PORTABLE STEEL CHEVAL DE FRISE

263-CDF

The **Steel Cheval de Frise** is a security barrier designed to provide reliable protection in sensitive environments, such as roadblocks, checkpoints and high-security areas. Made of high-quality steel, it is ideal for stopping small and medium-sized vehicles, providing robust and immediate protection.

Key features:

- **High-strength material:**
  Made of steel, the cheval de frise withstands severe impacts and demanding operating conditions, offering greater durability than lighter materials such as aluminium.

- **Modular design:**
  The structure can be easily dismantled and transported and features a quick assembly system. This makes it ideal for temporary operations or emergency situations requiring a portable barrier.

- **Versatility:**
  Ideal for security operations, the cheval de frise can be used in various settings, including roadblocks and public events, thanks to its adaptability to different situations.

- **Weight:**
  Weighing just 33 kg, it can be carried by one or two people, minimising transport and logistical requirements.

- **Easy to extend:**
  The modules can be connected to form a wide, continuous protective barrier, offering increased security in demanding scenarios.

Main applications:

- **Access control**
- **Security at events and public gatherings**
- **Protection in temporary and emergency situations**

The **Steel Cheval de Frise** is the ideal solution for those seeking a robust, easy-to-assemble barrier capable of responding quickly to security requirements in dynamic, high-risk environments.
