

DAKOTA[®]
INNOVATIVE
BUILDING SOLUTIONS

WE ARE DAKOTA

OVER
40 YEARS
OF
SUCCESS

Dakota Group is a family owned company established in the early Eighties as a company dedicated to the production of plastic materials for the building industry.

1990 is the year of the first transformation, with the direct sale of its products to the dealers. Dakota set up its own commercial network, first in the area of Nord East of Italy, and then all over the Country. As a natural consequence to the increasingly capillary presence of its network, Dakota expanded its offices and increased its own logistics through the purchase of a new warehouse.

Starting from 1999, Dakota also opened subsidiaries in **Romania** (with a production Company specialized in wooden products), **Spain and Portugal**.

The years from 2000 to 2011 marked the consolidation of the international expansion of the Company, with the increasement of direct export with a specific department and the growth of the sales representatives in foreign markets.

In 2010 it was created, also, the internal **R&D Department** and a own Company for the production of the molds, giving to Dakota a complete control on the entire production process (from the idea to the shipment).

CONSTANT GROWTH.

In 2016, it was opened the Dakota Stadium, the new centralized and automated logistics platform with over 30.000 sqm of total surface (14,000 sqm of covered area).

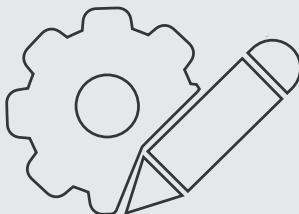

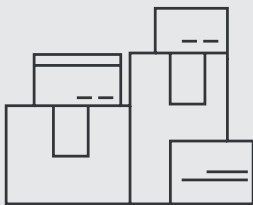

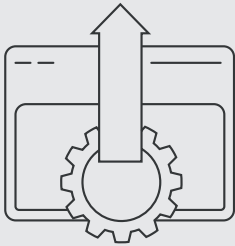

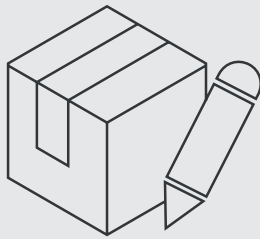

In 2017 the **Production Plant 2** for plastic products was inaugurated and, at the beginning of 2018, begun the expansion of the Production Plant 1, opened in mid 2019, now operating on a covered area of **7,500 square meters**, with a new fleet of plastic injection molding machines. In 2021 was finished the building of the **Dakota Vertical Stadium**, the new fully automated logistic platform which, together with the Dakota Stadium, allows to double the storage and handling capacity.

Dakota is a Company in constant expansion, with over **3.000 Made in Italy** products, always in constant evolution.

Because for Dakota...

#innovationisevolution

WHAT WE DO

TOOLS & SERVICES

TOOLS

> Custom packaging

Development and implementation of custom products and/or custom packaging (colors, labels, packaging, pallets, exc..)

> Web tools and app

We provide for specific categories of products web tools and app (calculators of pieces/quantities configurators even on custom brand and web url)

SERVICES

> Stock availability

Thanks to our automatized logistic platforms, we can guarantee stock availability on own and custom products.

> Barcode and customization

Our platform can manage custom barcodes and custom logistic solutions.

CONSTRUCTION SYSTEMS & SOLUTION

All Dakota products divided in specialized catalogues. Six divisions, more than four thousand innovative products dedicated to construction, fast deliveries, and over forty years of experience: this is how we cater to your needs.

DRAIN

Wide range of high quality products that are crucial for the removal, collection, drainage, conveyance and process of used water both for domestic and the industrial environments.

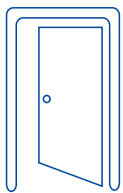

ROOF

Large selection of products conceived to answer all types of needs in regards to the isolation, protection, and flow of rainwater from the roof.

OUTDOOR

Products for outdoor flooring, including our acclaimed Arkimede pedestal system for decks and raised flooring, as well as ventilation grilles, roof draining outlets, and landscaping products.

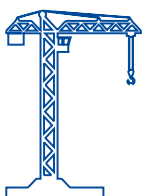

INDOOR

We provide high quality door frames, tile levelers and spacers, as well as a robust range of glass blocks and their relevant frames. We also provide an extensive range of floor trims, drip edge profiles, wooden shelving units, and folding stairs for attics or lofts.

BUILDING

We offer a complete selection of insulation and plasterboard products such as fiberglass meshes, inspection hatches, fixing systems, profiles, anchors.

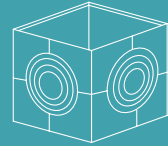

EQUIPMENT

Provides all sorts of safety and signage needs on construction sites, as well as other visual aids for the prevention from accidents actions that are mandatory in most worksites.

DRAIN

Channels and catch pits

Siphoned gullies trap

ROOF

Roof and attic
