaining crunchy kibbles during the extrusion process. Furthermore, potatoes are hypoallergenic and rarely cause allergic reactions.

TOMATO

The lycopene in tomato has an immune-stimulus effect.

CITRUS FRUITS

Their extract contains a high concentration of antioxidants (vitamin C and flavonoids such as hesperidin, quercetin, and naringin) and vitamins (A and B vitamins).

THIS IS HOW WE DO IT IN OUR KITCHEN

WE COOK WITH

THE BEST TECHNOLOGY

We develop our dry food recipes with the most innovative and modern technology that currently exists in Europe, which allows us to **inject up to high percentages of fresh meat.**

This means that **all the juices and aromas of the meat remains in the formula** and the animals perceives an extra flavor, which is why these diets **always have excellent palatability.**

& THE BEST INGREDIENTS

Our raw materials undergo a single heat treatment before becoming a tasty kibble, so the **proteins maintain its high biological value and nutrients are better preserved.**

Finally, there are no intermediaries, so we can have much more control over the origin and quality of the meat used during the production process.

WHY DO WE USE FRESH MEAT AS 1ST INGREDIENT?

Meat is a natural source of high-quality protein that supports the development and maintenance of muscles, organs, and tissues essential for the health and vitality of our dogs and cats. It also provides essential amino acids, vitamins, and minerals, key to their everyday wellbeing.

