深圳市国云工控系统有限公司  
Shenzhen Gowin Industrial Control System Co., Ltd

# Company Introduction

Shenzhen Gowin Industrial Control System Co., Ltd established in 2014, which is a high-tech enterprise with a factory area of approximately 4500 square meters in Shenzhen City of China. We have our own brand of "GOWINPC", "GWINPC", And we specialize in industrial PCs, microcomputers, HTPCs, automotive PCs, Min-ITX motherboards, embedded industrial motherboards, firewall motherboards, and industrial control motherboards. Research and development, manufacturing, and export of a series of products including industrial control computers, industrial chassis, and industrial control computer accessories. The factory has an independent professional research and development department, based on market demand Continuously updating and developing new products.

We have a structural production workshop and an electronic production workshop with technical equipment, equipped with a complete SMT production line and a complete machine assembly line. As well as professional testing and analysis equipment, we can provide product customization services, including BIOS modification, logo customization, function customization, motherboard design, etc.

Products have been widely used in many fields such as energy, medical, education, telecommunications, multimedia, network security, transportation, finance, electric power, environmental protection, automation equipment, etc.

Our advantages include good quality, competitive prices, timely delivery, and professional technical support! What's more, we have our own motherboards production lines, products quality, delivery time, technology supports are totally control by ourselves! So we are your good partner! Welcome to OEM&ODM! Welcome to your consultation and cooperation!

## 4 Lines

4 production lines

## 19 years

The company was founded 19 years ago.

## 4500

The workshop area reaches 4500 square meters

## 100+

The cooperative cities have reached more than 100 cities

# Product Certification

# Customized service

## X86 Industrial Control Production solution provider

- Embedded IPC
- Soft router
- MINI-PC
- Tablet IPC
- Industrial mainboard
- OPS
- NAS PC
- Industrial integrated machine

