KBD Group Board Member

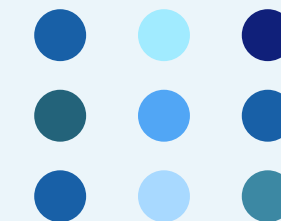

Kevin Kam

Sales Director

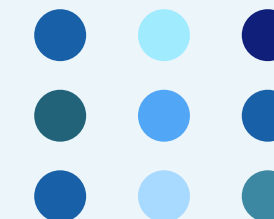

External Position

Luxe Real Estate Group Partner

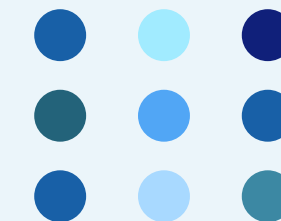

Dave is a true industry veteran with 35 years of experience as owner of Dunwiddie Custom Packaging with offices in Colorado, Hong Kong, and Shenzhen, China. Throughout his career he has served over 500 brand owners, designing, developing, and distributing custom packaging solutions. He has collaborated with major multinational brands such as OraLabs, Procter & Gamble, Hampton Products, Ace Hardware, Evenflo and Gerber. His extensive work across the Pacific Rim has helped him build long-standing industry networks which significantly contributed to his success in the field. Following the sale of his company in 2018, he took on an active role as a board member of the United States Vietnam Council. In 2024, he was appointed President of the trade group, where he has been instrumental in establishing and strengthening trade relations between the two countries.

DAVE DUNWIDDIE

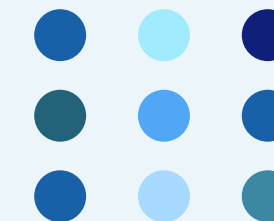

Rooted in his family's legacy of manufacturing plastic thermoform packaging and injection molded parts, Jeremy has cultivated extensive connections and a profound understanding of the manufacturing industry in China. Growing up in Vancouver, BC has also given him a unique perspective on the Canada/US market, blending his deep industry knowledge with a global outlook. His experience extends beyond manufacturing, having started his professional career as a sales manager with an import/export company based in Hong Kong, driving the sale of plastic raw materials from China to India. In this role, he served the top CPVC pipe manufacturers in India such as Astral Pipes, Ashirvad, and many others, building strong relationships and routinely engaging with C-suite executives.

JEREMY LAM

Daniel began his packaging career in the early 2000s at R-Pac before becoming the lead project supervisor at Skullcandy Inc. in 2011, where he directed audio-visual consumer goods packaging projects from concept to creation. In 2017, after parting ways with Skullcandy, he acquired a stake in KBD Group, a manufacturing business group dedicated to sustainable paper pulp packaging since 1990. To enhance his offerings, Daniel simultaneously incorporated a trading company and established a paper pulp products manufacturing facility to assist his operation in connecting American and European brands with high quality suppliers in the Asia-Pacific. He has since managed the supply chain and projects from product to packaging for notable clients like LuMee (acquired by CaseMate), Roka Sunglasses, and Caddis Eyewear.

DANIEL YU

As the Sales Director at Fenix Industries, Kevin leverages a strong background in real estate sales and marketing to bring a fresh perspective to the packaging industry. With experience in 8-figure negotiations, client relationship management, and strategic marketing, Kevin has a proven track record of promoting premium properties, including groundbreaking projects like Vancouver's tallest residential highrise and the tallest passive house in the world. This expertise gives Kevin a keen eye for quality and a deep understanding of diverse client needs. At Fenix, Kevin is committed to delivering customized, high-impact packaging solutions that support clients' brand goals and sustainability initiatives, helping them excel in competitive markets.

KEVIN KAM

HISTORY

2021 - Fenix Conceptualized

Fenix Industries formed in **Denver**, Colorado.

2022 - Expanding Asia Manufacturing

Developed new offering of **multicolor injection molding** for vibrant plastic parts without painting.