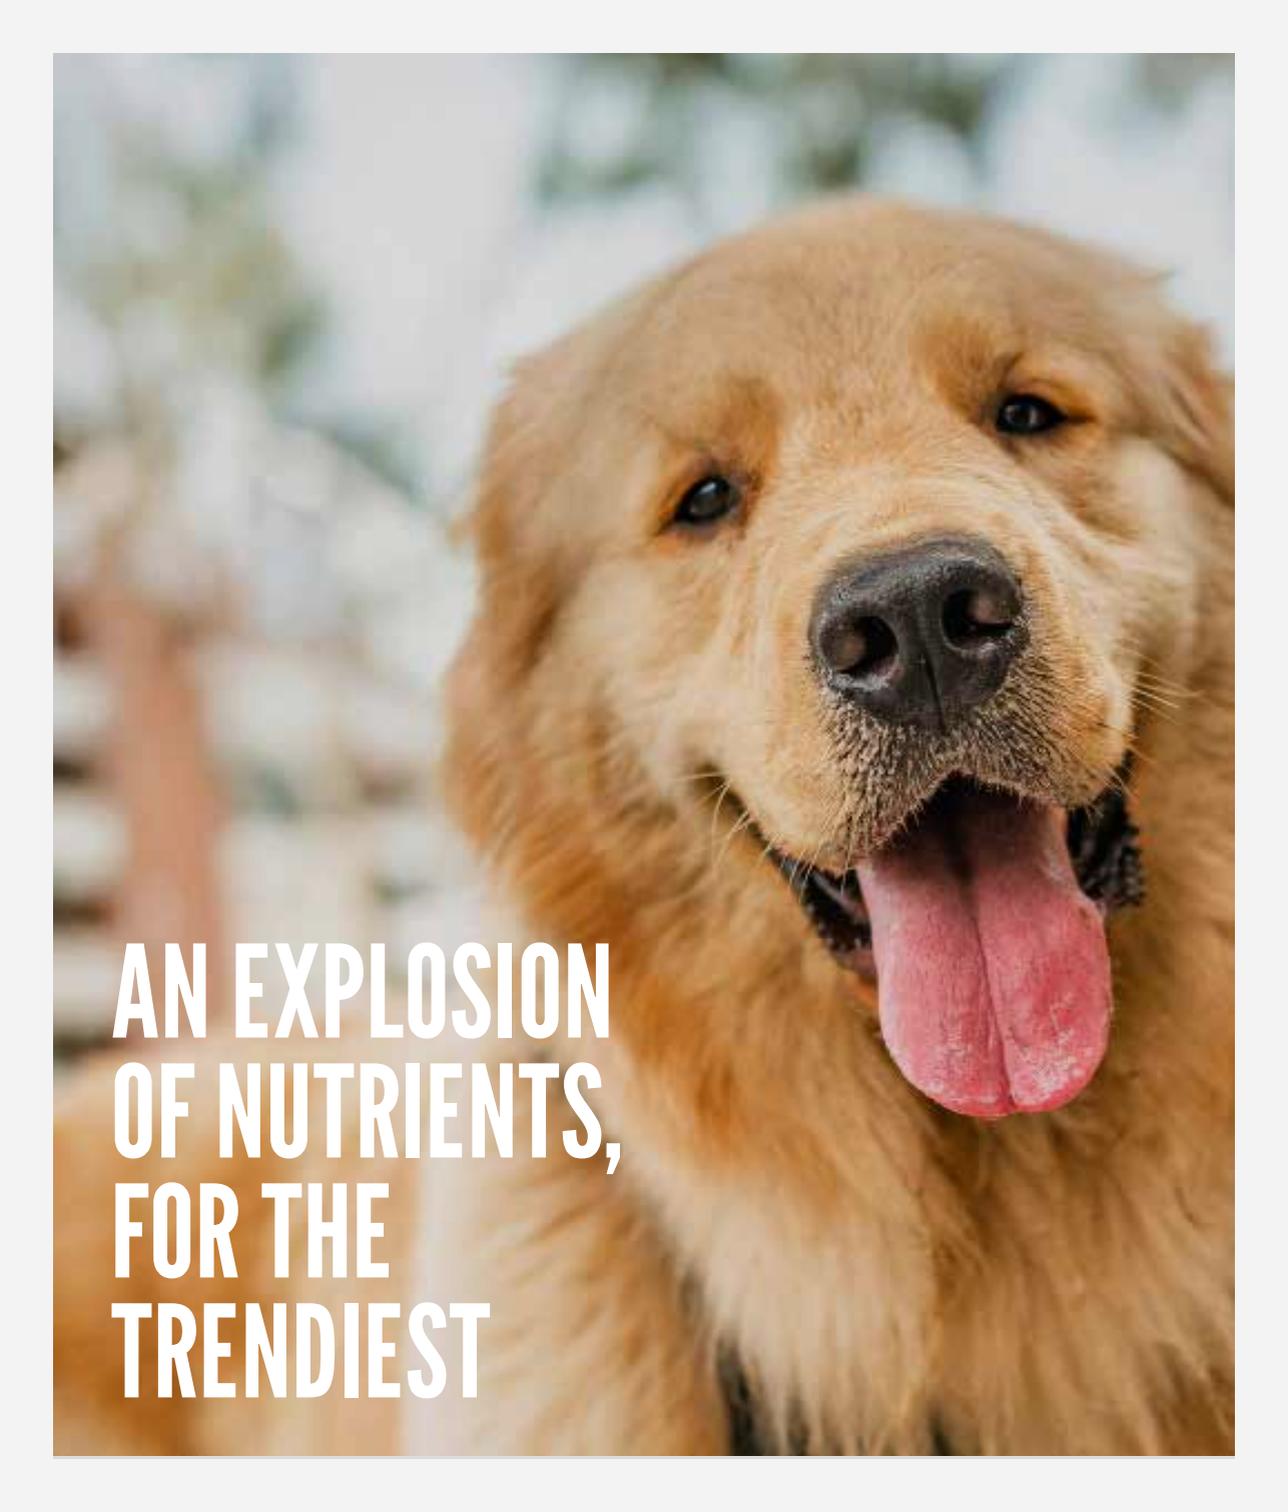

At Summit 10, we use fresh meat to preserve nutrients better... and to ensure a tastier, healthier mealtime experience!

- Fresh Meat requires ONLY ONE heat treatment during the manufacturing process of a kibble for your pet.
- Fresh meat is always the first ingredient for its high digestibility, nutrient contribution and delicious flavor.
- We source our ingredients from local suppliers.

Summit10

Summit10 CARE

A veterinary focused brand that provides clinical solutions based on the most common health issues in dogs and cats.

VETERINARY DIETS

Where nature meets science. Our Veterinary Line combines the finest natural ingredients with advanced nutritional expertise to support pets' specific health needs. From digestion to skin care, mobility, and beyond. Developed in collaboration with veterinarians and nutrition experts.

NUTRITIONAL SUPPORT

For when special support is needed. We designed a line of complementary pet foods formulated from functional ingredients that, in addition to their basic nutritional value, provide additional health benefits, including the prevention and treatment of certain diseases.

NATURAL CARE WITH VETERINARY PRECISION

Specially formulated dry food recipes to provide complete and balanced nutrition for cats and dogs with specific health conditions.

Each recipe is developed with carefully selected and functional ingredients and specific nutrient levels that support veterinary therapies, combining high digestibility with targeted benefits.

COMPLEMENTARY CARE THROUGH FUNCTIONAL NUTRITION

Our nutraceuticals have been crafted to respond to certain health conditions that both dogs and cats may suffer throughout their lives. In this case, we offer an extra supply of certain nutrients and provide functional ingredients that will act by preventing or improving the problem in question.

Summit10

SUMMIT 10 CARE VETERINARY DIETS

Adult Dog Digestive

8 kg / 2 kg
