GABA 20 (γ-Aminobutyric acid)

GABA is a non-protein amino acid which acts as a primary inhibitory neurotransmitter in the central nervous system of animals to reduce neuronal excitability and stress.

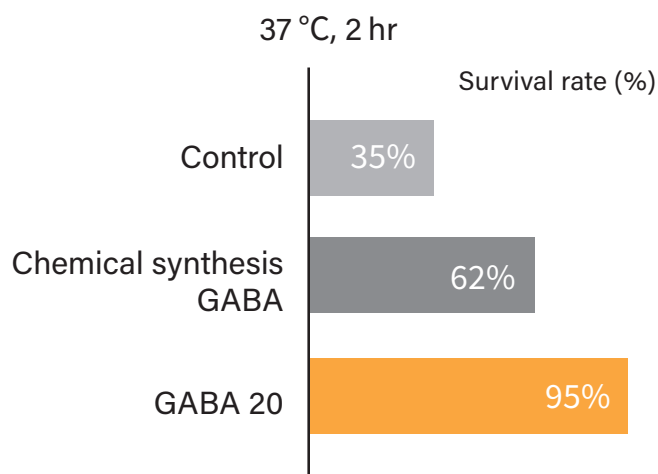

- + Produced by lactic acid bacteria fermentation process, safe to use.
- + Excellent fluidity, stable for processing and high bioavailability.

Stability & Processability

Heat Stress Trial in *C. elegans*

Product Description

Composition	GABA ≥ 20%	Package	1 / 5 / 10 Kg
Dosage	30-50 g/ton feed		
Shelf life	36 months under dry and cool storage condition