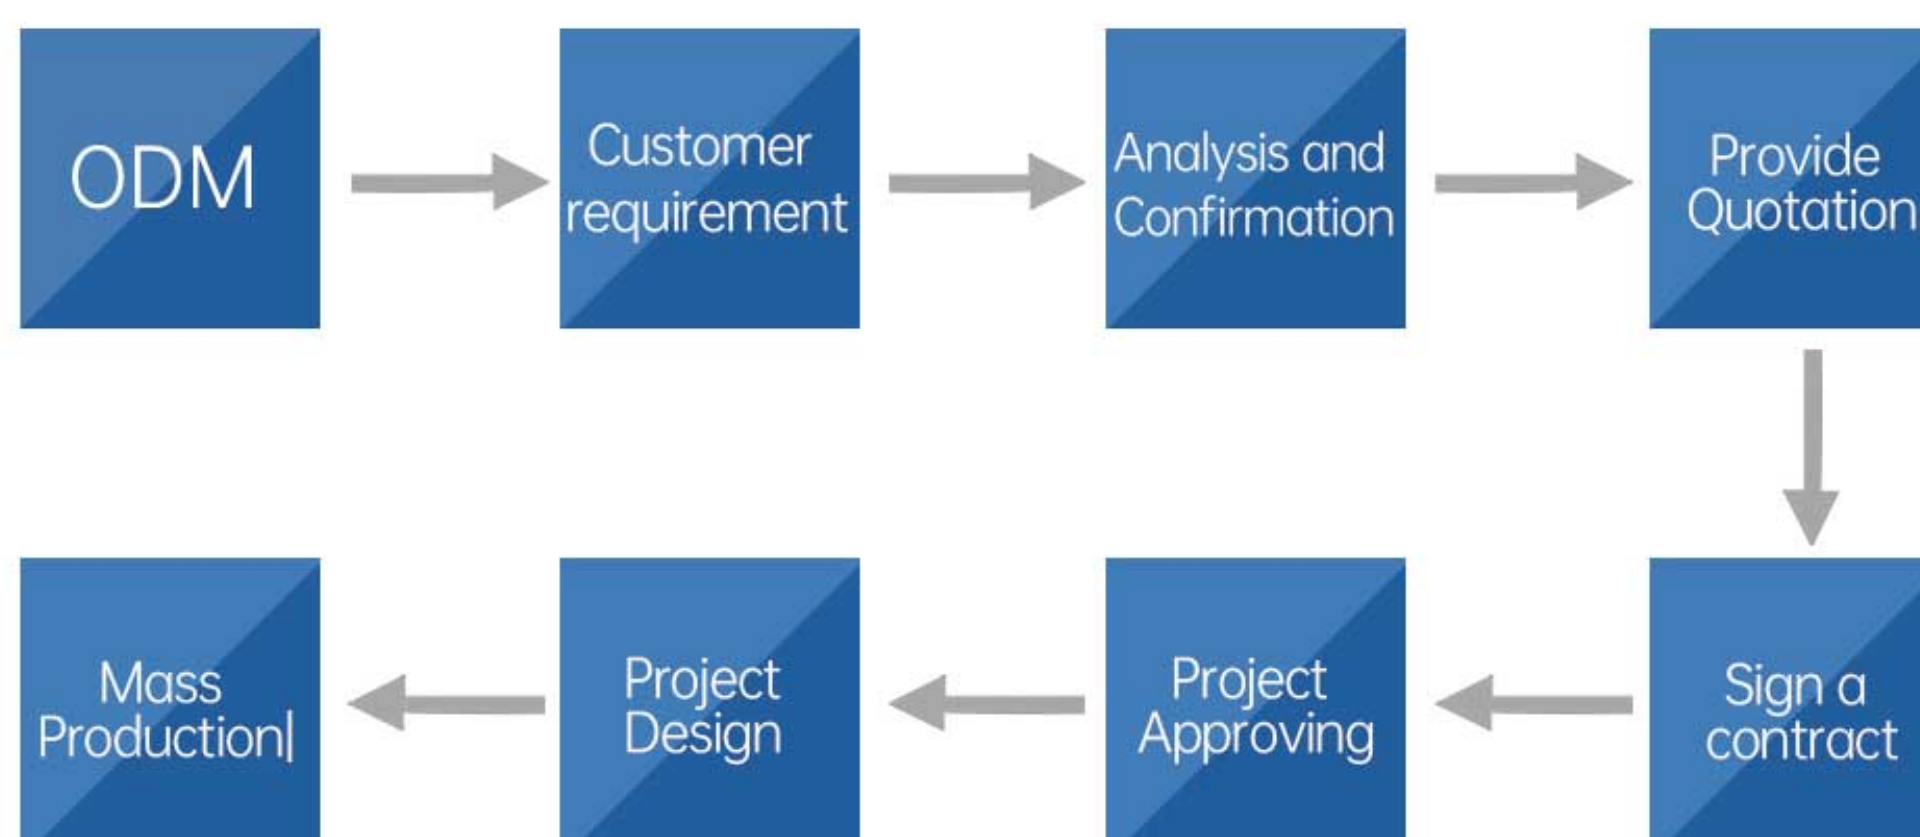

Application field: Communication equipment/Network security/Medical device/Industrial control/Electric power equipment /video monitor/AutoPC/Aeronautics and space/Outdoor advertisements/Auto-Terminal System and so on.

## Individuation and Customization Information service OEM & ODM

GOWiNPC specializes in industrial computer design and manufacturing services, and can provide customers with professional products. Personalized customization service (OEM / ODM). Including motherboard, BIOS software design, manufacturing, verification and after-sales service, so as to fully meet the requirements of customers. Our company owns the well-drilled R&D Personnel, the well experienced engineers and technicians, seasoned managing team and production worker. We have many years experience in developing and producing the Industrial Control Production and have perfect after sales service system. Our goal is to meet and satisfy your needs!

### ODM

## GOWiNPC® | 合作客户

## GOWiNPC® | 我们的优势

## Full-Chain Smart Manufacturing · Controllable Quality

R&D → Production → Sales, Integrated Full Industry Chain. Every step is strictly controlled to eliminate outsourcing fluctuations, ensuring consistent and stable quality.

## Deep Customization · Rapid Response

With an experienced R&D team overseeing operations, we support board-level deep customization.

Why choose us?

共

赢

## Cost Optimization · Stable Supply

By leveraging in-house production capacity we eliminate intermediary margins and transfer value directly to customers.

