and find the right solution
for you and your loved ones

WHO ARE WE?

VISION & COMMITMENTS

Preserving the quality of life of babies, women and all people living with bladder weakness, by constantly seeking discreet and innovative solutions.

To place the challenges of social and environmental responsibility and sustainable development at the heart of our development model.

To innovate sustainably in favour of nature and the wellbeing of all, with safe products that respect our planet.

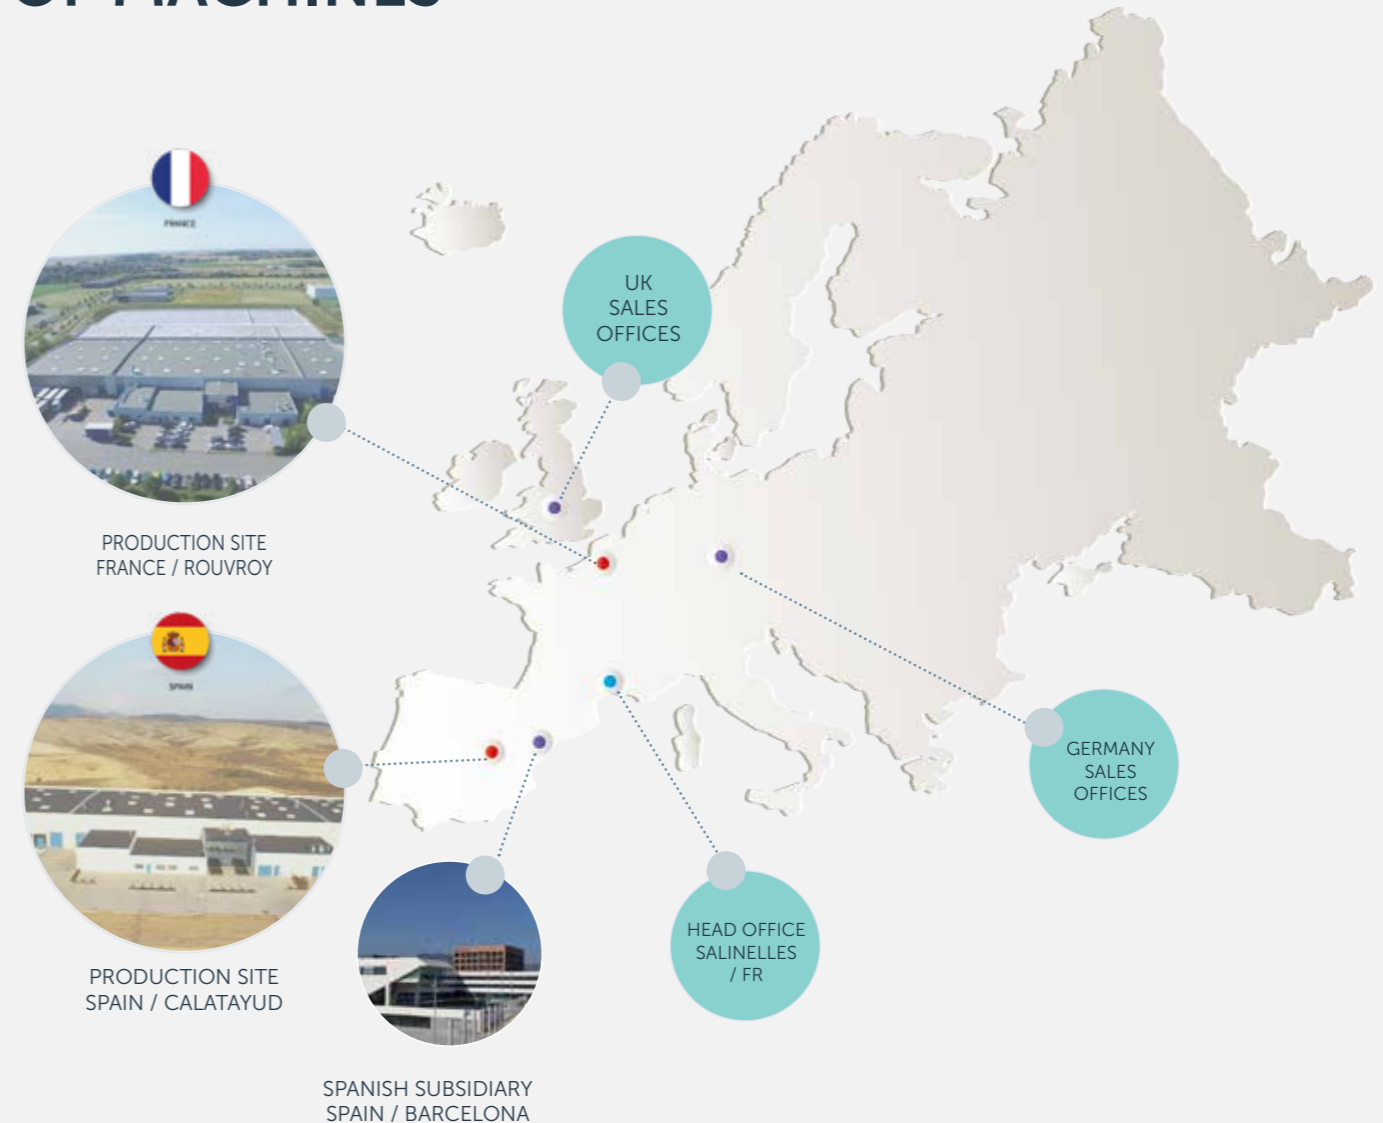

To make a range of products inspired by health professionals accessible to all.

To design and manufacture adult hygiene, a complete range of private label products, in line with current expectations.

OUR CUSTOMERS

- 1,700 health centres
- 400 specialised outlets
- 3,000 pharmacies
- 30 private private labels
- 34 trading countries

EUROPE'S MOST MODERN FLEET OF MACHINES

TRUE TO OUR VALUES,
WE ACT FOR A BETTER
ENVIRONMENT!

SUSTAINABLE DEVELOPMENT

In a world constantly confronted with environmental challenges, everyone needs to assume responsibility for their actions. Protecting the planet cannot just be a simple declaration of intention: it is now an ethical priority.

We have placed the challenges of social and environmental responsibility (SER) and sustainable development at the heart of our development model since the company's inception.

Commitment to the certification "Environmental management system": amongst all of amd's voluntary initiatives, obtaining ISO 14001 certification is one of the most significant in terms of environmental protection and sustainable development.

Moreover and without compromise, our suppliers are carefully selected on the basis of their proven commitment towards modern day social and environmental challenges.

amd GREEN MANUFACTURING

Our ultra-modern production sites have been built according to high environmental quality standard, which favours the use of resources and materials to preserve the environment.

We don't use fossil fuels, our factories are electrically heated, transferring energy to heat, thus significantly limiting carbon dioxide emissions.

WE APPLY THE 3RS RULE "REDUCE, REUSE, RECYCLE"

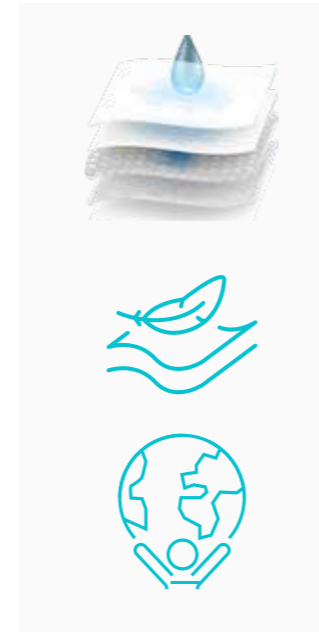

