# Size Mia Dog Muzzle

FOR TRADE

## Ethical Basket Design

This is a basket muzzle created with welfare at the forefront, ensuring your dog can pant, drink, and take treats comfortably when fitted correct

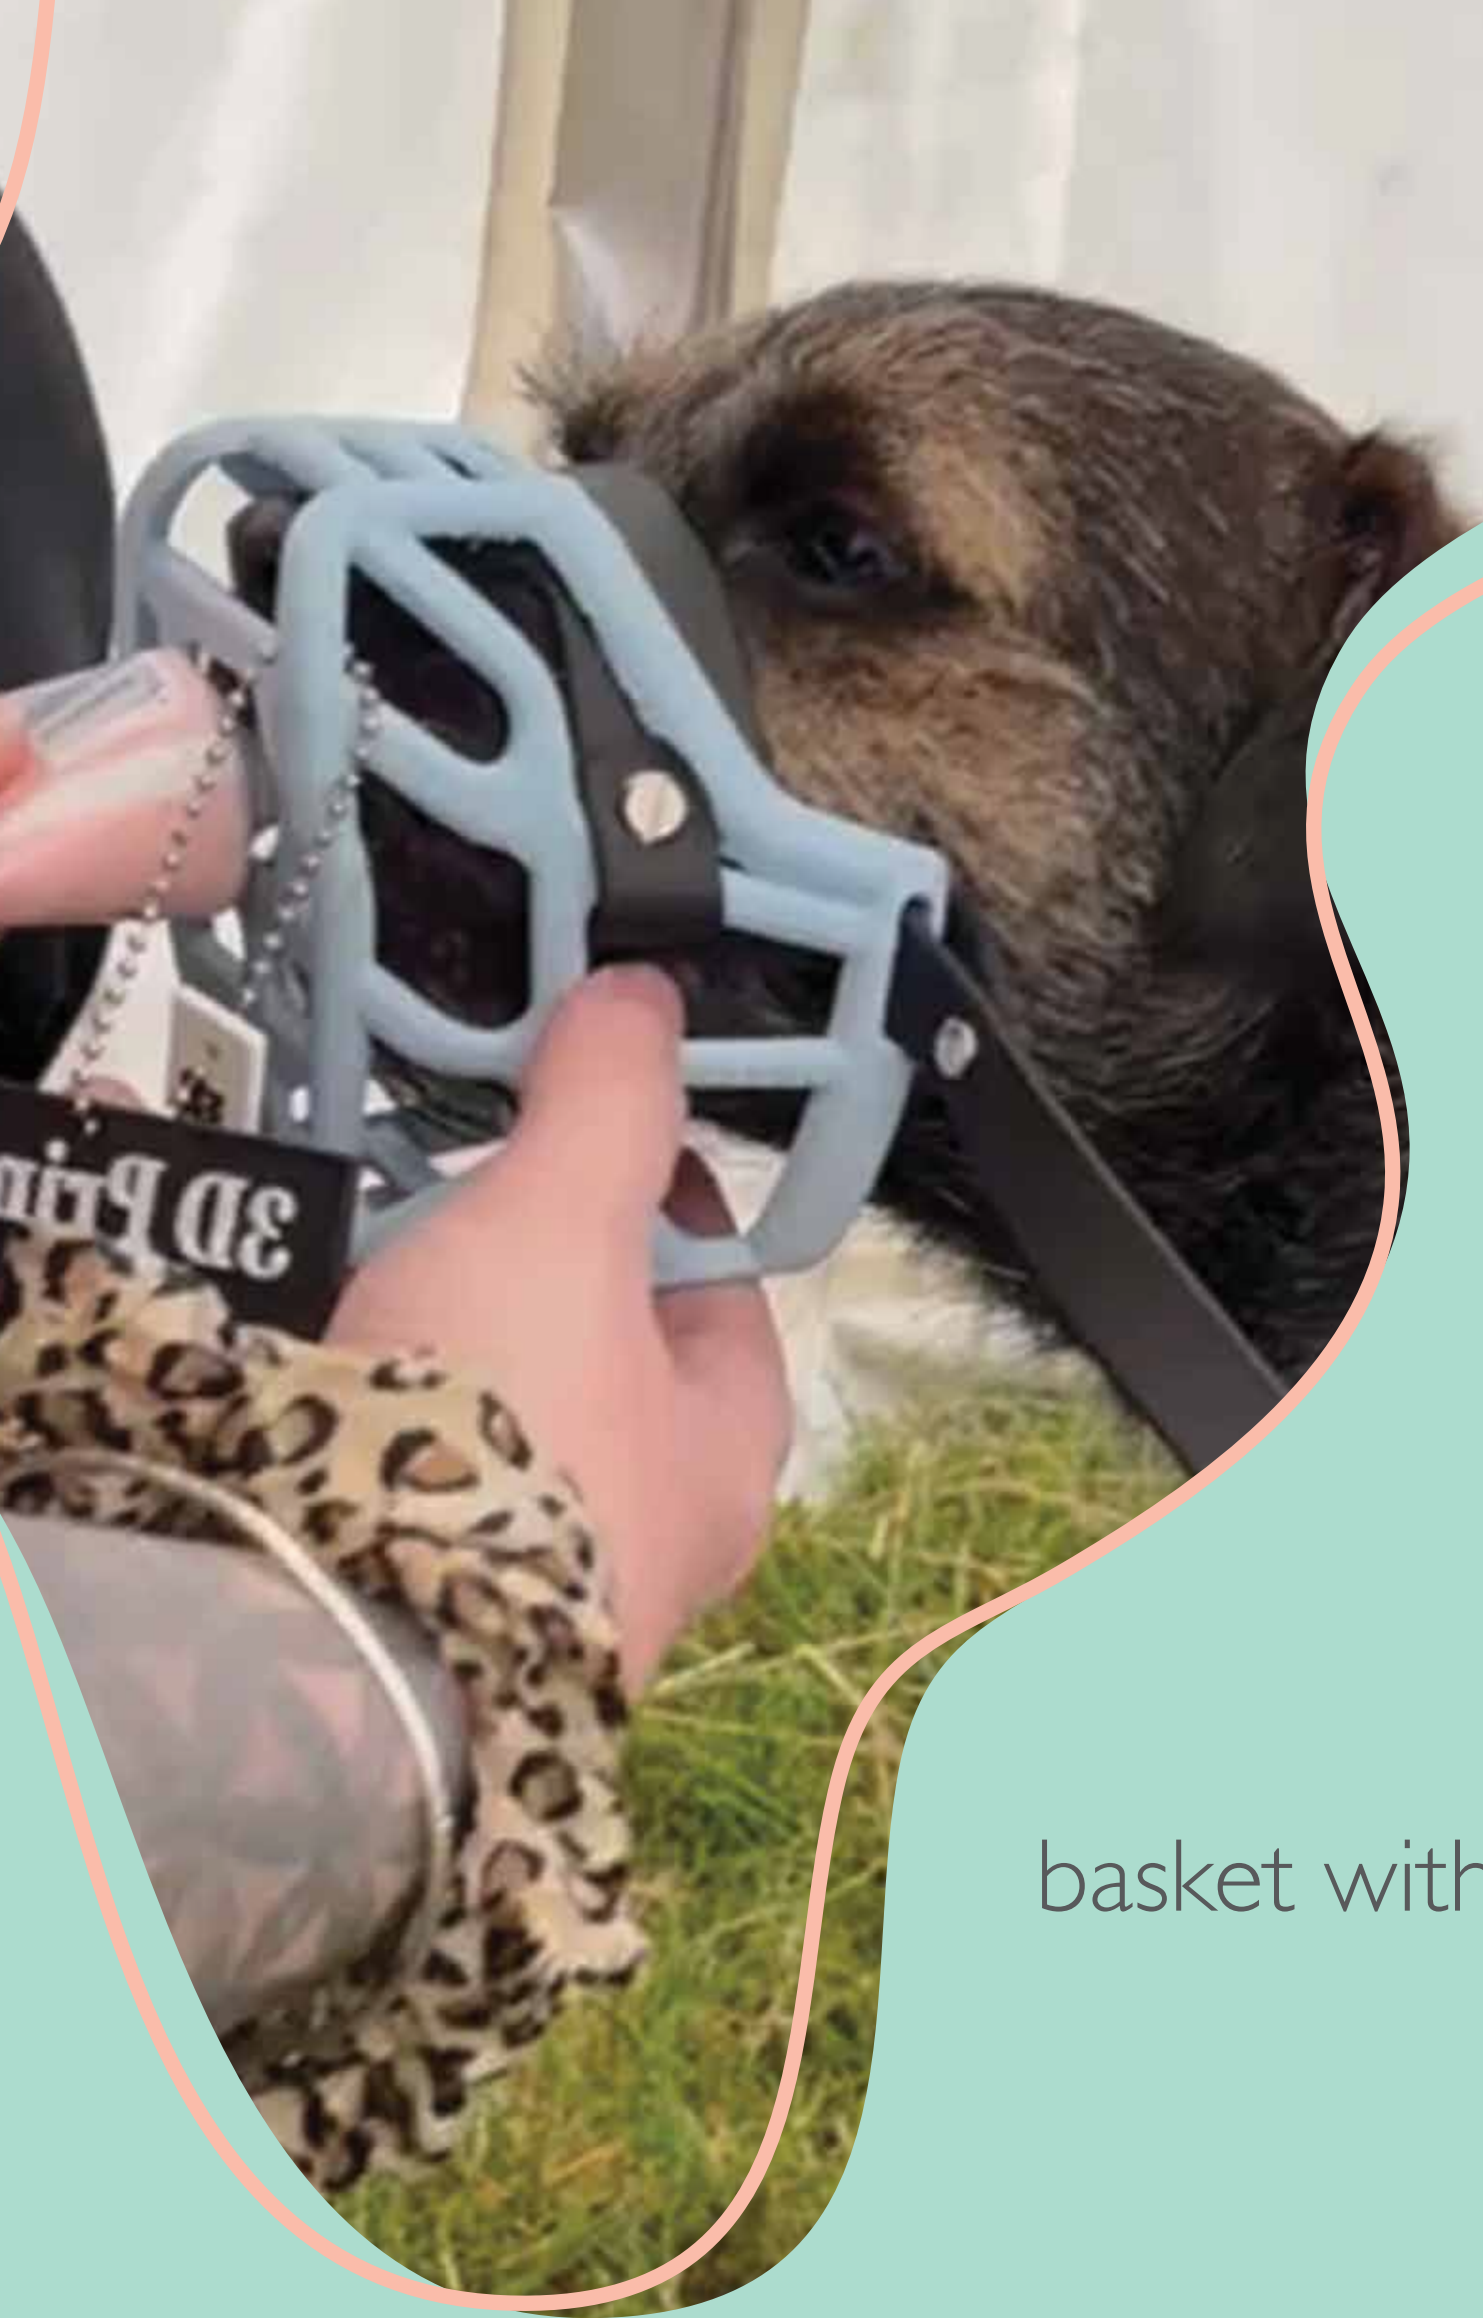

A photograph of a dog with long, wavy, light brown fur wearing a pink, lattice-like muzzle. The dog is sitting on a dark brown leather couch. A person's hand, wearing a colorful floral patterned sleeve, is holding a brown, textured treat (possibly a biscuit) near the dog's mouth. The background is a blurred outdoor setting with green foliage and a black metal fence. The entire image is set against a solid orange background with white text and decorative white outlines.

**Size Mia** is the smallest dog muzzle in our **Short & Wide Fit** collection, designed for comfort, security, & functional movement.

