PARABOND 900 RAPID POWER.

NEW GENERATION CONSTRUCTION ADHESIVE: INCREDIBLY STRONG, SUPER-FAST

Looking for best-in-class performance? Our new hybrid polymer adhesive gets the toughest jobs done lightning-fast. This unique formula produces an **initial tack** of 500 kg/m², which means it can be used to safely glue **very heavy loads** without support. **A tight bond in barely 20 minutes!** This super-fast bonding saves you a lot of time. Get started at www.dl-chem.com.

- HIGH ELASTICITY
- ADHERES TO VIRTUALLY ANY SUBSTRATE
- INDOOR AND OUTDOOR APPLICATIONS
- NON-STAINING ON NATURAL STONE
- CAN BE PAINTED OVER WITH WATER-BASED PAINT

Scan the QR code to view applications and tech specs. Super-fast. Super-strong.

CHECK OUT OUR OTHER HIGH TACK SOLUTIONS

The DL Chemicals range includes two more high-performance construction adhesives alongside Parabond 900 Rapid Power. Both have been specially developed for specific applications that demand strength and high initial tack.

PARABOND CRYSTAL HIGH TACK

This transparent adhesive with high initial tack is ideal for glass and other conspicuous applications that demand invisibility.

PARACOL WB HIGH TACK

Water-based and easy to use adhesive with very high initial tack. The ideal alternative for indoor applications and porous substrates.
