

Your go-to source for reliable and secure liner solutions

RKW is your one-stop shop for all types of liner films! We've got a comprehensive range of protective films that are economical and an efficient solution during packaging, transportation and storage. As a leading provider in extrusion and partly converting of liners we deliver tailored applications for dry and liquids bulk goods, meat for industries including agriculture, minerals, chemicals, food and more. **Contact us for your individual need!**

Octabin and FIBC liners

Protection redefined

The processes in the chemical and foodstuff industry require special care and maximum protection of health and the environment. This makes it all the more important to have partners you can trust and rely on. The RKW Group not only offers one of the largest portfolios of liners as rollstock material for different industries, but has also been the preferred partner of leading companies worldwide for decades. Our Octabin and FIBC liners provide unmatched protection by combining robust materials with state-of-theart safety features. These liners meet the most stringent industry standards and are designed to store and transport a wide variety of chemicals and foodstuff. With customizable options and innovative technologies, our Octabin and FIBC liners ensure that your operations remain safe and sustainable, and your products are protected during packaging, transportation, and storage.

Protection against contamination thanks to certified premium quality

- 5- and 7-layer technology for different liner structures (PE, PE/PA, PE/EVOH or PE/PA/EVOH) that provides high barrier protection against moisture, oxygen and external contaminants
- Certification according to BRC, Cosher and Halal (FIBC liners only)
- Certified food grade quality for highest standards
- Consistent quality management to ensure the highest industry standards
- No chemical reactions with the stored or transported substances
- Ideal for transportation and storing of chemicals, fertilizer, herbicides, latex, coffee, cocoa, nuts, seeds, beans, spices, powders, granules, leaves and more, all of which benefit from maximum protection
- Customizable sizes, thicknesses and formulas, gusseted or lay-flat to fit the individual demand
- Dimensions: 2.20–5.03 m circumference, 50–200 μm thickness (other sizes and thicknesses are available on request)
- Colors: transparent and bluish/transparent (other colors are available on request)

Excellent barrier properties

- Resistant to a wide range of chemicals including acids, bases and solvents
- Barrier properties can be flexibly adapted to your requirements

Efficient and economical in every respect

- Exceptional durability and longevity
- Longer service life for your equipment
- Avoids contamination of your chemicals
- Reduces product loss and ensures safe transportation

Sustainable films

- Prevention of leaks and soiling
- Energy-efficient production
- 100% recyclable mono material available that is recyclable (barrier liners that contain more than 5% PA and/or EVOH are currently only chemically recyclable)

Container liners for liquids and dry bulk goods

In the food industry, the safe storage and transportation of bulk liquids as well as dry goods is critical to maintain product integrity. That's why reliable, high-quality packaging solutions are a must. RKW Group offers a comprehensive range of container liners designed for your needs, making us a trusted partner for leading global food brands.

Our container liners offer exceptional protection, combining robust materials with innovative technologies to safeguard your goods during transportation and storage. Designed to meet stringent food safety standards, our liners keep your products fresh, uncontaminated, and safe, even under the most demanding conditions. With customizable options, our liners are perfectly suited to the specific needs for global dry and liquid bulk transportation.

Key features

✓ Versatile applications

- Ideal for transporting liquid and dry bulk products such as wine, beer, juices, concentrates, liquid chocolate, dairy products, vegetable oils, vinegar, fats, mineral oil, glycerin, waxes, ink, paint, fertilizer, herbicides, latex, coffee, cocoa, nuts, seeds, beans, spices, powders, granules, leaves, and more, all of which benefit from maximum protection
- Customizable sizes, thicknesses and formulas, gusseted or lay-flat to fit the individual demand
- Dimensions: 4.4–10 m circumference, 80–200 μm thickness for up to 24,000 liters of liquid (other sizes and thicknesses are available on request)
- Colors: transparent, bluish/transparent and greenish/transparent (other colors are available on request)

Superior product protection

- 7-layer technology for different liner structures (PE, PE/PA, PE/EVOH or PE/PA/EVOH) that provides high barrier protection against moisture, oxygen and external contaminants
- Certified food grade quality for highest standards

Efficient and cost-effective

- Reduces product loss and ensures safe transportation of liquid and dry bulk products
- Durable materials extend container life and reduce operating costs

Sustainable and environmentally friendly

- Constructed from recyclable PE materials, supports sustainable practices with energy-efficient manufacturing (barrier liners that contain more than 5% PA and/or EVOH are currently only chemically recyclable)
- Recycled content option to meet your sustainability goals (for non-food applications only)

Dolay liners

High-quality protection for meat, poultry and fish

RKW's Dolav liners provide a premium packaging solution for the safe transportation and storage of meat, poultry and fish. Combining efficiency, durability and hygiene, these liners ensure that your fresh produce is optimally protected. Manufactured to strict quality standards, our Dolav liners ensure food safety by preventing contamination throughout the packaging process. The blue tint makes foreign objects easily identifiable, providing an additional layer of safety in food handling. These liners are designed for standardized use, making them ideal for food manufacturers, wholesalers and processors who value efficiency and reliability in their operations.

Key features

✓ Efficient and resource-saving solution

- Protect, store and transport up to 500 kg of fresh produce with just 1 kg of film
- Maximizes material efficiency

Superior durability

- Polyamide (PA) provides high puncture resistance
- Tear resistance ensures safe handling of produce during transportation and storage

Extended shelf life

- EVOH oxygen barrier technology enhances product quality
- Significantly extends the shelf life of packaged goods

Hygienic and secure seal

- Excellent sealability ensures hygienic conditions
- Protects fresh produce from contamination throughout the supply chain

Cost-effective handling

- Bag-on-roll system simplifies handling
- Improves packaging process efficiency
- Reduces overall packaging costs

Ultimate protection customized to your requirements

PREMIUM LINER FILMS

RKW Group is one of the world's leading manufacturers of polyolefin-based film solutions and pushing the bounderies of sustainable production. We are a market leader in the areas of hygiene and agricultural films as well as films for the food and beverage industries and powdery goods. Moreover, we supply films and nonwovens for the chemical and processing industries as well as the medical, automotive and construction sectors. Our independent family-owned company employs approximately 2,800 people across 17 locations worldwide.
