

Globally represented and strong in R&D

By participating in Holz-Handwerk 2026, Italiana Ferramenta is demonstrating its position as an efficient and creative manufacturer of furniture fittings and accessories for the furniture industry and craftsmen worldwide.

At the same time, the year 2026 marks a special milestone: Italiana Ferramenta is celebrating its 30th anniversary. In a challenging market environment, the company is sending a clear signal of continuity, trust and confidence to its customers and markets.

About Italiana Ferramenta

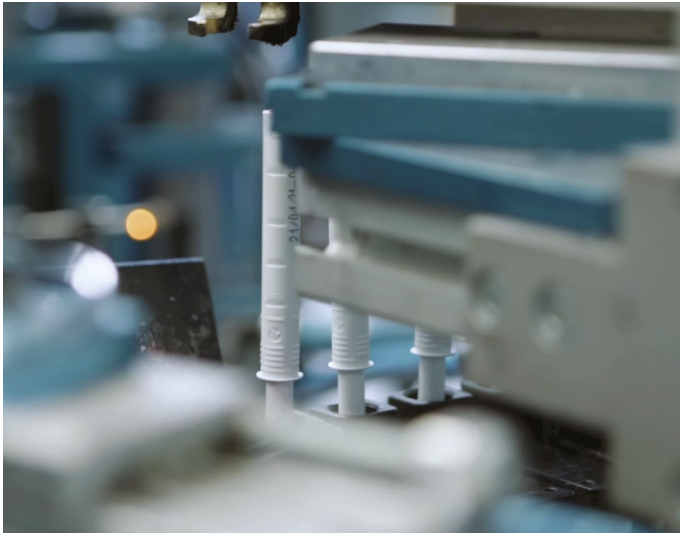

Since its foundation 30 years ago, Italiana Ferramenta has specialised in the manufacture of high-quality fittings and accessories for furniture.

Innovation and design characterise product development. The technical team invests a great deal of time in finding answers to particularly tricky and complex furniture designs and market requirements. The focus is often on solutions that help to reduce stocks of components and spare parts and ensure efficient and simple assembly.

The company also offers its customers the opportunity to use its products exclusively and is available to them as an efficient system partner.

The company is managed by Luigi Rossetto. In Germany, Italiana Ferramenta products are popular and successfully used in the furniture industry, in the contract sector and in the trade.

With the establishment of a sales office in Germany in 2023, the management is demonstrating the importance of the German market. Michael Budde and Flavio Silvestrini are available as contact persons for customers in Germany.

Innovative strength for the global furniture market

Italiana Ferramenta will be exhibiting at Holz-Handwerk in Hall 12, Stand 804

Brugnera/Nuremberg, 24 March 2026. At Holz-Handwerk 2026, Italiana Ferramenta is presenting two innovative and newly patented product lines that set new standards for modern furniture design with their innovative strength and versatility.

Strong yet minimalist: patented shelf supports

With LOOK, Italiana Ferramenta has developed a minimalist and elegant shelf support for 3 mm hole patterns that convincingly combines aesthetics and stability. When used with LOOK, modern glass and wooden shelves take on a floating appearance that enhances the entire interior design. Thanks to its simple and secure installation, the shelf support leaves nothing to be desired during assembly.

SYMETRA hanging system for integrated wall panels

DESIGNED FOR FURNITURE COMPOSITIONS

KEY FEATURES

Innovative and flexible

Freely configurable system for wall design with panels, shelves and wall cabinets.

Effortless installation

Easy attachment of components to panels/furniture and efficient, easy installation on any wall.

Seamless compatibility

Works perfectly with LIBRA cabinet hangers, making it ideal for individual panels and modular wall systems.

Symetra is patent pending.

The **Symetra One** system is suitable for single wall panels with shelves and small hanging elements with a shallow depth that are attached directly to the panel. Ideal applications include wardrobes, hanging bathroom furniture, furniture with integrated televisions and designer living room furniture sets.

The **Symetra** system is primarily intended for creating large and complex compositions that require the use of elements of a certain weight and size. The panels are fixed to the wall using system wall rails, which allow for flexible and ideal planning of complex compositions with Symetra. Thanks to the use of steel wall rails, the number of holes in the wall is reduced to a minimum.