## Partnership Model · Co-Creation &amp; Shared Success

We go beyond supply to become your strategic R&D and manufacturing partner, evolving with your product iterations to achieve mutual growth

# Some cases of OEM & ODM customization

## Military grade industrial computer

Compared with ordinary industrial computer, structural secondary reinforcement is carried out. IO communication interface has made a more reliable waterproof aviation connector design. Adapt to severe operating environment.

## Industrial 4G router module

The industrial high-speed wireless router based on GPRS / CDMA / WCDMA / EVDO / LTE cellular mobile networks which provides users with high-speed wireless internet access and wireless data transmission functions. The operation of this product is simple. Plug in the SIM card and install the antenna. You can connect to the Internet with power on.

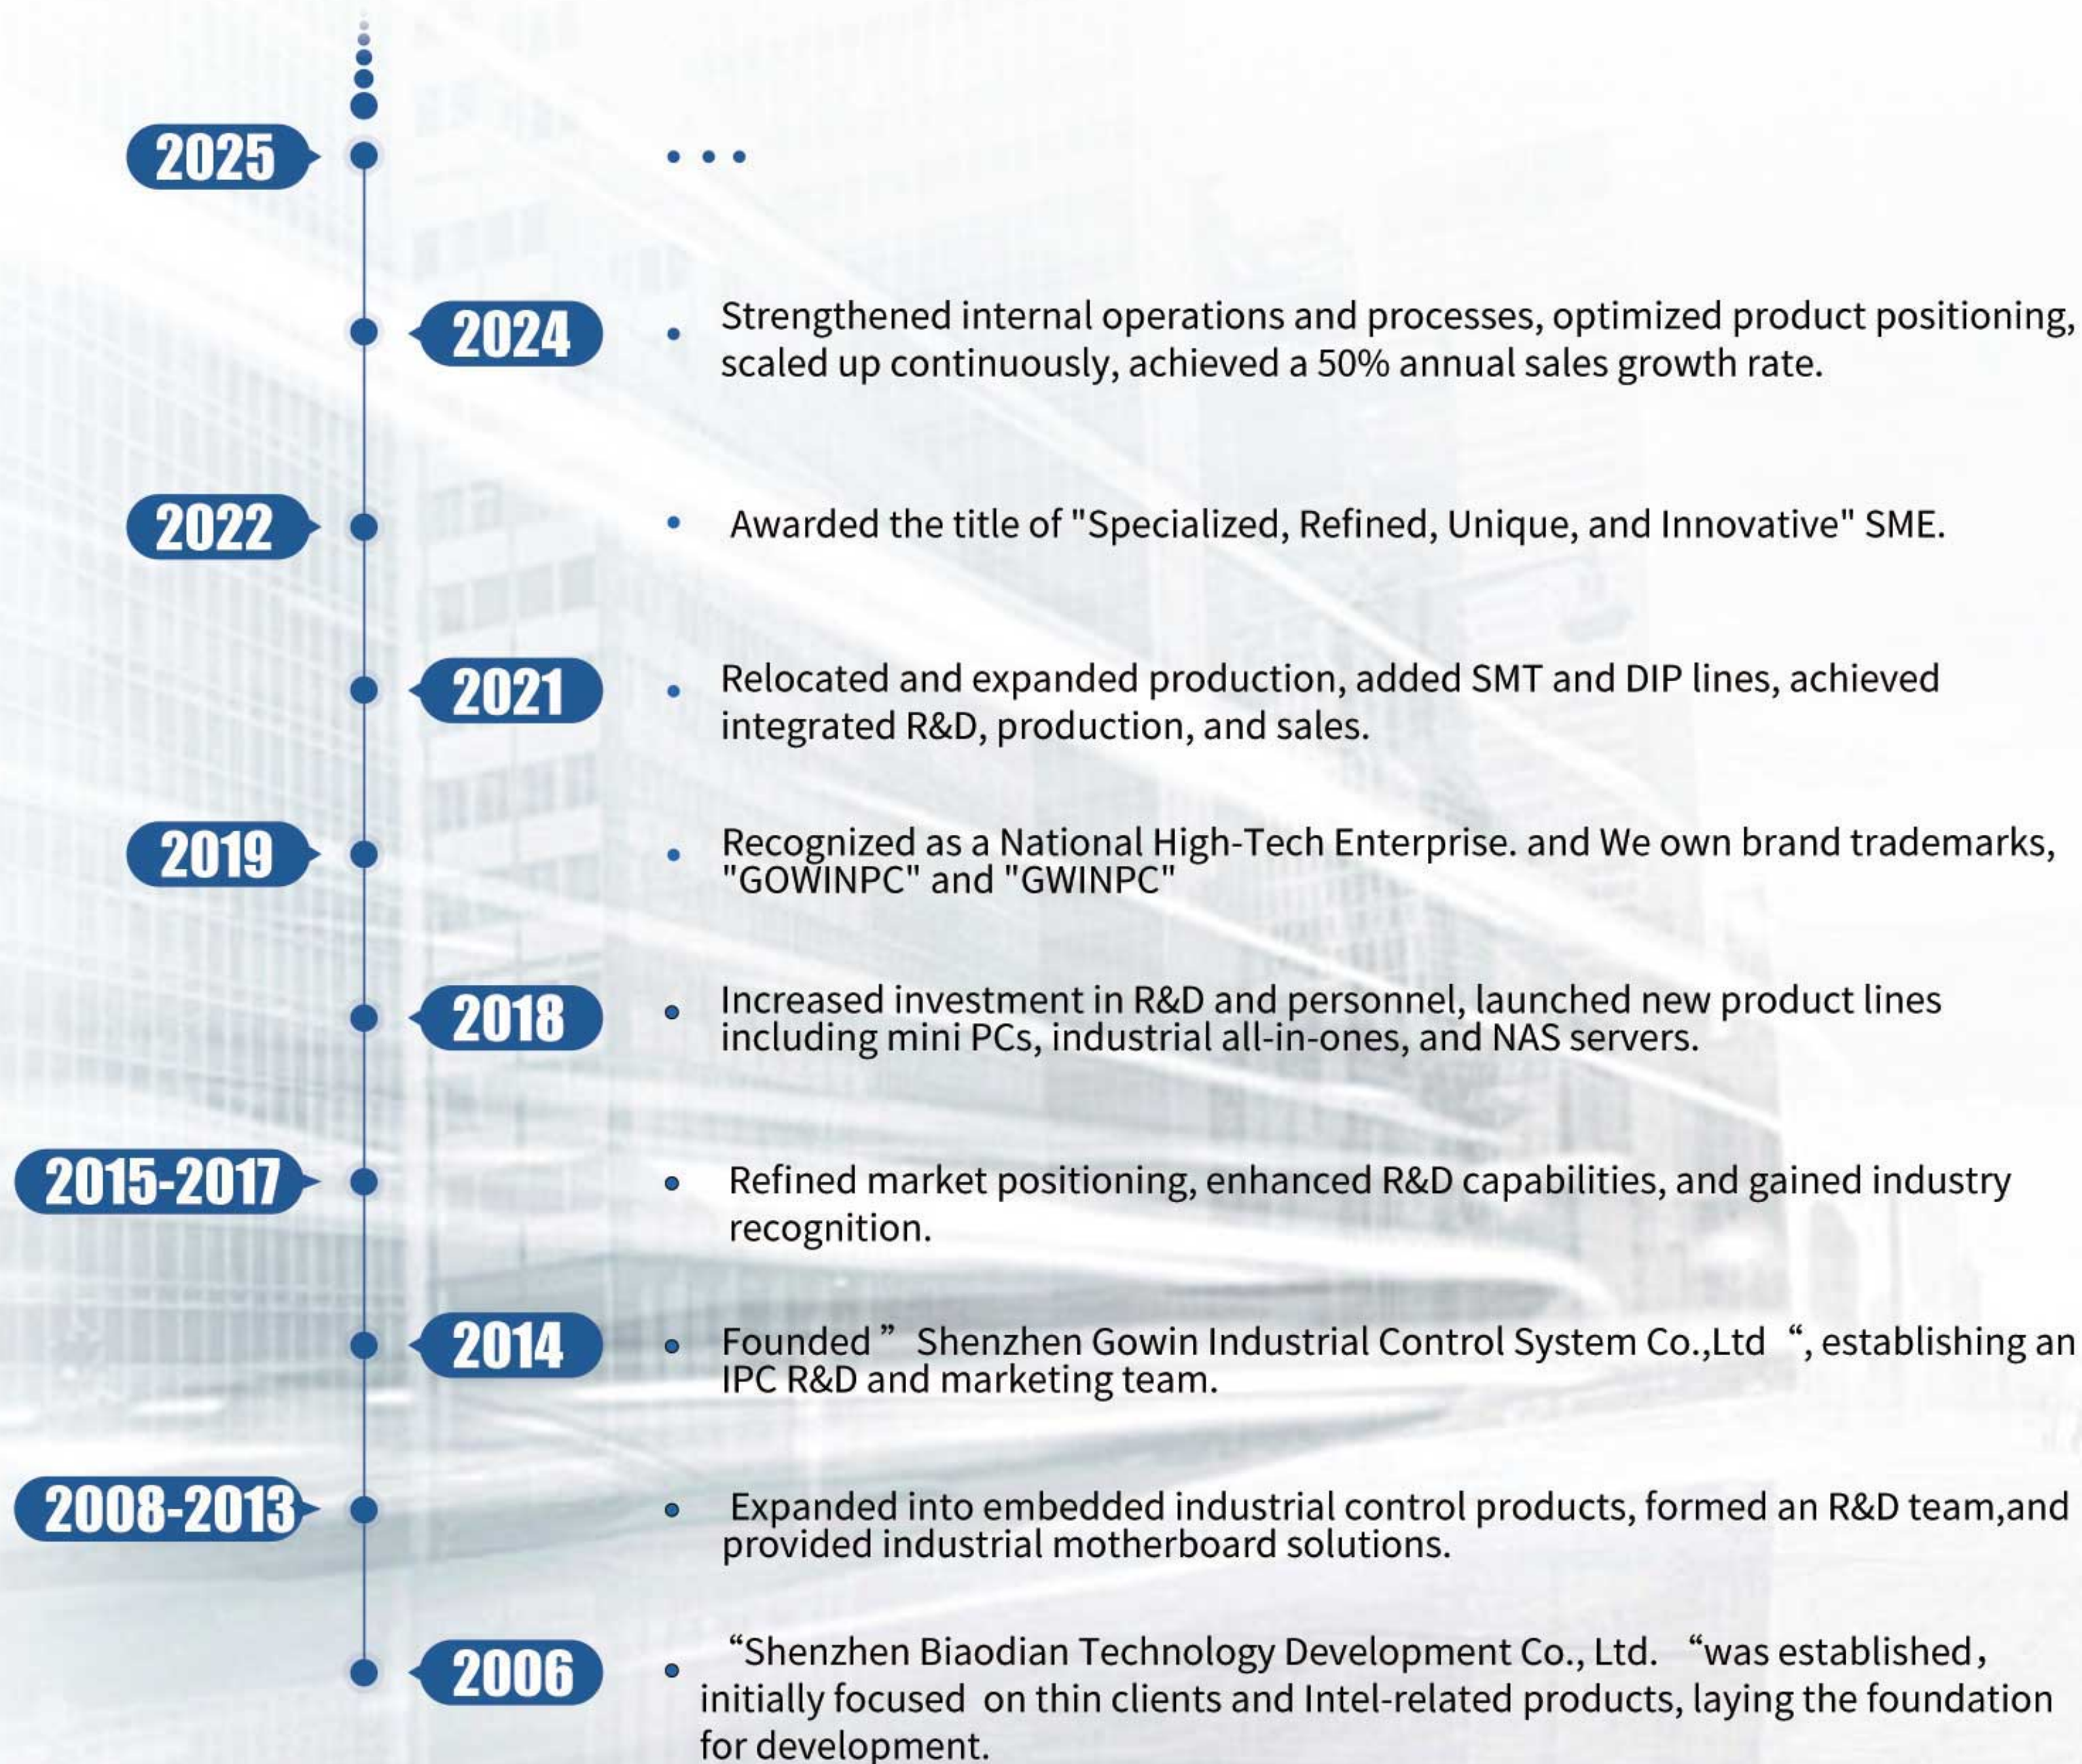

## Serial control central server

An industrial grade high-speed wireless router based on GPRS/CDMA/WCDMA/EVDO/LTE cellular mobile network, providing users with high-speed wireless internet access and wireless data transmission functions. Plug in the SIM card, install the antenna, and power on to connect to the internet, making it convenient and simple to set up without the need for complexity.
