

Press release – Fachpack 2024

wi-sales brings revolutionary large load carriers: safe, sustainable and always one step ahead
07.08.2024

Wi-Sales GmbH is a leading manufacturer of high-quality and innovative transport and storage containers. The company specialises in foldable and reusable containers which are used in many industries, from the automotive industry and retail to agriculture and mechanical engineering.

As a "revolution" in the large load carriers sector, wi-sales GmbH presents the new ThorPak Quattro. The Quattro is a foldable container that is suitable for transporting all kinds of goods. Due to its convenience, it offers a cost-efficient and safe solution for companies.

Another highlight is its innovative concept. With a unique Poka Yoke system, it is possible to operate the containers with only one person. The Quattro offers a larger inner volume compared to return collar variants and makes it possible to use different inserts. Textile, foam and plastic compartments can be distributed on 2 or more levels. The container is available in sizes up to 4 metres long. The height of the storage space can be individually adjusted and both the inserts and the sleeve connected to the container base can be completely stowed in the folded container.

The Quattro is stackable and can be 100% recycled after many years of use.

Another innovation from wi-sales is ThorPak Batterie, a foldable container specially designed for the storage and transport of lithium-ion batteries for electric vehicles. This container is UN certified as a reusable container for road, rail and sea transport of prototype and series batteries.

In addition, ThorPak Batterie is characterised by its simple and quick handling. The reusable inner packaging and fastening system allow batteries to be packed and unpacked safely and quickly in the container. ThorPak Batterie complies with LP 903, 904 and 905 regulations and its recyclable design ensures an environmentally friendly solution.

With ThorPak Battery, companies can make their operations more reliable and safer, while doing their bit for the environment.

Wi-sales GmbH attaches great importance to quality, safety and sustainability. By using high-quality materials and adhering to industry standards, the durability and reliability of the products is guaranteed. ThorPak Quattro and ThorPak Batterie once again demonstrate the company's innovative strength and commitment to providing its customers with the best possible solution for the storage and transport of goods of all kinds as well as batteries.

With a reputation for reliability, product longevity, customer service and speed of delivery, the company keeps its finger on the pulse of developments and is constantly working to expand its offering to meet the needs of its customers.