First of all, **we reduce** the amount of packaging used for our products. Our cost-saving solution allows us to offer you more products with less packaging. We adopt a fair and sustainable purchasing strategy with all our suppliers. Our company is equipped with "zero waste" production lines. We also reduce our energy consumption by using solar panels in Spain and are investing in this approach in France.

In terms of **reuse**, we are committed to increasing our use of renewable raw materials in the composition of finished products. This is reflected in the use of the polyester fibre that forms the pad's acquisition layer. This fibre is produced in Europe entirely from recycled plastic bottles.

Our paper pulp is sourced from PEFC certified sustainably managed forests. We recover the energy released by the production lines to heat the workshop.

As for **recycling**, we are working to increase the amount of recycled packaging. All **AMD** products are already packaged in 100% recyclable plastic with over 30% recycled plastic and we encourage consumers to recycle. Our cardboard boxes are made from 100% recycled paper. For the waste that could not be avoided: **we recycle** it all by properly feeding the selective sorting channels.

ENVIRONMENTALLY FRIENDLY

AMD ABSORBENT PRODUCTS ARE OEKO TEX® CERTIFIED

Every day, we produce essential, safe and comfortable products for all our customers.

Providing you with a clear guarantee of safety is paramount. AMD has been awarded the new OEKO-TEX® STANDARD 100 certification.

It is the first independent label to guarantee the complete safety of textiles. This new certification shows that all components of AMD products have been screened (e.g. absorbent pad, outer layer, adhesives, etc.) to test for the presence of undesirable substances.

This means that all AMD products have been tested and certified as being safe.

OUR FRENCH PRODUCTION SITE AMD IS STEP BY OEKO-TEX® CERTIFIED SINCE MAY 2022

STeP is a certification awarded to companies with environmentally friendly processes, safe working conditions and social responsibility.

It allows us to communicate our commitment to sustainable production conditions transparently to our customers and suppliers.

