

## RTW - Roll transport trolley

### Easy transport for rolls

**Material:** steel

**Roller design:** 4 x steering roller

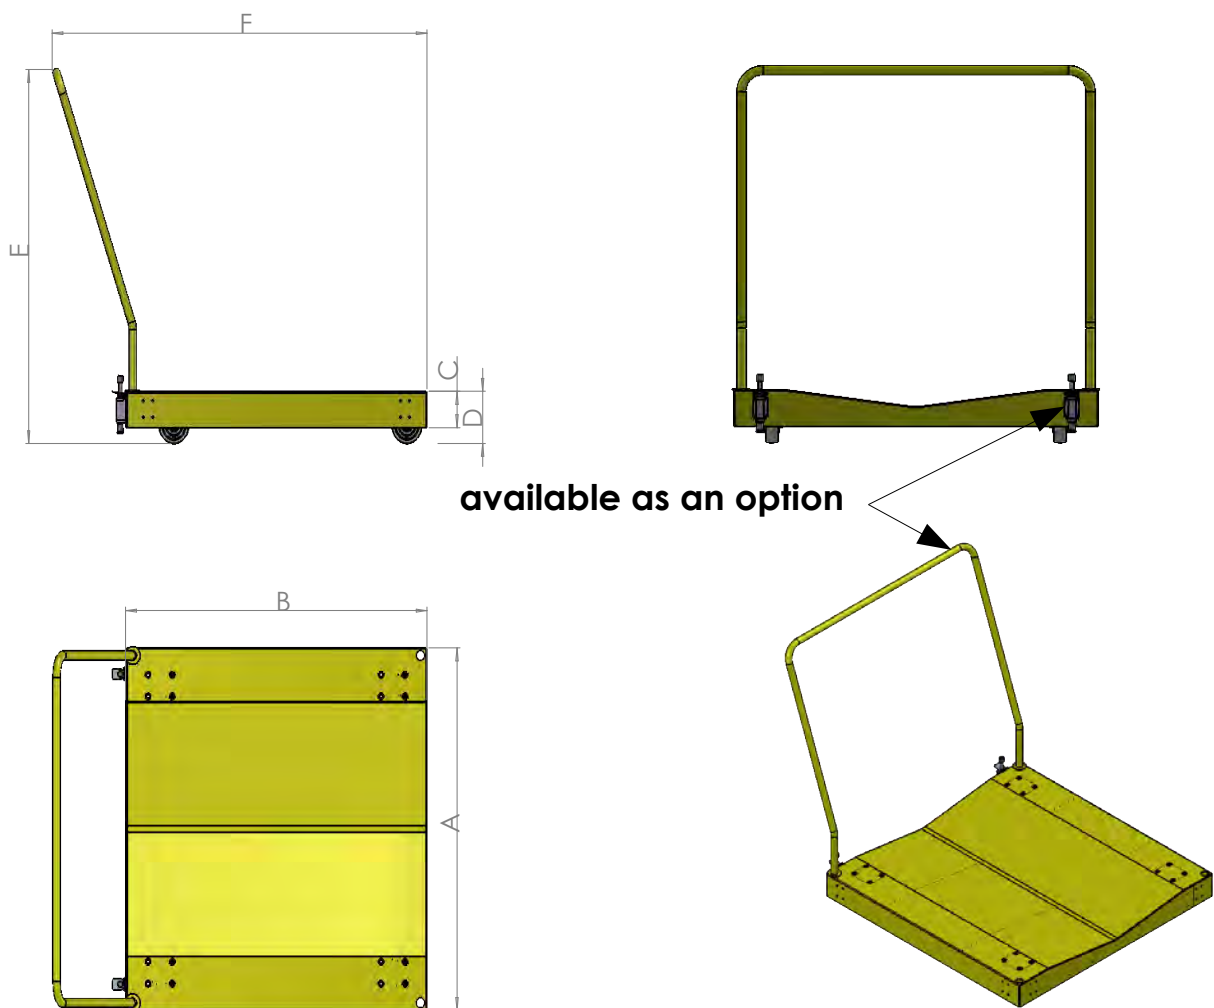

**Roller surface:** Polyamid (standard)

**Surface:** coated in bright yellow

**Options:** handrail (grab handle), parking brake, stacking aid

Our roll transport trolleys offer an inexpensive way to transport coiled material simply and easily. The RTW is a compact, stable steel construction and thus also allows the transport of heavy rolls up to 1,000 kg. The material does not touch the floor and remains clean. The reel transport trolleys enable easy and safe transport of sensitive reel materials.
