About Us. The company history.

HEN
AG

WWW.HEN-AG.DE

HEN AG, founded in 1999, emerged from a sole proprietorship that had been active in the field of “technology for the maintenance and care of forest and field roads” since 1995.

Today HEN AG employs over 20 people.

At the company headquarters in Steinheim-Höfingheim – the first company building was built in 2000, in 2011 an extension in the form of a production hall took place – here complete system applications, machines and devices are developed and constructed.

HEN's more than 25 years of experience guarantees practical, innovative and economical solutions for a wide variety of applications.

HEN AG is proud to develop innovative technologies that protect the environment while providing efficient solutions for communities, businesses and more.

HEN AG operates in three business areas:

HEN TECHNOLOGY

HEN VEHICLE TECHNOLOGY

HEN FACTORY AGENTS

Specialist workshop for municipal vehicles

Repairs, customer service and more

You can get many of them in our specialist workshop.

Services for your municipal vehicles:

- Repairs
- Customer service
- Repairs
- TÜV inspections
- Safety checks
- Diagnostics
- Pick-up and delivery service

For both own brands and third-party products.

www.hen-ag.de/services-service/

Our service team is at your disposal and we look forward to offering you the best possible service.

If you have any questions or need assistance, don't hesitate to contact us!

Planning office for superstructures and custom made

Modern CAD meets high competence

In our planning office for superstructures and custom-made products, we create solutions tailored to your needs using modern CAD technology. Thanks to our high level of expertise, we are able to implement appropriate special solutions.

This also applies to our special solutions for the Unimog.

Design and manufacturing

Own designs and production

Do you have an individual request? Or do you need individual design and production for your vehicle?

With us you will find the right solution.

For example, our HEN rear mounting plate for additional vehicle utilization in road construction.

Axle load calculation for:

- Watering systems / water barrels
- Winter service / snow plows / spreaders
- Leaf/container structures

Prototype construction for:

- Device connections to your carrier vehicles
- Path maintenance
- Hook lift/ roll-off systems

Further services and special solutions on request.

Path maintenance and road maintenance

HEN path maintenance systems

These innovative solutions are versatile and take care of the maintenance and care of bicycle and hiking trails, cemetery paths, parks, city parks, golf courses, forest and farm paths as well as state and federal roads.

The origin and thus the oldest business area are technical solutions for economical maintenance and care of forest and field roads as well as special solutions in road construction.

Over the years there are more and more tasks and thus machines were added, so that today a complete product range of equipment for path and road maintenance can be offered.

What we cannot manufacture ourselves is manufactured in our local area by long-standing suppliers in order to ensure short distances and equally short transport journeys.

The machines are assembled exclusively here in the factory in Steinheim.

From technology for cycling and hiking trails to machines in road construction.

Path maintenance

Reliable devices from HEN AG for autumn

Especially in autumn, when the leaves fall and spread, your existing carrier vehicles are used with our leaf bodies.

HEN AG's attachments are mainly used for inner cities, paths, parks, courtyards, parking lots, pedestrian zones, playgrounds/sports fields and many other large areas.

Wet autumn leaves prevent the drying of streets, paved areas and forest and field roads, which should definitely be removed from the road surface.

Please feel free to contact us.

Municipal vehicles and electromobility

Bonetti 4x4 compact vehicle

The Bonetti F100X 4x4 represents a robust, reliable and technically innovative solution with many advantages for all customers who require a special vehicle with compact dimensions and high performance.

Electric trucks

Our e-trucks offer reliable mobility without emissions.
Perfect for municipal work, industrial sites and inner-city applications.

HEN Unimog bodies

As a bodywork partner of Mercedes-Benz Truck and Special Truck, we offer various attachments and bodies for the Unimog.
Versatile for street cleaning, winter service, green space maintenance and more.

Attachments and superstructures

Our tailor-made solutions for municipal tasks range from sweepers to spreaders.
Efficiency and sustainability are the focus.

Bonetti with all-wheel drive

HEN
Fahrzeugtechnik

WWW.HEN-FAHRZEUGTECHNIK.DE

Compact – Reliable – Variable

Bonetti F100X 4x4 represents a robust, reliable and technically innovative solution with many advantages for all customers who require a special vehicle with compact dimensions and high performance.

The Bonetti F100X 4x4 is based on Bonetti's more than 40 years of experience in the development and manufacture of special 4x4 vehicles with compact dimensions.

With the extremely economical and low-emission Euro VI e diesel engines from FPT/Iveco and 150 hp power, the Bonetti vehicles are ideal motorized.

At HEN AG you not only get the Bonetti F100X as a compact vehicle itself, but also corresponding attachments and superstructures.

Picco Truck and electric transporter

HEN
Fahrzeugtechnik

WWW.HEN-FAHRZEUGTECHNIK.DE

Compact – Reliable – Powerful

With its compact dimensions, the small truck is the ideal work partner for the narrowest streets and squares. Foldable side walls and various attachments are possible.

The impressive payload of the low loading area with folding side walls, which facilitate loading and unloading, are convincing features that make the PiccoTruck an efficient light transport vehicle.
