

Norilit CS

for the decoration of
lacquered metal drums

**Innovative Inks &
Functional Lacquers**

Norilit® CS is a solvent-based ink system, which is mainly used for printing on lacquered and powder-coated sheet metal, UV-lacquered substrates and lacquered wood.

The screen printing ink is characterized by good screen open time, fast drying and good blocking resistance. Norilit® CS is mainly used for the decoration of lacquered metal drums.

Properties:

- satin gloss
- high grade pigments, free of heavy metals, with excellent light fastness
- chemical & mechanical resistance
