Dogs food

**NATURE  
ALO<sup>®</sup>** *for dogs*

A premium diet for your precious dog

## **INSECT RECIPE MEALWORM&DRIED POLLACK**

**The perfect allergy care diet for your dog's health!**

- allergy double care formula!
- fresh domestic agricultural and marine products!
- Low-temperature pressing method that minimizes destruction of nutrients and increases digestibility

Registered in the **"U.S. FDA"**  
with the world-class safety certification

# Only Nature Alo Insect Recipe's **allergy double care formula!**

By using a hypoallergenic ingredient mealworm as main ingredient, it prevents aggravation of allergies, while anti-inflammatory patented ingredients and functional ingredients takes care of the inflammatory reactions caused by allergies.

Improve digestion

bowel movement improvement

Improvement of sleep and tear marks

Relieve ear diseases such as ear inflammation and smell, etc.

Relieve foot inflammation and eczema

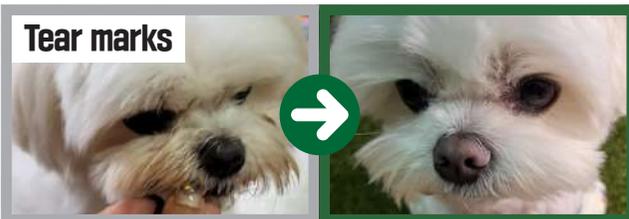

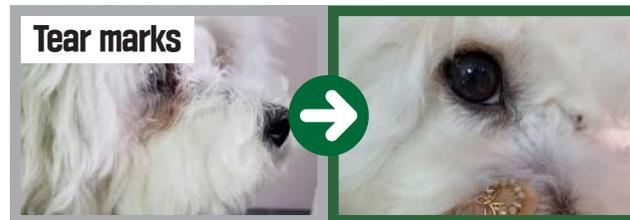

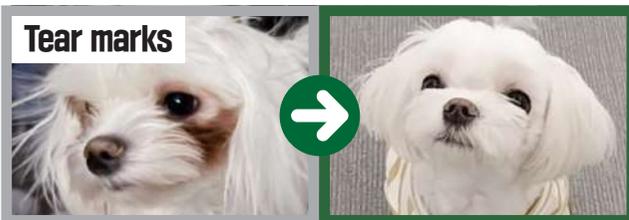

Improvement of hair quality and relieve dermatitis

# NATUREALO INSECT RECIPE

for allergic tear marks and skin disease care

Nature Alo for allergic tear marks and skin disease care **An amazing hypoallergenic effect that starts the day after feeding** as soon as you switch to Nature Alo's dog tear allergy feed! These are pictures sent by the pet owners feeding Nature Alo's dog tear allergy feed after seeing an **amazing effect within a day to a week from the start of the feeding.**

**Aster glehnii grows only on islands that hold the grace of nature.**

Nature Alo's special key ingredient!

