

DR MALOU

FREEZE-DRIED FOOD
FOR YOUR PET

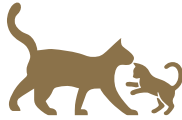

We invite you
to explore the
product range of

DR MALOU

DrMalou is a brand born from the need to change the approach to daily pet nutrition. Instead of producing just another pet food that meets basic standards, we have created a solution that **truly supports the health of your dogs and cats**. Our recipes are based on the freeze-drying process, which preserves the natural properties of the ingredients – without heat treatment and, consequently, without nutrient loss. As a result, our food delivers tangible benefits: **it boosts immunity, helps maintain peak physical condition, and enhances the overall well-being of your pets.**

We believe that **effective nutrition doesn't have to be complicated**. It is enough to use what works – simple, high-quality ingredients in a form that truly serves the body. And that is exactly what we do.

DR MALOU

**We believe
that what you put
in your pet's bowl matters.**

Dr Malou is a premium brand specializing in high-quality freeze-dried food and treats for dogs and cats. Our mission is to support the health and well-being of pets by providing them with natural, nutrient-rich food that reflects their biological needs.

Freeze-dried for the Highest Quality

Our products are created based on advanced freeze-drying technology, which preserves the **natural structure of ingredients** and protects valuable vitamins, enzymes, and nutrients. Unlike traditional high-temperature processing, **freeze-drying maintains the nutritional value** and natural taste of ingredients while ensuring excellent digestibility.

FREEZE-DRIED 100% Real meat

NO ADDED SUGAR

NO GRAINS

NO PRESERVATIVES

Pure Ingredients, Zero Compromises

Dr Malou recipes contain up to **100% high-quality meat** or carefully selected natural ingredients. We **never use grains, artificial preservatives, colorants, or unnecessary fillers**. Every formula is developed to support digestion, immunity, healthy skin and coat, and overall vitality for dogs and cats.

For Conscious Owners, For Healthy Pets

Our brand was created **for conscious pet owners** who understand that nutrition plays a key role in the health, longevity, and quality of life of their pets. By combining scientific knowledge, high-quality ingredients, and a deep respect for animals, Dr Malou aims to set a **new standard in modern pet nutrition**.

What is freeze-drying?

Freeze-drying, or sublimation drying, is the most modern method of food preservation without the use of any chemicals.

It is a process that literally allows you to "stop time" - by completely removing water, the product becomes naturally resistant to spoiling while maintaining the structure, shape, and color of the fresh product.

Freeze-drying in 3 steps:

FLASH FREEZING

The product is **instantly frozen at an extremely low temperature**, which prevents damage to cell structures.

VACUUM

The frozen product enters a chamber where the pressure is lowered. **Thanks to the vacuum, water can be removed without heating the product**, which preserves all vitamins.

SUBLIMATION

The ice contained in the product evaporates directly into a gaseous state, bypassing the liquid phase. Thanks to this, the structure of the product remains intact.

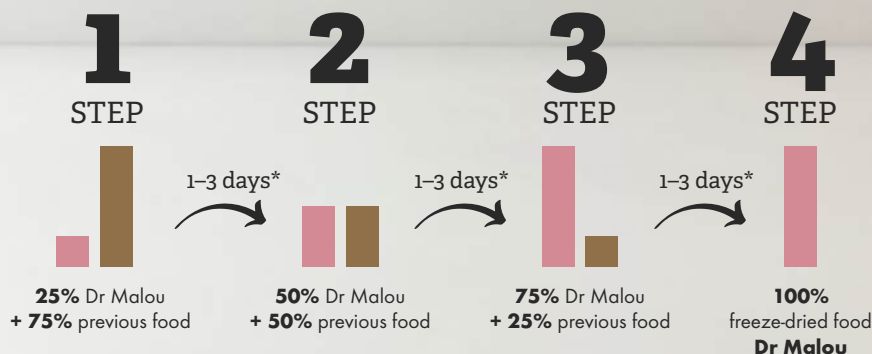

Why is it the best choice?

- ✓ **Preserves up to 100% of nutritional value:** Unlike traditional drying, freeze-drying does not destroy vitamins, minerals, or enzymes.
- ✓ **Natural intensity:** Guarantees full natural flavor, aroma, and deep color.
- ✓ **Clean composition:** The process requires no preservatives, colorants, or flavor enhancers.
- ✓ **Lightweight and durable:** Products are extremely light and have a very long shelf life.

How to introduce freeze-dried food?

To ensure the diet change is safe and well-tolerated by your pet, **Dr Malou** food should be **introduced gradually**.

