

BETUBED PACKAGING GMBH

EUROPE'S EXPERTS FOR PAPER TUBES.

EUROPE'S LARGEST SHOP FOR PAPER TUBES

Our paper tubes set new standards for sustainable, plastic-free packaging. Replace metal, plastic, or glass packaging with eco-friendly solutions in the packaging segment today.

In our 'be ready' shop, you'll find bottle packaging, cosmetic or food packaging, as well as gift packaging that you can order directly. We always have more than 200,000 paper tubes in stock.

From a quantity of 3,000 paper tubes, we can create your individual paper tube. Whether it's a 3-piece tube, slip lid tube, or composite can, you decide according to your taste or content. Visit our 'be customized' section for further details like our Tube Guide.

BE SPECIAL

Special, elegant, outstanding. That's what the packaging for Schlesinger's premium shoe trees should be. Instead of a simple, brown box and a shadowy existence under the shelf of a shoe retailer, the paper tube and its contents now stand in the spotlight as the number one gift idea for men and have won the German Design Award.

- Eye-catcher at the point of sale.
- Premium packaging makes premium products.
- Advantage in brick-and-mortar retail over competitors.
- Beautiful, recyclable packaging.

BE ECO

Environmentally friendly ... but of course. Show your customers your environmental awareness through sustainable packaging. All our paper tubes are made from FSC® certified papers, sourced from environmentally sustainable and socially responsible forestry. Additionally, they are 100% recyclable and, of course, reusable ... for the sake of the environment.

BE UNIQUE

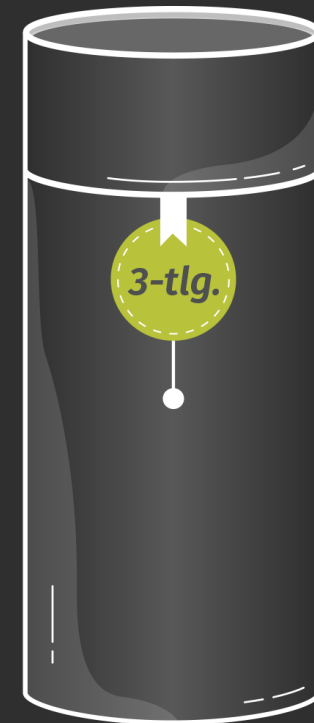

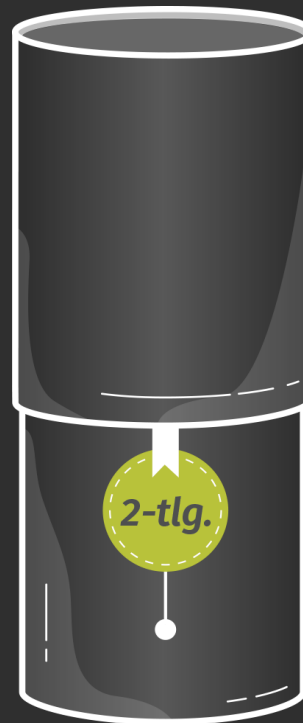

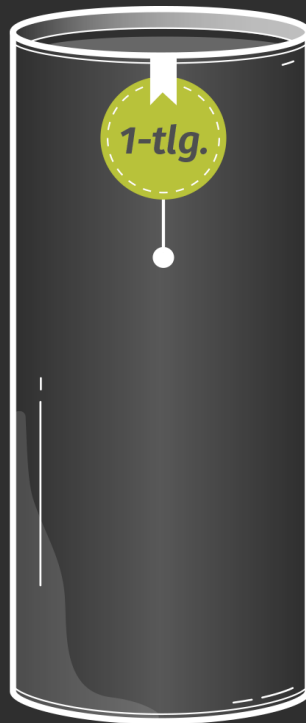

We don't want to limit your ideas, because that's how you stand out from your competitors. We strive to make everything possible and draw on a wide portfolio of service providers and suppliers for you. From carrying handles to special protective inlays to leather covers. We make ideas a reality.

THE TYPOLOGY OF BETUBED'S PAPER TUBES.

The paper tube shines as one of the most versatile packaging solutions. There's more to it than meets the eye.

