Minimo **ONE SERIES** Ver. 3

ONE SERIES to the
next stage

MINITOR CO., LTD. JAPAN

Minimo **ONE SERIES Ver.3** High Torque Motor Specialized in Mounting on Machine and Power Pack Evolved into Smaller Body

New arrival of high torque motor, expected for mounting on machine, and power pack.
Speed control dial comes from top to front.
This power pack is evolved with concentration of functions with intuitive simple operability and high durability.

Digital Display with High-Luminance LED

Rotation speed or output rate is indicated by identifying connected handpiece automatically (rotation speed in x1000min or output rate in %).

LED Load Meter

Loaded condition in operation is indicated by LED. Error is alerted by LED load meter and sound when overloading.

Rotation Direction Switch

Rotation direction (FWD. or REV.) can be changed easily by pressing button.

POWER PACK

C2013 (100V) **C2113 (115V)**
C2213 (230V)

Compatible with Former Series Handpiece

The Ver.3 power pack can be used with motors and handpieces in former series as well except Polytor ultrasonic handpiece.

- MINITOR V Series [1987~1992]
- Minimo 7 Series [1992~1997]
- Minimo One Series [1997~2013]
- Minimo One Series Ver. 2 [2013~]

Model	C2013	C2113	C2213
Input Voltage	AC100V±5% (50/60Hz)	AC115V±5% (50/60Hz)	AC230V±5% (50/60Hz)
Rated Input	60VA		
Output Voltage	D.C. 1~30V		
Weight	2.5kg		

This Ver.3 power pack can be used with all 30V handpieces by Minitor.

Accessories

- AC Power Cord 1 (CA10, CA11 or CA12)
- Rubber Cradle 1 (RM11)
- Fuse 1 (C2013, C2113: PFU-2.0A / C2213: PFU-1.0A)

POINT 01 Digital Display with High-Luminance LED

Improved visibility by high-luminance white LED.
Indicating rotation speed (x 1000min), output level (LEVEL %) and error code.

POINT 02 External I/O signal control function as standard feature

The following signals are input / output through foot switch socket on back side of power pack.

- Outputting error signal
- Setting rotation direction
- Setting rotation speed
- Selecting DC motor connection terminal in use
- Turning motor on / off

※For using this function, a remote control plug (RPG-8P) is required.

Plug for remote controlling

RPG-8P DIN 8-PIN Plug

A plug for controlling handpiece via external I/O signals.

Accessories

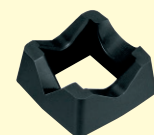

AC Power Cord for Power Pack (length: 2m)

- CA10** Input Voltage : 100V
- CA11** Input Voltage : 115V
- CA12** Input Voltage : 230V

Rubber Cradle RM11

Handpiece stand made of rubber
Dimensions : 72 (W) × 72 (D) × 30 (H) mm

Fuse

- PFU-2.0A** C2013 / C2113 (100V / 115V)
- PFU-1.0A** C2213 (230V)

Optional Accessories

Foot Switch

VC302 (Variable type)

Rotation speed can be controlled by tread adjustment.
• Controllable range: 0 (stop)~MAX

FC202 (ON/OFF type)

Switch is ON while stepping on.

Straight Cord 1.5m

CC7113-ST
Cord connecting DC motor connection terminal of power pack and KX313.

Extension Cord (Length: 2m)

CB2113 ※Coming soon

Straight extension cord for connecting DC motor connection terminal of power pack and straight cord (CC7113-ST)

MOTOR

Torque type motor **KX313**

Maximum Torque	10.0cN·m
Speed Range	1000~10,000rpm
Weight	330g ※Without cord

POINT 03

HIGH POWER Maximum torque 10.0cN·m

The highest power motor ever from Minimo motor lineup. Suitable for deburring and polishing needed torque.

POINT 04

MAX SPEED 10,000rpm

The maximum rotation speed 10,000 rpm, although high torque.
Enable to use with wide range of Sentan Tools requiring high rotation speed such as carbide cutter.

HEAD

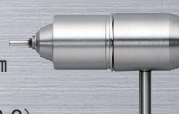

Clamp Head for Mounting on Machine

Head parts for mounting handpiece on machines such as automatic machine, etc. Sentan Tool can be exchanged while mounting on. (MX52/MX53)

MX52

Maximum shank diameter $\phi 3.175$ mm
※Collet chuck sold separately

Mounted collet chuck KP-032 ($\phi 3.0$)

MX53

Maximum shank diameter $\phi 6.35$ mm
※Collet chuck sold separately

Mounted collet chuck KP-060 ($\phi 6.0$)

FX91

Maximum shank diameter $\phi 6.35$ mm
※Collet chuck sold separately

Mounted collet chuck KP-126 ($\phi 6.0$)

Scan this for more information

Adopting locknut chucking mechanism and reinforcing gripping power of collet chuck.

1/4 Reduction Ratio Gear Joint

Max. allowable rotation speed 30,000rpm

MG03

Joint having wide application range with built-in 1/4 reduction ratio gear can be used with all heads except H051 and all motors with max. rotation speed 30,000 rpm or less.

Clamp Joint

Max. allowable rotation speed 35,000rpm

ET51

Compatible with all types of head and motors with max. rotation speed 35,000 rpm or less and can help to clamp Rotary, ANGLON, RUBRON, etc.

Clamp Mount

DM02

Clamp mount is used to fix clamp head, gear joint and clamp joint to tool rest of machine such as lathe, etc. Clamped part of clamp mount and shaft of mounted head are in parallel.
