Designer & Manufacturer

Backed by decades of experience and a highly skilled engineering team, we design solutions ranging from individual robotic cells to fully automated production lines.

▶ Every system is custom-built to meet your specific needs, optimizing productivity while maintaining the highest standards of safety and hygiene.

▶ All mechanical and automation design is performed in-house, ensuring full control and quality at every stage.

Integrator

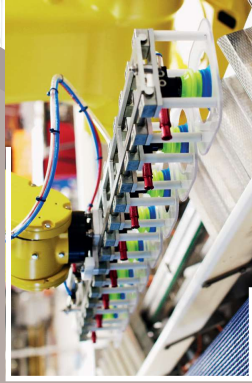

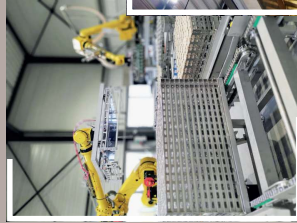

To deliver a true turnkey solution, we seamlessly integrate your existing machinery with additional equipment — including multihead weighers, thermoformers, retorts, and more.

Retort Room Automation

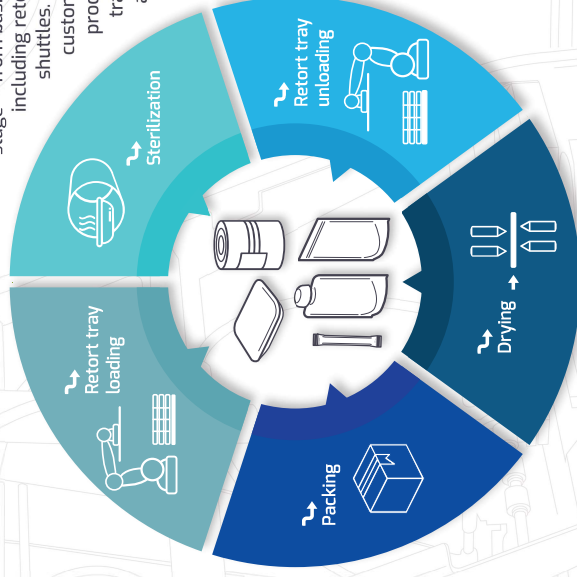

With recognized international expertise, we deliver complete pasteurization and sterilization lines designed for performance, reliability, and traceability. Our advanced retort management system guarantees product integrity and compliance with the most stringent quality standards.

Tailor-Made Turnkey Solutions

We provide fully automated solutions covering every stage — from basket or tray loading to drying, including retort loading and unloading shuttles. Our gripper systems are customized to handle your specific products efficiently — from sealed trays and doypacks to cans, jars, and more.

- ▶ Sealed or thermoformed trays
- ▶ Doypacks
- ▶ Sticks
- ▶ Cans
- ▶ Jars...

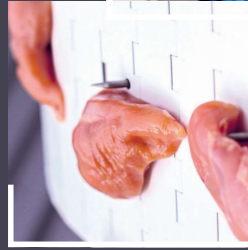

► Raw Product Handling

Using innovative, often patented technologies, we specialize in automating the handling of raw food products.

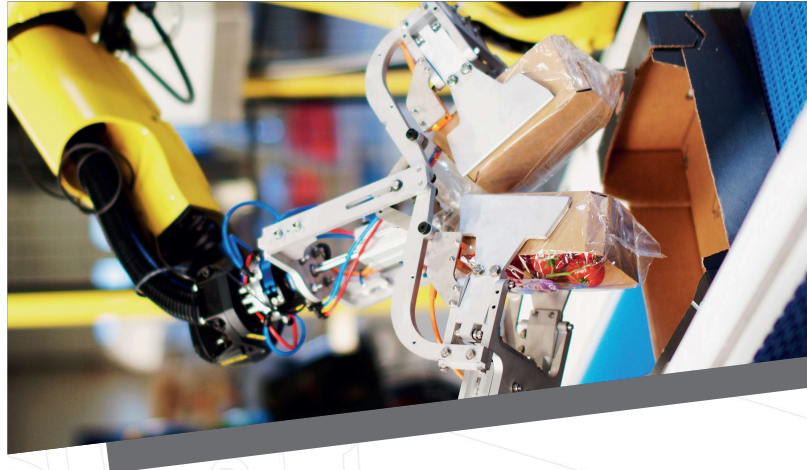

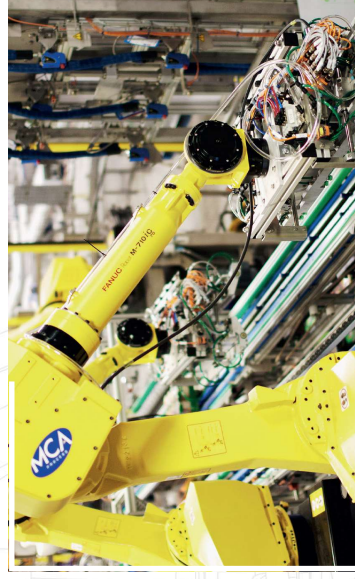

- Ready meal production line
- Automated hamburger assembly line
- High-speed burger packaging line
- Automated poultry packaging line

► End-of-Line, Packing

Every production environment is unique. That's why we design flexible, customized end-of-line automation solutions that fit your specific requirements.

- Robotized cartoning: top load, side load
- Flowpack loading
- Thermoformer loading
- Robotized case packing
- Easy-pal: American cases, carton crates, shelf-ready packaging, plastic crates, etc.

► Customer Support

Our customer support team is fully committed to ensuring your systems run smoothly and efficiently, offering:

- Training for maintenance and production teams
- Remote access via VPN
- Maintenance contracts
- Operational audits
- Upgrades for installations
