

The Smart Pet Eco System

We are a German provider of smart home solutions for pets. Our platform connects smart products such as drinking fountains, health trackers, and other sensors to form a holistic ecosystem. Using a central app, we collect relevant health and behavior data, generate AI-based individual recommendations, and enable our customers to proactively manage their pets' health and wellness.

Hy!

Air Klyna

The smart air purifier sets new standards in air purification: With patented Freudenberg technology, intelligent sensors, and smart controls, it offers maximum efficiency for clean, healthy indoor air.

- **360° all-round air intake** and optimized molde for efficient collection of animal hair
- **Highly effective air purification** thanks to 4-layer HEPA H13 filter from Freudenberg with activated carbon to combat odors
- **Powerful for large rooms.** Ideal for areas up to 78 m² – whether in the living room, bedroom or office.
- **Intelligent air quality indicator.**

Welly

Drinking fountain with dual-tank innovation: For cats who prefer clean and fresh water. Welly takes care of your cat's healthy drinking habits in a smart and completely automatic way.

- **Two-tank system:** separation of grey and fresh water – no recycling of dirty water
- **Automatic water renewal:** individually controllable via the app
- **Real-time tracking of fluid intake in the app**
- **BASF Ultrafilter (up to 9 months):** long-lasting hygienic water with minimal maintenance
- **Extremely quiet operation**
- **2 modes:** sensor-controlled or 24-hour fountain mode
- **Power supply or battery operation possible**
- **Interactive ambient light to encourage drinking**
