

Product Overview Natural Raw Materials

For high-quality food

First-class raw materials and innovative solutions

«Our raw materials are important building blocks for the success of our customers», says Reinhold von Eben-Worlée, Worlée Group shareholder.

As a supplier, producer and refiner, Worlée supplies customers all over the world with high-quality natural, chemical and cosmetic raw materials. What sets us apart is our striving for greater sustainability, our innovative strength and our creativity in developing individual product applications. Highest quality standards, comprehensive technical know-how and a good sense for trends and market developments make us a trustworthy and reliable partner for our customers.

With over 170 years of experience in the industry and strengthened by countless product innovations, we continuously optimise existing products and processes.

Our expertise lies in providing high-quality raw materials for products in the Food, Beverage, and Animal sectors. Our range includes whole and cut products that meet the highest standards.

Thanks to our many years of experience, we have developed a keen sense of which ingredients work best together. In addition to our range of raw materials, we also offer the production of custom blends as powders, granulates, or in rubbed quality to meet your specific needs.

To ensure the supply of high-quality raw materials, Worlée relies on exclusive cooperative relations with partners in the producing countries. Personal relationships with our suppliers, careful use of resources, fair working conditions, and sustainable crop rotations are essential components of our procurement projects—always with consideration for local structures and country-specific living conditions.

IN ADDITION TO OUR FOLLOWING RANGE OF RAW MATERIALS, WE ALSO OFFER CUSTOMISED BLENDS FOR

WorléeFusion

At WorléeFusion, individual raw materials, flavors, and cultures merge into unique product ideas. Sweet meets savory. Spicy encounters fruity. Familiar classics connect with global food trends.

The modular principle allows individual components to be combined flexibly and dry blends to be tailored precisely to market trends, target groups, and applications. The result is a portfolio that provides clear orientation while being closely aligned with our customers' needs. Our WorléePure+ powders and granules form an essential building block within the modular WorléeFusion system.

We see ourselves not only as a supplier, but as a partner at eye level. With technological expertise, deep raw material knowledge, and global trend insights, we support you in bringing your product idea to life.

Your benefits:

- Co-development: We develop your blend together, from the initial idea to market readiness.
- Modular and adaptable: Each level represents a distinct market approach.
- Natural and high quality: Focus on organic, clean label, and functional ingredients.
- Future-oriented: Combining trends, technology, and health.

Together, we create solutions that inspire, from raw material selection to market-ready blends.

Let's create your fusion.

OUR THREE SEGMENTS

Segments	Description
Smoothie Bowls	Rich in fruit powders, superfoods, and clean label ingredients. Ideal for a mindful start to the day or as a healthy snack in between. Perfect for health brands that combine naturalness and great taste.
Savoury Bowls	Warm or cold bowl concepts based on grains and vegetables. High in fibre, rich in protein, and versatile in use. Designed for brands focusing on functional and trend-conscious nutrition.
Instant Smoothies	Powdered drinks for quick preparation – perfect for detox, sports, or functional beverages. Natural, convenient, and full of flavour. Ideal for D2C or retail brands with a focus on convenience and clean label concepts.