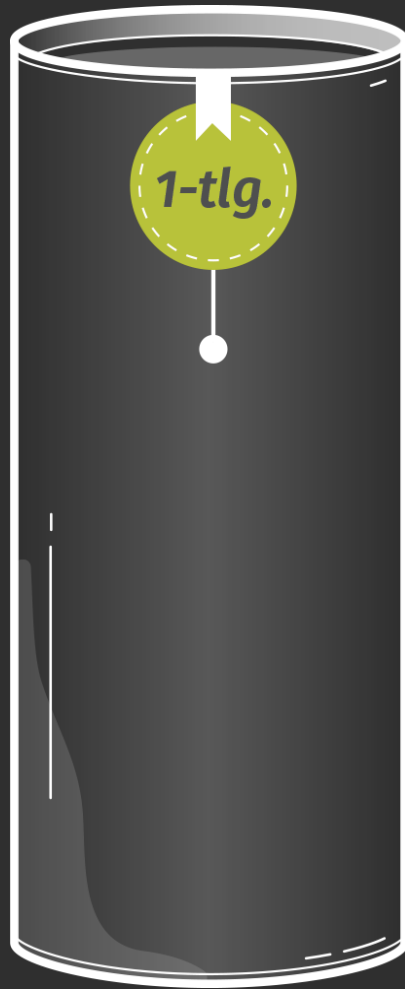

The 3 different types of cardboard tubes:

Available in:

- Diameters from 14mm to 400mm
- Height customizable starting from a minimum of 30mm

THE 1-PIECE PAPER TUBE

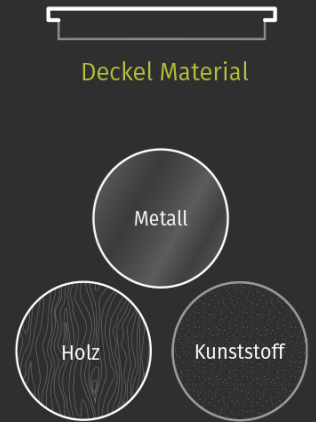

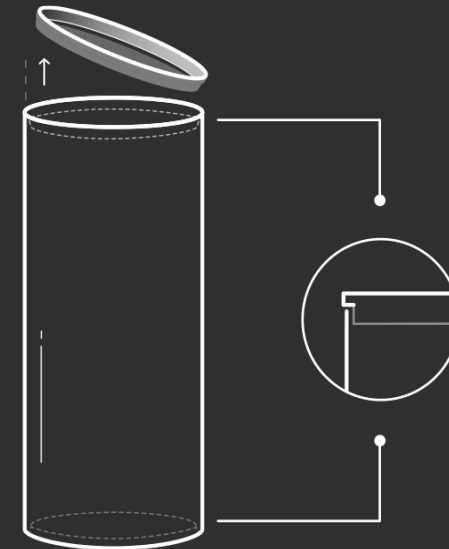

The simplest and most cost-effective type of round paper tube, the "economy class."

Our one-piece, machine-wound sleeves can be equipped with a cardboard bottom or a metal bottom.

These can be closed by hand with metal or plastic lids, or machine-closed with food membranes, metal lids, and the like, depending on your choice. They are commonly used for spices, dietary supplements, coffee, chips, or as a simple poster tube.

'Kombidose'

THE 1-PIECE PAPER TUBE

- Peel-off lid
- Plastic slip lid
- Tinplate bottom
- Aroma valve for coffee, for example
- ALU/PE interior lining
- Suitable for machine filling

- Plastic push-in lid
- Cardboard bottom with rolled edge
- Suitable for manual filling

- Peel-off lid
- Plastic push-in lid
- Tinplate bottom
- Aluminum/PE lamination inside
- Suitable for machine filling

THE 1- OR 2-PIECE PAPERTUBE

Aluminium peel-off membran

The membrane tube is visually appealing yet highly functional packaging. Equipped with aroma protection and 100% airtightness*, the membrane tube is the ideal packaging for various products such as dietary supplements or powdered foods.

Available diameters (in mm):

52,3	99
60	110
65,5	126,5
73	153
83	

tin peel-off lid

The resealability of the membrane paper tin is ensured by the included plastic, paper, or metal lid.

resealable paper lid

* Prerequisite: Alu/PE lamination, aluminum membrane for sealing

Our eco-friendly paper sprinkle tubes with sieve and sprinkler are a practical packaging solution for the table and kitchen.