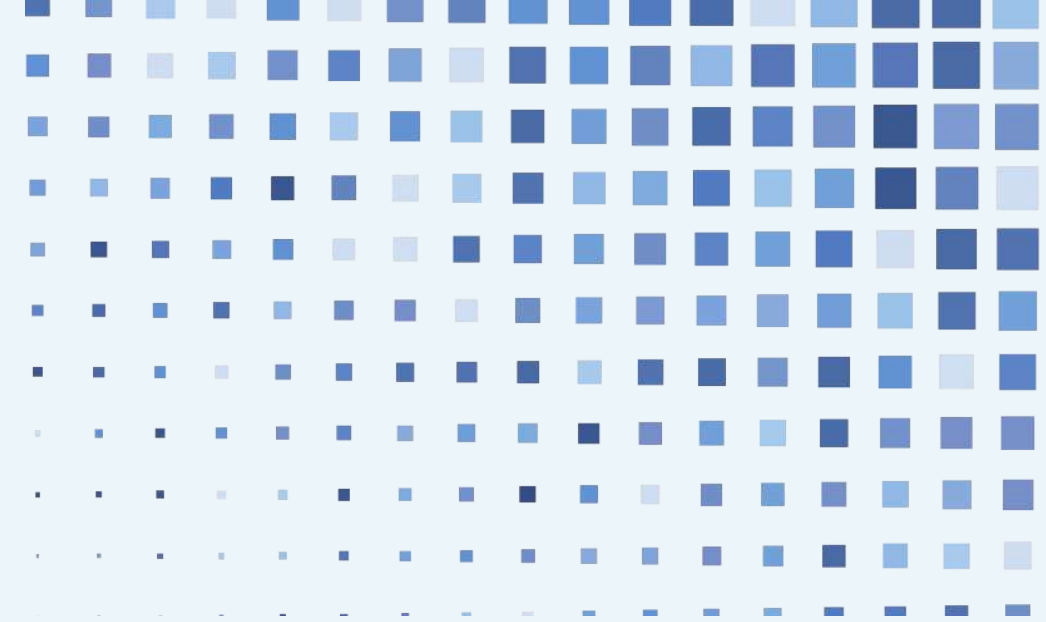

2023 - Bid for Sustainability

Acquired stake in **KBD Group**, a paper pulp goods manufacturing group established in 1994.

Mission + Values

Fenix Industries was founded in 2021, during the height of the global pandemic, with a vision to establish a strong presence in the custom packaging industry. Leveraging the collective experience and extensive network of our founding team, we began by offering what we know best: custom plastic packaging and injection-molded parts coupled with unparalleled service.

CHOOSE FENIX

30+ Years Exp.

Our team is made of packaging industry veterans with over 30 years experience.

Vertical Integration

From manufacturing to value added services and quality assurance, we can do it all.

Global Footprint

Our head office is based in Denver, with manufacturing facilities spread across Asia Pacific.

Service Oriented

Let us take care of your needs, we go the extra mile to make sure your project is a success