A sudden change in food can cause gastrointestinal problems. Gradually mixing foods **facilitates the adaptation** of the digestive system to a new type of food.

* For animals with sensitive digestive systems, each stage can be extended by 1-2 days.

Did you know you can also serve our food wet?

Better hydration:

Increases the amount of water in your pet's diet.

High palatability:

Soaked food becomes more aromatic.

Convenience:

Freeze-dried food is light, and after adding water, it gains the consistency of wet food.

Comparison FREEZE-DRIED VS. EXTRUDED FOOD	 freeze-dried FOOD	 extruded DRY FOOD
Production Process	Freezing ingredients → freeze-drying (vacuum sublimation)	Mixing ingredients → fat coating → extrusion → drying
Temperature during production	-40 degrees Celsius (freezing, then steam evaporation)	200 degrees Celsius
Moisture Content	2-6%	8-10%
Protein content (dry matter)	30-65%	18-35%
Protein bioavailability	90-98% - very high, similar to raw meat	70-85% - low, depends on the quality of ingredients
Fat content (dry matter)	14-30%	10-20%
Carbohydrates content (dry matter)	0-10%	35-55%
Dietary fiber content (dry matter)	1-5%	2-10%
Ash content - minerals (dry matter)	6-12%	6-10%
Natural vitamin content	High, most natural vitamins are preserved	Low, most are degraded during the extrusion process
Loss of vitamins naturally occurring in the pet food ingredients.		
Vitamins A, D3, E, C, B1, B2, B6	1-5%	50-90%
Most commonly used ingredients	Muscle meat, offal, vegetables, dried egg yolk	Meat meals, grains, vegetable fats
Preservatives	None, natural preservative - rosemary extract	Synthetic: BHA, BHT, ethoxyquin; Natural: tocopherols, ascorbic acid
Shelf life after opening	2-3 weeks in a sealed container	2-6 weeks in a sealed container

Food & Health

Dr Malou freeze-dried food preserves the full nutritional value and natural taste of fresh ingredients, which translates into the high quality of protein essential for your pet's health.

Regular use of Dr Malou foods supports maintaining proper body weight and the animal's vitality, providing an excellent foundation for a long and healthy life.

Body Condition Score (BCS)

BODY TYPE	TOO THIN	THIN	IDEAL WEIGHT	OVERWEIGHT	OBESE
	 1	 3	 5	 7	 9
Body fat % content	<5	6~14	15~24	25~34	>35
Body Description	Ribs visible, not covered with fat, sunken belly, body shape may indicate health problems in the cat.	Ribs covered with a thin layer of fat, belly slightly sunken, the amount of calories consumed from food should be increased.	Ribs palpable under a layer of soft fat during palpation, maintain current caloric content of meals.	Small amount of fat on the neck, ribs palpable under a layer of fat, sagging belly, caloric content of meals should be reduced.	Small amount of fat on the neck, ribs palpable under a layer of fat, sagging belly, caloric content of meals should be reduced.

Freeze-dried Lollipops

FREEZE-DRIED COMPLEMENTARY FOOD
FLAVAOR MIX

Surprise your cat with a completely **new way of serving meat**. Freeze-dried lollipops are **flavor-filled discs** composed to please the palates of picky cats and support their natural microbiome. You can serve them directly by holding the stick. Depending on the flavor variant, each lollipop contains additional ingredients with proven **health-promoting effects**.

FUNCTIONAL INGREDIENTS:

Pumpkin – source of vitamins E, B1, B6, and fiber. Supports digestion and intestinal function.

Blueberries and cranberry – strong antioxidants, rich in vitamins C and K. Support immunity and urinary tract.

Barley grass – provides fiber, folic acid, and potassium. Naturally supports metabolism.

Egg yolk – a true vitamin bomb. Biotin improves coat condition, and lutein protects eyes.

Yam powder – has a regulating effect on the digestive system and supports peristalsis and microbiological balance.

Chicken liver – natural source of vitamin A, B vitamins, and selenium – essential ingredients for the proper functioning of the cat's body.

Freeze-dried Waffles

FREEZE-DRIED COMPLEMENTARY FOOD
FLAVOR MIX

A healthy reward ideal for canine challenges and hunts! Freeze-dried meat waffles are 94% chicken meat with liver combined with selected **superfoods**. The crunchy, brittle structure of the waffles activates the dog's instincts without a gram of artificial colorants or preservatives. Each flavor version (with pumpkin, blueberry, or cranberry) constitutes a carefully selected composition of natural ingredients:

Chicken meat and chicken liver – an easily digestible duo rich in protein and B vitamins, vitamin A, and selenium. It provides an excellent source of energy and components supporting the immune system.

