3E-LOOK ERP Leading technology for window companies

More efficiency on site with 3E-LOOK Mobile Solutions

End-to-end solutions include on-site processes. 3E-LOOK offers digital mobile solutions for processes such as measurement, service, maintenance, installation and after-sales. It fully integrates with the 3E-LOOK database and makes sure that the collected data is assigned correctly to the corresponding orders.

3E LOOK[®] SOFTWARE

THE SPECTRUM

Windows are high-tech products with an impressive variety. Many processes are involved, such as data entry, planning, work-preparation, calculation, procurement, production, shipping and installation. In order for all these processes to work together smoothly, an end-to-end solution is required.

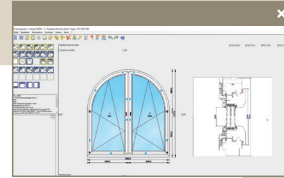

Production & Control

3E-LOOK provides you with paperless production, bidirectional communication, control center technology, and production logistics. It works with feedback to identify and handle various conditions, with follow-up processes integrated. The data basis allows for complex controls and optimal automation.

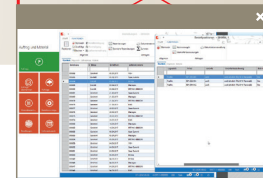

Window technology

3E-LOOK meets advanced technical requirements in wood, wood-aluminum, aluminum, PVC and PVC-aluminum window and front door manufacturing. It complies with the German EnEV and BauPVO and provides in-depth technical assistance.

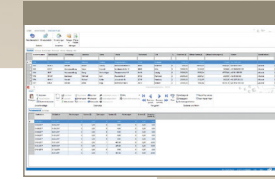

Integrated materials management

Handle warehousing, cutting and procurement. The procurement process is fully digitized with electronic documents and backlog management. It integrates with capacity planning and shipping logistics.

Quotation & Order handling

For various business models: end customers, dealers, objects. 3E-LOOK represents the whole variety of scenarios in handling orders.

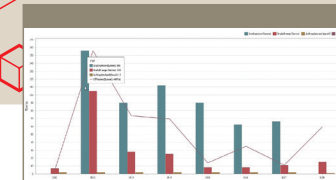

Workflow management

Create a steady workflow throughout the company. Status management regulates order handling and work progress. Organize your tasks with dashboard, cockpit and task management.

Calculation & Controlling

Highly flexible calculation scenarios with surcharges and discounts, various pricing models and post-calculation. Recognize profit margins and check credit line for debtors.

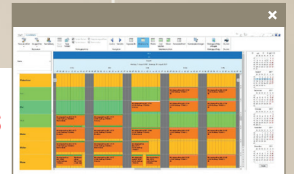

Mobile solutions

Make sure that on-site processes run efficiently. 3E-LOOK offers mobile solutions for measurement, service, maintenance, installation and after sales. All processes fully digitized up to the building site.

Shipping logistics & Installation

Rely on 3E-LOOK to make sure everything is on board. Easily locate all delivery items. Benefit from rack management, intelligent shipping concepts, tour and route planning as well as installation planning.

Sales & Trade

CRM, digital quotation processing, sales organization, cloud and web solutions, SaaS. Online order handling between manufacturer and trader. Information is easily available for sales representatives.