PRODUCTS

MOLDED PULP

eco-friendly material

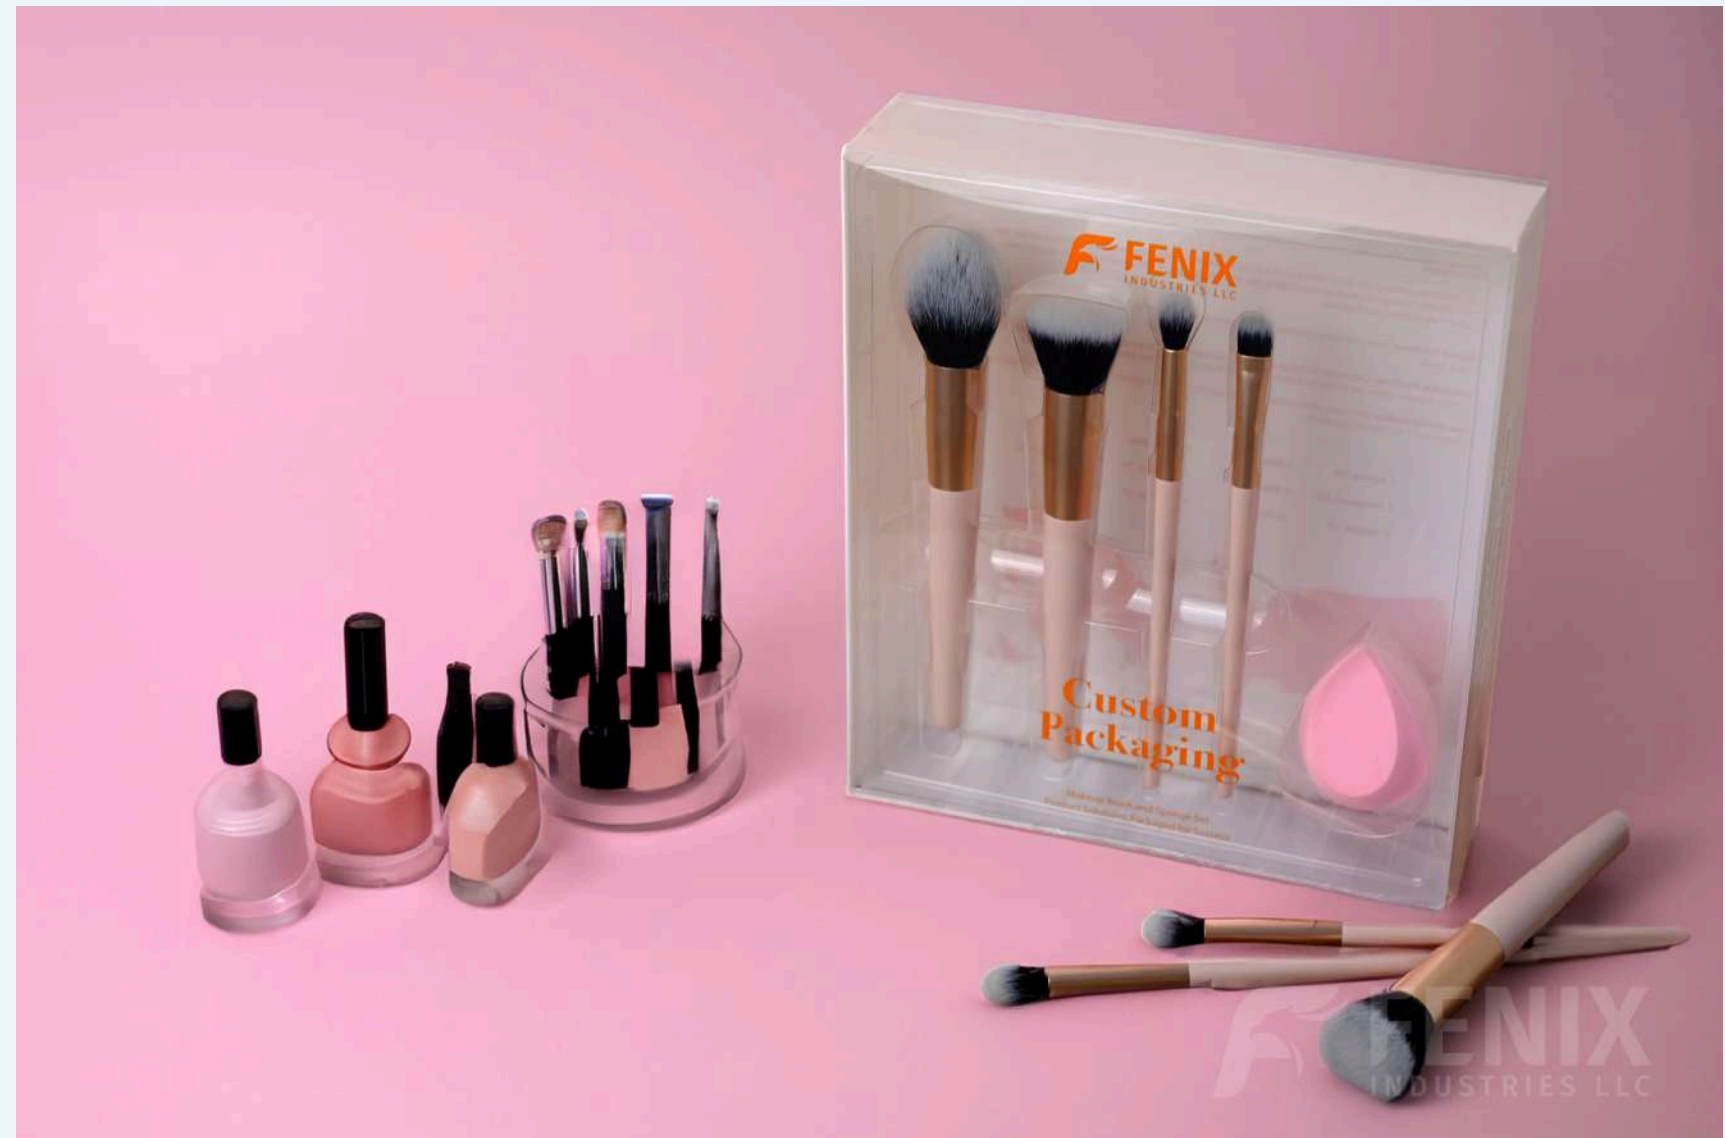

Molded pulp is made from a combination of different renewable materials including sugarcane, bamboo, and paper. Using CNC-machined steel molds we are able to produce complex shapes that look good while functionally strong enough to protect its contents.

PLASTICS

thermoform + injection molding

Whether you already have an idea for your packaging and product needs or not, our team can provide insightful suggestion for your plastic material and design choices for the best possible outcome. Speak with us today to learn more!