Containing **6'-O-caffeoyldihydroxygeraniin**,

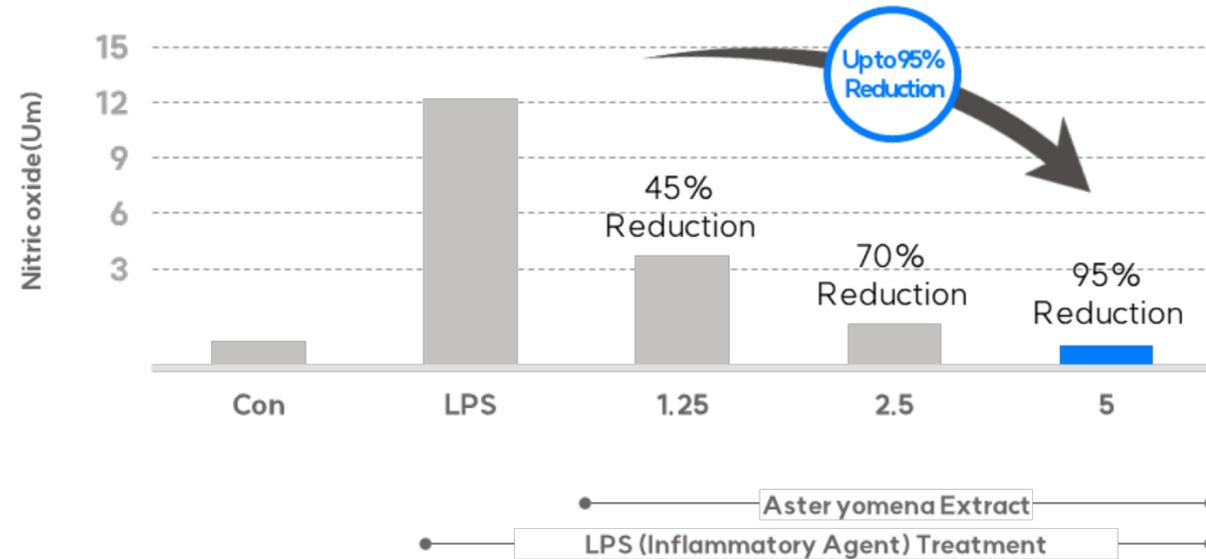

an anti-inflammatory patented substance extracted from Aster glehnii  
harvested in Island, a clean area!

# RESEARCH & DEVELOPMENT

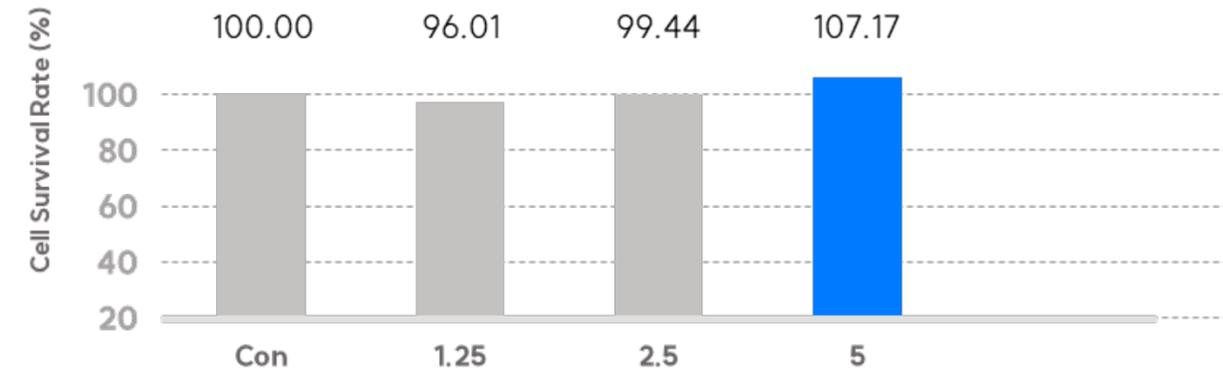

In vitro Results

## Inflammation Reduction Measurement Results

✓ Up to 95% reduction in Nitric Oxide (NO) after LPS treatment in RAW 264.7 cells

## Cell Toxicity Assessment

✓ At least 96% survival in all dilution multiples after drug treatment in RAW 264.7 cells

Source: Joint Research and Development Results from the College of Veterinary Medicine, Chonnam National University, South Korea, December 2023

