

Mini Hand Feeding

- Mini hand feeding is a formula designed to constitute 100 % of the parrot's diet from the moment pin feathers begin to emerge until weaning.
- Mix with lukewarm water (98-102 °F) at a concentration of 20-25 % (similar texture of a shaken yogurt or smoothie).
- Average intake is around 7-10 ml per 100 g of body weight and feeding bout.
- Recommended bird species:
cockatiels, sun conures, and Galah cockatoos