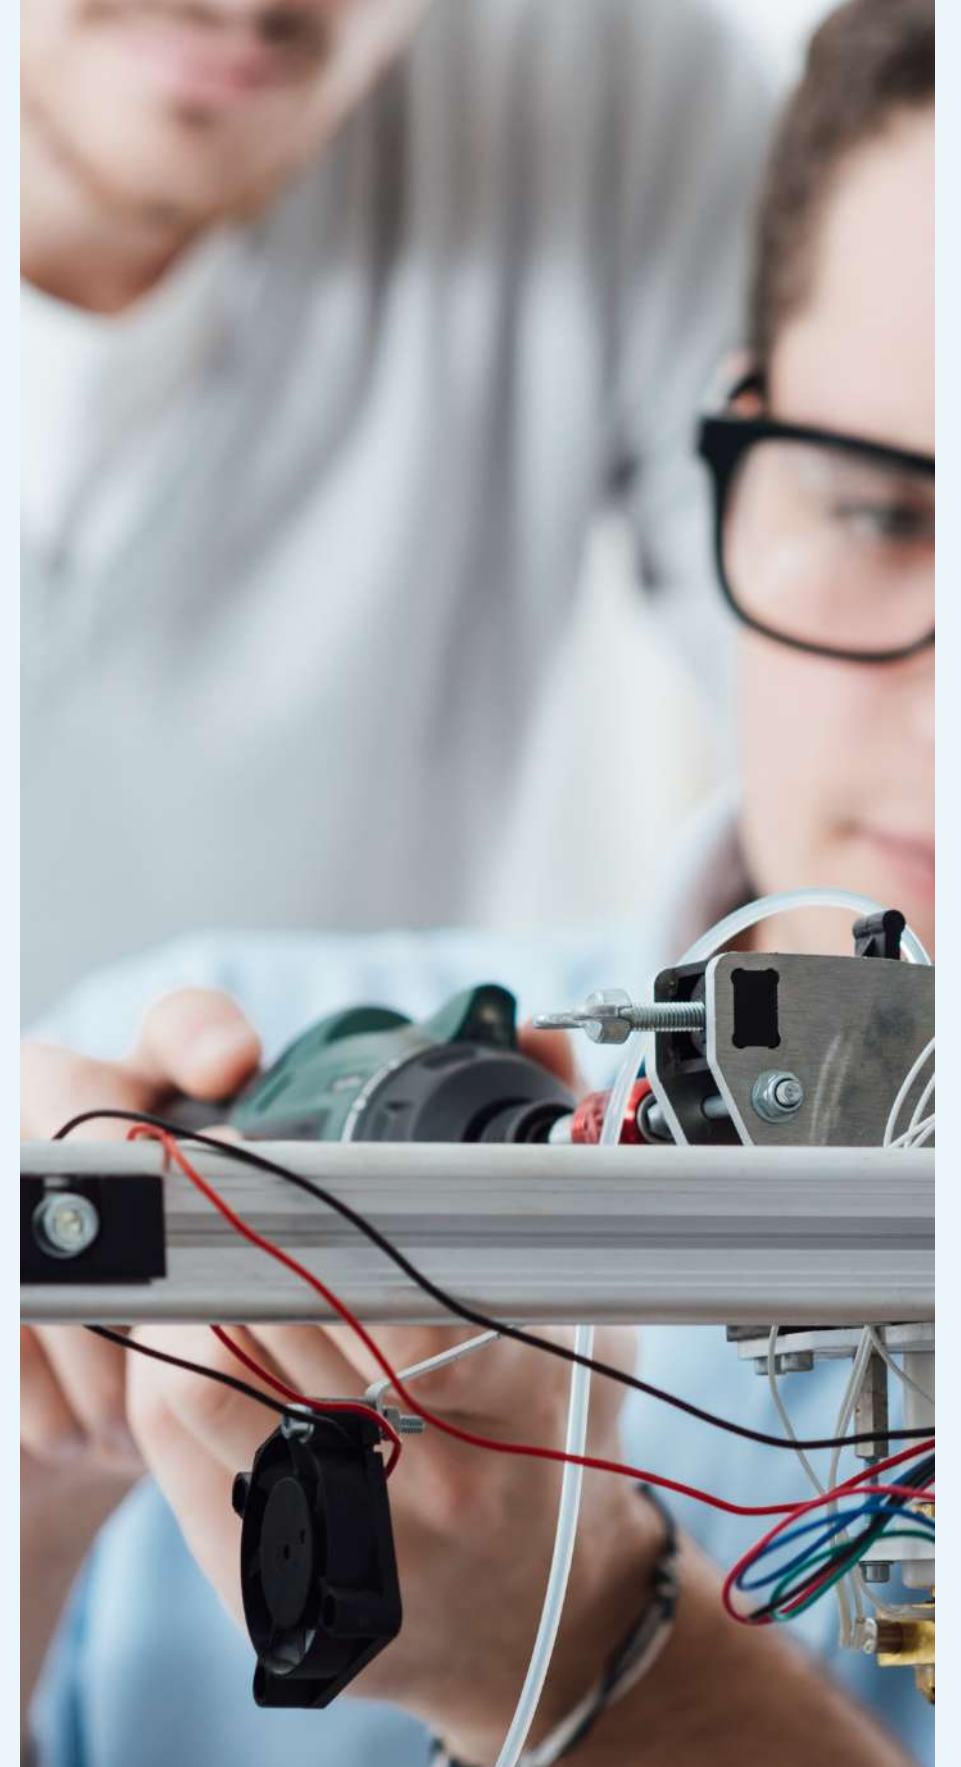

PAPERBOARD

printing + embossing

We offer a variety of different printing techniques to elevate your packaging including cold foil, hot foil stamping, embossing, UV printing, and many others. Contact us to find out if paperboard is the right material for your packaging needs today!