# RESEARCH & DEVELOPMENT

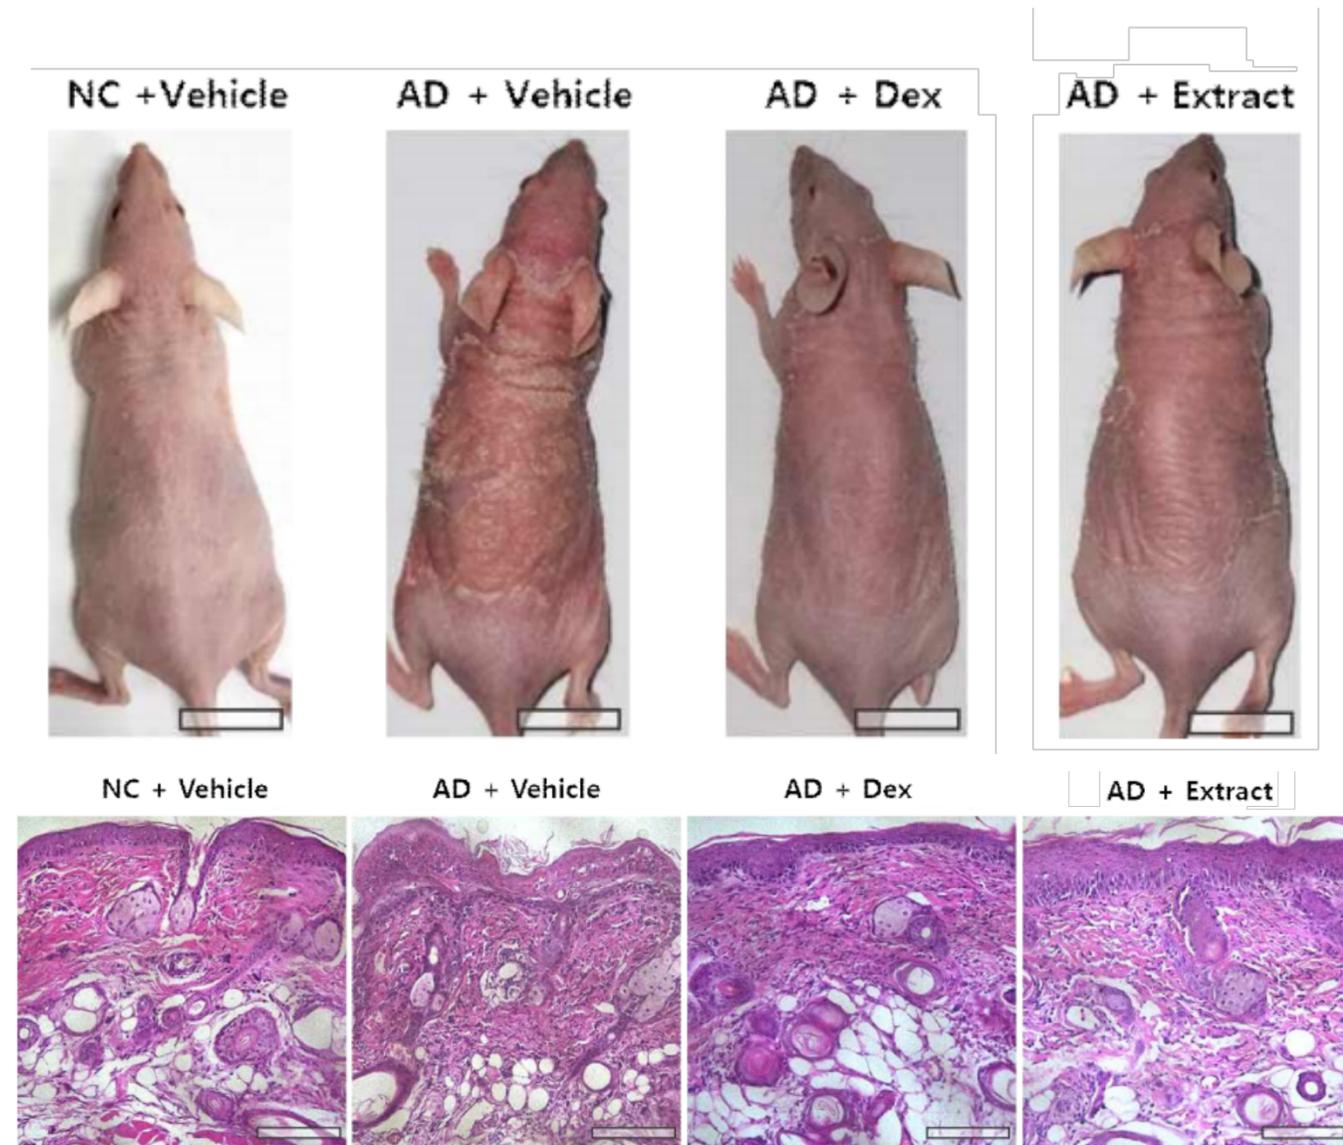

## In vivo Results

### Atopic Dermatitis Lesion Assessment

Using a dermatitis model induced in nude mice through DNCB treatment, the effectiveness of *Aster yomena* extract was visually observed. It was confirmed that symptoms of dermatitis, such as aversion formation, dryness, and edema, manifested in the dermatitis-induced group. Furthermore, the group treated with *Aster yomena* extract showed an anti-inflammatory effect similar to that of the experimental group treated with Dexamethasone (an anti-inflammatory drug).