Yam powder – has a regulating effect on the digestive system, supporting digestion and intestinal peristalsis.

Pumpkin – a source of vitamin E, fiber, and B vitamins. Supports intestinal health and natural immunity.

Blueberries – natural antioxidants rich in vitamin C, K, and manganese, which support vision and neutralize free radicals.

Cranberries – valued for properties supporting urinary tract health, also rich in vitamin C.

COMPOSITION: chicken meat 84%, chicken liver 10%, dried fruit or vegetable 2.5%, yam powder 3%, cellulose 0.5%.

TrustMate 

Dr. Malou products combine high-quality nutrition with maximum convenience. The freeze-drying process is a food preservation method based on water removal, which allows for the retention of most of the raw material's nutritional value. Thanks to this technology, it is possible to provide animals with highly bioavailable ingredients in a form that is easy to portion and serve. These products offer an alternative to highly processed treats, supporting proper nutrition, overall condition, and the vitality of pets at various stages of life.

Marta Parzych-Paluszewska, DVM
VET-CARE Itawa Veterinary Clinic
Author of the "Okciem Veta" educational channel

In my practice, I frequently encounter patients with food intolerances and skin allergies. Dr. Malou freeze-dried products are an excellent solution for owners seeking food with a transparent, single-protein composition. The freeze-drying process eliminates the need for artificial preservatives and unnecessary fillers, making these products a safe and highly digestible foundation for elimination diets.

lek. wet. Mira Szkamelska, DVM
VET-CARE Itawa Veterinary Clinic

As an animal behaviorist, I work every day with dogs of various needs and temperaments. That is why I place immense importance on the quality of the products I use during training and therapy sessions. Dr. Malou treats are a staple in my work, and I can say with full confidence that they serve their purpose perfectly. They are incredibly appealing to dogs—even those who are more picky or stressed—which is crucial in behavioral work. The ingredients are simple and transparent, giving me the peace of mind that I am rewarding dogs in a healthy and safe way. The freeze-dried food also deserves special recognition; it works ideally both as a part of a daily diet and as an exceptionally high-value training reward. It is convenient to use, easy to portion, and retains high nutritional value. These products truly support my work and help build positive associations in dogs. I wholeheartedly recommend them to both pet owners and professionals working with animals.

Ludwika Popow
Veterinary Technician & Animal Behaviorist WyChilluj

Dr Malou products have been an absolute revolution for my cats' bowls. Even the pickiest eaters, who are usually reluctant to try anything new, have literally gone crazy for them.

As a breeder, I primarily value the uncompromising, natural ingredients. The freeze-dried process preserves the most precious qualities of the meat, which directly translates into my cats' shiny coats and vitality. The fact that such high quality is offered by a Polish brand makes me even more proud. This is a premium product that combines natural purity with extraordinary palatability, satisfying even the most sophisticated feline connoisseurs.

Karolina Gałeczka
Ragdoll: Ufne KotyPL*
Owner of a Ragdoll cattery

Dr Malou freeze-dried treats are characterized by superior quality and the retention of essential nutrients and natural flavors. Consequently, they are readily accepted by animals experiencing decreased appetite during the course of a disease.

Amanda Rybak, DVM
SweetVet Veterinary Clinic

Dr Malou freeze-dried products are a valuable dietary component for both adult animals and growing puppies and kittens. They retain natural nutrients to support proper development and immunity from the very first months of life. The high digestibility of freeze-dried food ensures it is well-tolerated, even by pets with sensitive digestive systems.

Anna Mazuchowska, DVM
SweetVet Veterinary Clinic

I recommend Dr Malou freeze-dried products as valuable nutritional support during rehabilitation. The high protein content promotes tissue regeneration and helps maintain muscle mass, while their exceptional palatability assists pets with a decreased appetite, encouraging them to eat during the demanding recovery period.

Anna Dobies, MSc Eng
Veterinary Physiotherapist,
SweetVet Veterinary Clinic

I recommend Dr Malou freeze-dried food and treats for dogs and cats - they are highly digestible, minimally processed products with high nutritional value. Thanks to natural ingredients and the absence of artificial additives, they are exceptionally palatable and serve as a convenient, healthy alternative to traditional feeding methods.

Lucyna Traczyk-Sala, MSc Eng
Animal Nutritionist, Veterinary Technician