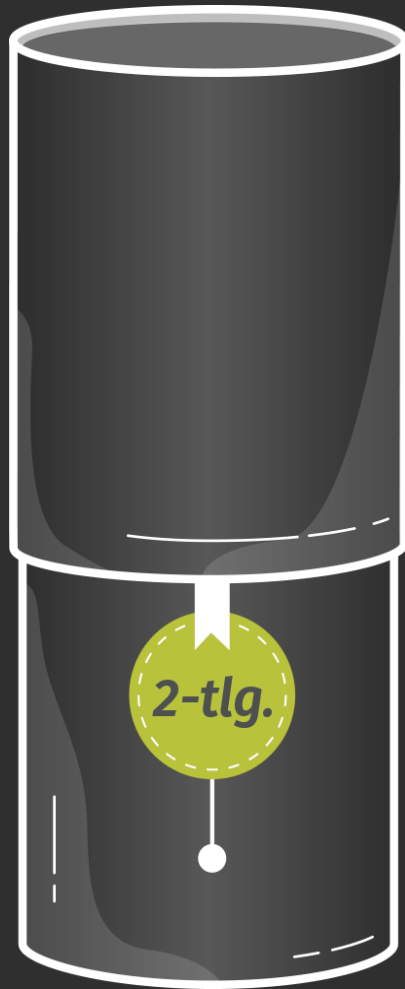

They provide protection for pourable goods and enable their controlled dosing, e.g., for powders, seeds, herbs and spices, gardening products, chemicals & cleaning agents, and much more.

Depending on the application, they can be filled from the top or bottom.

- Tamper-evident plastic sieve lid
- Three openings for optimal dosing
- Easy separation of the lid from the cardboard box enables optimal recycling

THE 2-PIECE PAPER TUBE

The paper tube, often referred to as a "slip lid tube", has the outer sleeve (lid) slipped over the inner sleeve. The lid thus rests on top and protrudes.

Many customers opt for this round packaging because the possibility of individual printing provides ample "selling space" for the box.

The lid and the base can be individually printed. This allows for effective presentation of the company on the lid, while the base can serve, for example, as the ingredients list.

'Stülpedeckeldose'

THE 2-PIECE PAPER TUBE

- Deep-drawn construction
- High slip lid
- Curled edge on slip lid and inner sleeve

- Deep-drawn construction
- Tall slip lid
- Flat edges on slip lid and inner sleeve

- Curled edge
- Short slip lid

- Deep-drawn construction
- Tall slip lid
- Curled edge on slip lid and inner sleeve

THE 3-PIECE PAPER TUBE

Also known as our "be ready" can:

The most elaborate, handcrafted can consists of two sleeves: a spiral-wound inner sleeve and an outer sleeve separated into lid and body.

What makes it special is that in its assembled state, it has a sleek flush-fitting lid.

Available immediately from stock without printing, but also available to order fully printed for a great effect.

- Brown kraft paper for a natural look
- Printed in CMYK offset printing process
- Brown kraft paper tested for food contact

- High-quality coated paper
- Printed in CMYK offset printing process
- White pulp paper tested for food contact

THE 3-PIECE PAPER TUBE: WINDOW TUBE

We also stamp windows in paper tubes. This way, you always have your product in view. The shape and positioning are entirely up to you. Of course, this can also be applied to 1- and 2-piece paper tube.

To ensure the quality and food safety of our paper tubes, we collaborate with TÜV SÜD to test, depending on relevance, compliance with the following German and European laws and directives, in particular:

- EC 1935/2004
- BfR Recommendation XXXVI
- EC 1907/2006 – Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)
- Section 30 and 31 of the German Food and Feed Code (LFGB)
- EU 10/2011
- EU 2019/1021
- EC 94/62
- French decree with special limits for migration of MOSH & MOAH
- EU-CM/Res (2020)

WE LOOK FORWARD TO HEARING FROM YOU.

Do you have any questions? Feel free to contact us via email or phone, we're here to help.

Our stocked paper tubes without printing are available for immediate delivery.

Customized round cardboard tubes tailored to your needs have a delivery time between 8 and 12 weeks.

Look forward to high-quality material, visually appealing boxes, handmade cardboard boxes, and environmentally friendly packaging that will convince everyone.
