

Recyclable & sensory closures for flexible packaging

Easylock by Aplix® is an innovative reclosable system for flexible packaging. Designed with simplicity and functionality in mind, the hook-to-hook technology makes it easy to open, with minimal pressure needed to reclose packages. It is a 100% polyethylene recyclable closure, which addresses the consumer, retailer and CPG demands for more environmentally friendly packaging.

Key benefits

- Intuitive closure, no alignment required
- Unique sensory effect
- Secure closure
- Powder and crumb proof
- Freshness preserved
- Recyclable polyethylene

Main markets

- Dry pet food and pet treats
- Powdered products
- Dry goods: cereals, dried fruits, snacks, spices, confectionary, etc.
