# ARMINAKIL BENTONITE

## ABOUT US

Our company ARMINAKIL BENTONIT MINE, which was established in 2011, provides service to the relevant sectors of our country by passing our bentonite reserves in our country through various processes. Some of close to 40% of pure natural bentonite reserves in Turkey is around Çankırı. Most of these reserves are under the auspices of our company. More than 30% of the market, we are supplying Turkey. We have nearly 20 large wholesale business partners across the country. In addition, both our production capacity and our packaging capacity have a high market share. Today, we have an average bentonite granule production capacity of 70,000 tons / year, and we also support the employment of qualified personnel. MinaV Bentonit Cat Litter is 100% Natural and also produces in our own facilities. We have reached almost every point in our country. We invest in our own brand. Today, our MinaV brand is available at every sales point in our country.

The first goal of ARMINA CLAY BENTONITE MINE is to provide better service to our animal-loving citizens. Our second goal is to increase our brand values and make our brand known all over the world.

**We Process Bentonite Carefully For You.**

## OUR SERVICES

### CAT LITTER GRANULE SIZES

**With our experienced employees and advanced technology equipment we use in production, we ensure that your products are ready in the right way and at the right time.**

We are preparing the Bentonite mine, which is a miracle of nature, for production in its simplest form. After crushing, screening and blast furnace heat treatments, cat litter becomes ready in desired granule sizes.

**The fillings made in our own facilities are prepared in accordance with the overseas journeys. We determine the amount of BigBag, Q-Bag and kg according to the preferences of our customers.**

We prepare the label information of your orders according to the desired country. The prepared products are loaded into containers. The products going to the port are loaded on the ship after passing through the Customs clearance. After the shipment made quickly thanks to our expert team, Product invoice, container product list, bill of lading, EUR1, ATR, ORIGIN and loading documents are sent to our customers both digitally and by cargo. Thanks to the container tracking system, you can check where the order is.

7

### The advantages we provide for you in cat litter.

Thanks to the service we provide, you keep the customer satisfaction at the maximum thanks to the same quality. you increase the value of your own brand in future situations. By diversifying the product, you can offer different products to your customers.

### YEARS OF EXPERIENCE

Our company, which has been passed on from generation to generation, is developing this unique heritage from our elders, by adding innovations to it with the analyzes we make, thanks to our experience, advanced infrastructure and R&D experts.

## IMPORTANCE OF RECYCLING

While processing Natural Bentonite, the miraculous product that nature offers us, we do our best to entrust it to nature again without harming it. This concept, which is our red line, will remain a policy that will not change for years.

We care about using natural resources to strengthen social welfare and meeting human needs in a balanced environment. We believe that producing without risking the lives of future generations and all living things is indispensable for healthy ecosystems and the natural environment.

We organize our production technology according to our sustainability philosophy. We care about directing new technologies used in production and developments in this field in a way that takes into account the future.

In this sense, we plan all our production activities in order to meet human needs in harmony with the environment and ecosystem.

We deeply feel the importance of life.

## OUR PRODUCTS

### MinaV Cat Litter

Cats have the right to a natural life.

Our brand is MinaV, our natural cat litter with bentonite mineral

It has an annual production capacity of 60,000-80,000 tons of cat litter.

Our housemates, who attach great importance to antibacterial hygiene in our factory, have a long-lasting use for cats that become lumpy, trap odor, and do not stick to paws and fur.

The biggest feature of its fast clumping is that we keep the cat litter box dry and clean.

We continue to produce dust-free and natural products without using any additives in our products.

We know the sensitivity of our housemates. The sands they use

as they are very sensitive about

We also show sensitivity and care.

*Because every minav is a love that comes from the heart.*
