- [27] First Aid Compartment (Contents not included)
- [28] PFC/PFAS-free DWR finish
- [29] Modular mounting system on the front
- [30] Molle system on the sides and on one hip fin

Individually configurable trekking backpack made from robust CORDURA® material. The Yukon 70+10 BC complements Tatonkas Bushcraft collection with a large-volume trekking backpack whose high-performance V2 carrying system is optimized for a weight of up to 25 kilograms. The modular, Molle-compatible fastening system on the front and the Molle system on the sides and on one hip fin allow the addition of extra pouches or other equipment from the Bushcraft range from Tatonka. The lid of the backpack can be removed and attached to the shoulder straps as a front pocket or used separately as a shoulder bag. The extensive equipment also includes a hydration system preparation and an olive-colored rain cover. The Yukon 70+10 BC has a PFC/PFAS-free DWR finish.