### Histopathological Assessment of Atopic Dermatitis Skin

Following H&E staining of skin tissues extracted from animals with induced inflammation, it was observed that the thickness of the epidermal layer in the dermis, infiltration of inflammatory cells, and edema also alleviated in a concentration-dependent manner with the extract.

NC + Vehicle: Normal Control Group

AD + Vehicle: Administered to mice induced with Atopic Dermatitis

AD + Dex: Administered Dexamethasone (an anti-inflammatory drug) to mice induced with Atopic Dermatitis

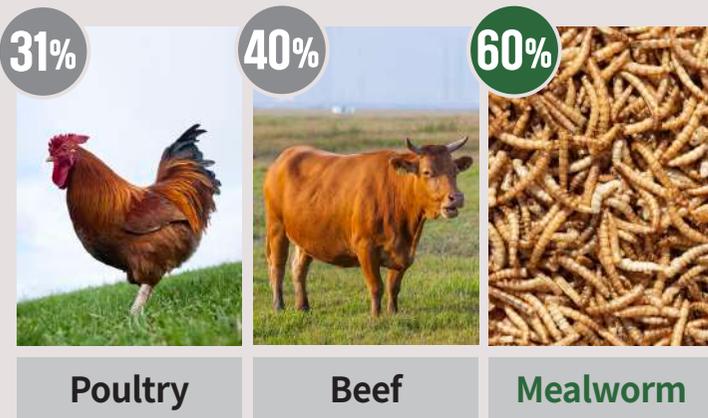

AD + Extract: Administered *Aster yomena* extract to mice induced with Atopic Dermatitis

High-protein energy source

# Mealworm

Mealworm's protein is more digestible than that of meat and poultry and contains a lot of unsaturated fatty acids.

Comparison of protein ratio  
to the equal weight

## Hepatocyte recovery effect

was confirmed after eating edible mealworms!

After eating Kosoae,  
liver tissue cells  
**recovered from  
abnormal(left)  
to be normal(right).**

※Source: Dong-A University research results

# Fresh domestic agricultural

and fishery products produced without using powder ingredients

We use fresh agricultural and fishery products as they are, rather than ingredients that have been powdered and stored for a long time.

## EFFICACY OF NATURE ALO'S FIVE UNIQUE FUNCTIONAL INGREDIENTS!

### ROSEHIP

It can help alleviate cartilage damage, improve arthritis symptoms, and reduce body fat.

### HEARTLEAF HOUTTUYNIA

It can help remove skin diseases and skin toxins, and improve capillaries.

### MARIGOLD

Rich in lutein that can help prevent eye diseases such as cataracts and macular degeneration.

### ASTER GLEHNII

It can help with various inflammatory diseases such as dermatitis, stomatitis, and nephritis.

※The above description is limited to the efficacy of the raw material.

## Moist and Soft!

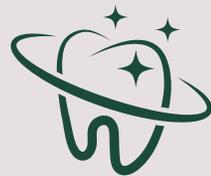

# SOFT MOISTURE TYPE

---

Dogs of all ages, as well as young puppies to old dogs, can be fed without any burden.

Replenish the amount of drinking water with a soft formula full of moisture!

It doesn't put too much strain on the teeth with a brownie-like soft texture!

With seasoning of dried pollack, it is highly palatable, even for pets who hate insect food!

Individual packaging is fresh and hygienic.

# Low-temperature pressing method

that minimizes destruction of nutrients and increases digestibility

The low-temperature pressing method is a cooking method that minimizes the destruction of nutrients in ingredients by gently cooking them at a low temperature.

