

2011 — TODAY

# Company History

---

From value-added reselling to an AI-empowered Cyber Threat Modelling and Defence Operations platform.

# Our Mission

---

Organized criminal groups, nation state threat actors and hacker groups are currently maintaining a high operational tempo, leaving defenders across the globe far behind. They are posing the highest threat to society, critical infrastructure, organizations of any kind and government institutions.

Our vision is that our product innovation becomes the most essential Cyber Threat Modelling and Defence Operations Platform in the Cyber Security market and by this, mitigates the cyber threats against society, critical infrastructure and more largely secures the freedom of individuals.

We measure our success by radically reducing the impact of these attackers on our clients and the global threat landscape.

# Our Story

---

2011

## Founded

Founded in 2011, IdoubleS Cybersecurity GmbH initially focused on value-added reselling, specializing in security monitoring and incident response solutions from leading US-based vendors.

2017

## Pivot to R&D

Recognizing that cyber attackers had surpassed the defence community, IdoubleS transitioned into an R&D organization with a focus on gaining deeper insights into sophisticated Advanced Persistent Threats. By identifying key challenges, we developed innovative ideas and concepts designed to drive the development of game-changing and marketable solutions.

2018

## Validation

Advancing in R&D, drafting proof-of-concept papers and validating our ideas and concepts through renowned global institutions within our domain, we made considerable progress.

2020

### Prototypes & first demos

- We started developing, testing and validating prototype solutions that we demonstrated in front of innovator prospects.
- Commercial activities to develop the market for our proposed solution commenced.

2021

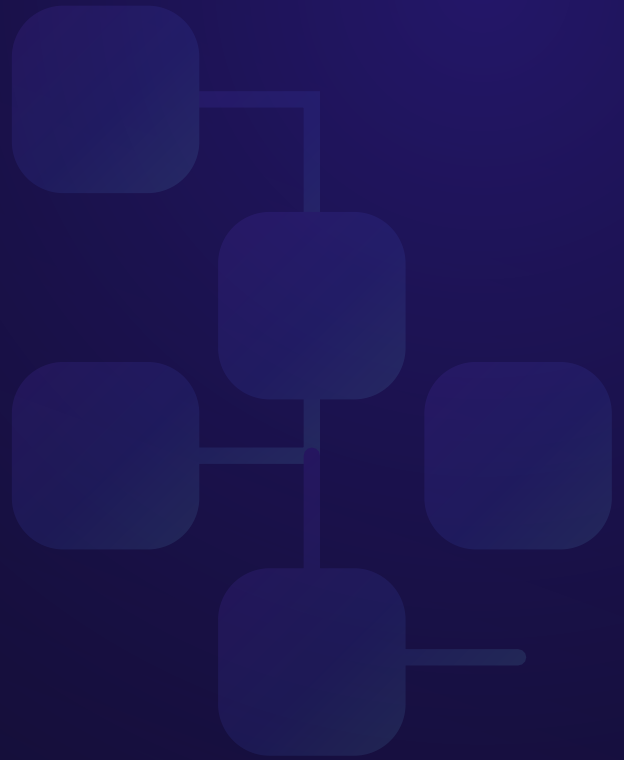

### Early market traction

- We achieved remarkable early market traction and credibility with the idea, concepts and prototypes of IdoubleS.
- Engagement with innovator customers in European governments, defence and financial services industry was gaining momentum.

2023

### Alliances & first Early Adopter

- We conducted various stakeholder and early adopter campaigns which eventually helped us establish strategic alliances with large Independent Software Vendors and convert an innovator customer from the defence industry to our first Early Adopter customer.
- Additional prospective Early Adopter customers in European governments, defence and financial services industry lined up for signing.
- A highly qualified team of cyber security consultants, AI/data science experts and software engineers is developing an AI-empowered Cyber Threat Modelling and Defence Operations platform for entering the market. This platform integrates with several 3rd party tools for providing a modern systemic cyber defence ecosystem.

# WE CONTINUE TO GROW...