We do not recommend sizing based solely on breed due to the variability within each breed. However, to provide a general idea, the Mia size commonly fits the following breeds (note: this is not an exhaustive list):

Pug crosses  
American Cocker Spaniel  
Pomeranian  
Bolognese Terrier  
Cavachon  
Small crossbreeds  
with short snouts and wide cheeks

<b>Mia*</b>	2in - 2.5in	max. 4in	3in - 3.5in

# Why Choose the Size Mia Dog Muzzle?

## **Smallest Muzzle in Our Current Range**

Smaller breeds are often underrepresented in the muzzle market, making it difficult to find options that fit well without compromising comfort, pant space, or safety. The Mia was developed specifically to address this gap, offering a considered solution for small dogs who still require a properly engineered, functional muzzle.

## **Crafted for Short Snouts & Wide Cheeks**

Engineered specifically for small breeds with short noses and broader cheek structures, ensuring security and comfort.

## **Smooth Comfort Touchpoints**

Finished with smooth cheek edges and internal edges to help minimize discomfort.

## **Vision-Friendly Head Strap Design**

A flat head strap fastening minimizes visual obstruction, enhancing comfort and spatial awareness.

Reducing visual interference can help support confidence, lower stress responses, and avoid reinforcing behaviours commonly labelled as “yappy” or “small dog syndrome.”

## **Freedom to Move Naturally**

The pant space is engineered to support effective panting without compromising head or neck movement.

# Why our Muzzles are Different

We design muzzles that allow dogs to:

**Pant**  
**Drink**  
**Take treats**  
**Move comfortably**

Because a muzzle should provide safety and comfort, not punishment.
