SOLUTIONS FOR HVAC&R SYSTEMS

HCFC - HFC - HFO -HC, R744 and others with low GWP

OIL SEPARATORS FOR REFRIGERATED VEHICLES

HERMETIC OIL SEPARATORS

ACCESSIBLE OIL SEPARATORS

HERMETIC OIL SEPARATORS WITH OIL RECEIVER

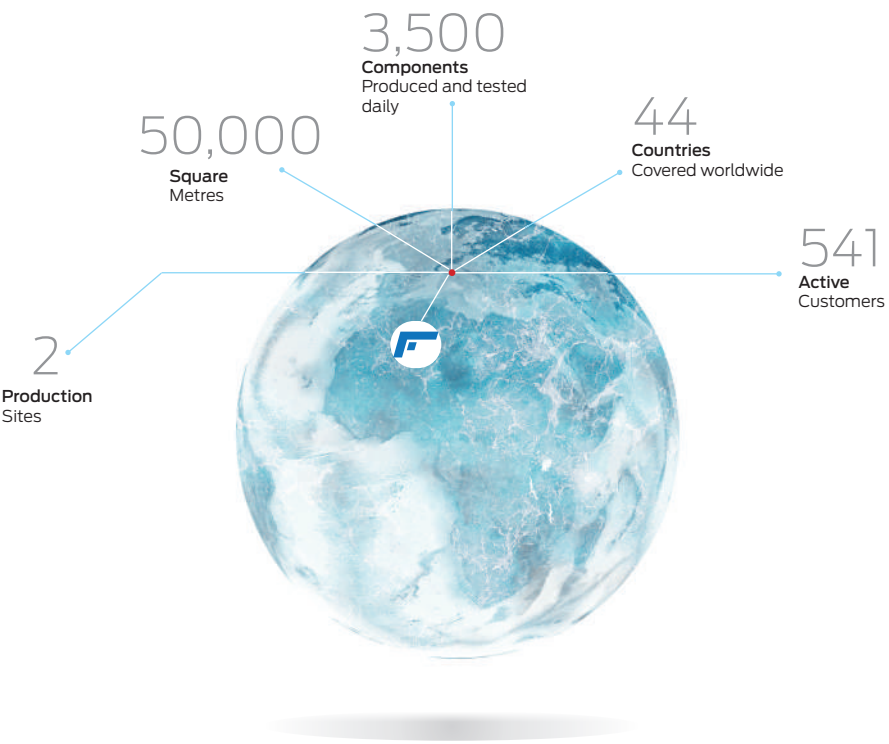

OIL RECEIVERS

Located in northern Italy, we have been manufacturing key components for refrigeration and air-conditioning systems for over 50 years. Aware of the challenges faced by its customers who need to keep up with new rules and regulations, we have consolidated our knowledge of the latest European directives regarding new refrigerant gases and safety regulations.

Our headquarters is located in San Pietro di Legnago, just 30 minutes from Verona. Here we manufacture products in a **14,000 sqm facility** with office buildings for management, sales, administration and **R&D departments**.

Frigomec at a glance

We also supply **special products** on request and a **complete range of CO₂** components. Not only products conceived for the **future of refrigeration**, but a skilled **team of engineers** who follow and support you with **projects carried out in co-design**.

OUR PRODUCT RANGE:

- LIQUID RECEIVERS
- SUCTION ACCUMULATORS
- OIL SEPARATORS
- HEAT EXCHANGERS

- COLLECTORS
- MUFFLERS
- FILTERS
- VALVES AND ADAPTERS
- SPARES AND ACCESSORIES.

Our products cover an extensive range of operating pressures, with tailored solutions available for a majority of items. We also supply special products on request and a complete range of **CO₂** components, designed in close collaboration and exclusively with customers specialising in this technology. We implement the highest quality materials in a strict process, with several documented testing phases to guarantee the total safety of every product that leaves the factory.

We also supply special products on request and a complete range of CO₂ components up to max 200 bar. Not only products conceived for the future of refrigeration, but a skilled team of engineers who follow and support you with projects carried out in co-design.
