

We achieve success.

"Virscient...have been vital to the integration of embedded wireless connectivity into FOX's latest products."

"Virscient...were a perfect partner to help us. Virscient understand the technical side better than anyone, but they've also got a strong handle on the workflow required to put out world-class products."

earshots™

"Virscient were really fantastic in helping me figure things out. Virscient would lay out things for us....this is how it is, and this is where things could go wrong."

PERIPHERII

"Virscient played a phenomenal role in halving our turnaround time. They also have a strong understanding of the end user experience."

"Virscient exceeded all our expectations, provided excellent service, and helped us build an outstanding product. I highly recommend this team and look forward to working with them in the future."

Virscient is trusted by the world's leading semiconductor and component companies:

Qualcomm

RENESAS

We make it work.
'Make it work' represents our commitment to taking on the hard stuff. It means leaning into the complex challenges that stand between our customer's vision and their product's potential.

Your vision.
Our expertise.

We
make it work.

We make it work.

Virscient specialises in wireless-connected product development. Our highly motivated team of experts can help you tackle complex challenges and bring your unique vision to production. With deep expertise in hardware & PCB design, embedded software & firmware, mobile applications, RF engineering, and project & certification management, we help you make your idea a success.

Our multidisciplinary team of electronics engineers, software developers, and RF specialists can work with you to define technical and financial parameters, resolve complex design challenges, and deliver production-ready solutions. Our experts can also help you with requirements capture, design, prototyping, bench testing, certification, and product roadmap planning.

We save resources.

Our expertise saves you time and resources, allowing your team to focus on your competencies while accelerating time-to-market and revenue. Let us help you boost your product development.
