Our Vision

To redefine global standards in grooming tools through innovation, precision, and patented technology.

What We Pursue & Challenge

1. Performance First

We challenge conventional cutting standards. We believe scissors should deliver true cutting performance, not just a soft feel.

2. Wrist Comfort & Ergonomics

We challenge fatigue in professional grooming.

3. Patented Engineering

With our proprietary No-Gap Screw System, we eliminate blade play and maintain stable tension.

4. Reliability Over Time

Designed to perform consistently from the first cut to the millionth cut.

5. Real Professional Use

Developed based on real feedback from professional groomers.

6. Global Standard

We aim to become a global standard in grooming scissors.

We don't just make scissors. We redefine how professional grooming tools should perform.