ECO-RESPONSIBLE COMMITMENT

ETHICAL AND NATURAL ORGANIC SOURCING

We select our raw materials and suppliers for their quality, their ethical values and their commitment to environmental protection.

We favour the use of natural raw materials in all our products and opt for local partners.

- We do not use any of the toxic substances listed in the ANSES report
- All our raw materials are certified chlorine-free, glyphosate-free, pesticide-free and fragrance-free.

Our absorbent pads are DERMATOLOGICALLY TESTED by an independent laboratory.

COMPOSITION AND RECYCLED MATERIALS

Ultra absorbent padding:

- Pulp made from wood fibres from responsibly managed forests. ECF certified pulp «Elemental Chlorine Free Status of Pulp Products»
- A component that allows liquids to be concentrated in the core of the pad. Fragrance-free, dye-free
- SAP Super Absorbent Polymer. These are sodium polyacrylate microbeads, used for their great capacity to retain liquids (Under development Bio sourcing : Biodegradable SAP)
- Waterproof backsheet made of recycled polyethylene
- 100% recycled acquisition pad: 100% synthetic polyester fibres

BABY CARE

In the pipeline for some time with all the elements at the heart of our company to design a beautiful range of "Eco Friendly" baby nappies, the most safe and the most natural. Our diapers are entirely made in France, in our own factory that respects the environment

- Nappies that respect baby's health and are made up of a maximum of natural and organically sourced components.
- An ultra-healthy and rigorous composition,
- No toxic substance: fragrance-free, no lotion, no chlorine, no dyes
- A customisable design,
- Transparent manufacturing and fully traceable products
- 100% recyclable paper packaging.

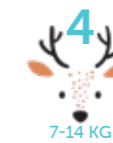

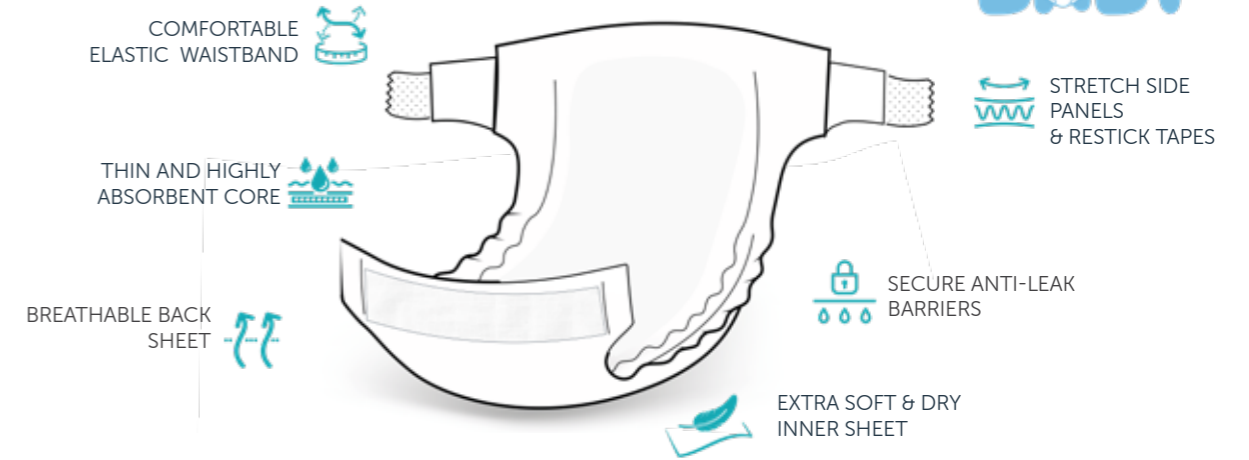

0%

MADE IN FRANCE

HEALTHY NAPPIES

The OEKO-TEX® certification is a globally uniform certification system for all raw, semi-finished and finished textile products at all stages of processing.

AMD is Chain of Custody certified according to PEFC™. The wood for our pulp, from which AMD products are made, comes from controlled sustainable forests and from PEFC™-certified suppliers. This means that the origin of the wood fibers is strictly controlled for sustainability.

FEMININE & MEN CARE

LIGHT URINARY INCONTINENCE For women & men

amd Lady

Ergonomic and extra-slim, the amd Lady range are much more effective than standard sanitary pads.

amd Lady	Normal	●●○○○	■
amd Lady	Extra	●●●○○	■

MODERATE TO HEAVY INCONTINENCE

amd Form

amd Form anatomical pads are shaped to fit the body perfectly. Built-in anti-leakage barriers for optimal security:

- Fast absorption, soft hydrophobic layer in contact with the skin for optimal protection
- Soft backsheet, easily identifiable textile feel

For optimal maintenance, we recommend that this product be used together with amd cotton fix pant, or amd fix disposable net pant.
