INDIA

# THE YK STORY

A small business which started in 2010 as a result of a young graduate's passion to embark on an entrepreneurial journey and achieve success in a less ventured trade of pet products, an industry which was barely heard of in India, is now one of the leading manufacturers of pet products in India, with its production spread over two units.

As our interaction with pet parents and pets increased, we noticed the loving bond they had, and we wanted to honour this special kind of love shared between a pet and its human by creating quality and eco-friendly products that are also safe for our pets. With this vision in mind, along with our team of professional designers & highly skilled workers, a state-of-the-art manufacturing facility and 14 years of experience in the pet industry, YK Industries is able to offer the best quality pet products at the best prices.