Dogs cannot chew well. When feed is swallowed without being chewed well, **it can swell up in the stomach, causing vomiting.**

Nature Alo insect recipe helps dogs digest and absorb nutrients as the feed does not expand and is untangled slowly after ingestion.

NATUREALO	HOLISTIC FEED IN THE MARKET
It is untangled slowly after eating	Expansion after eating
Good digestion is good	Slow digestion
Low-temperature cooking	High-temperature cooking
Nutrient preservation	Nutrient destruction

**NATUREALO**

**HOLISTIC FEED**

**NATUREALO**

**HOLISTIC FEED**

※This results from soaking the Nature Alo insect recipe and commercially available holistic feed in water for an hour.

**Even though they are the same cold pressing,  
they are different!**

As Nature Alo's unique technology fills up nutrients, the feed density is high,  
so it doesn't float on the water.

Nature Alo insect recipe is a

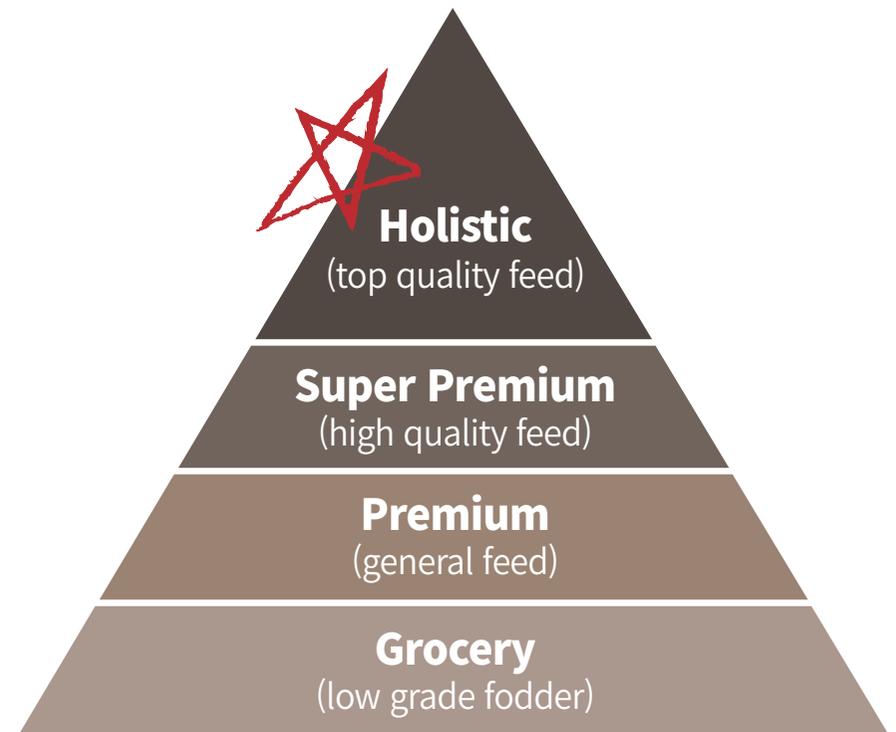

# holistic-grade and human-grade feed

without adding wheat, bean, and corn,  
which are highly likely to cause allergies!

## What is holistic feed?

It is a high-quality feed made from ingredients that humans can eat without using synthetic preservatives, pesticides, or antibiotics.

# Nature Alo, a delicious feed

that considers the health of  
dog and the health of the planet

Non GMO • Non Hormone drugs  
Non Anti-biotic • Non Insecticide • Non Preservative  
Non Coloran • Non Synthetic preservative

Nature Alo reduces emissions of 18 tons of  
carbon dioxide (CO<sub>2</sub>) in its lifetime,  
which will greatly help both pets and  
the global environment.

The amount of carbon dioxide emitted  
during a lifetime when eating beef

**18,360kg CO<sub>2</sub> emissions**

The amount of carbon dioxide emitted  
during a lifetime when eating insect recipe

**185kg  
CO<sub>2</sub> emissions**

**Save 18 tons of  
CO<sub>2</sub> emissions**

It is a feed safely manufactured following the nutrition standards of the American Feed Association AAFCO and European Pet Industry Association FEDIAF, which sets standards for the quality and safety of feed.
