

Reliable basis for your project

FIRST BASE ground screw foundations are manufactured to the highest production standards, fully galvanised and protected against corrosion. With its high load bearing capacity, this series is ideally suited for playground equipment and decking but also for verandas, carports, canopies, log cabins and much more.

A fast and solid foundation without concrete

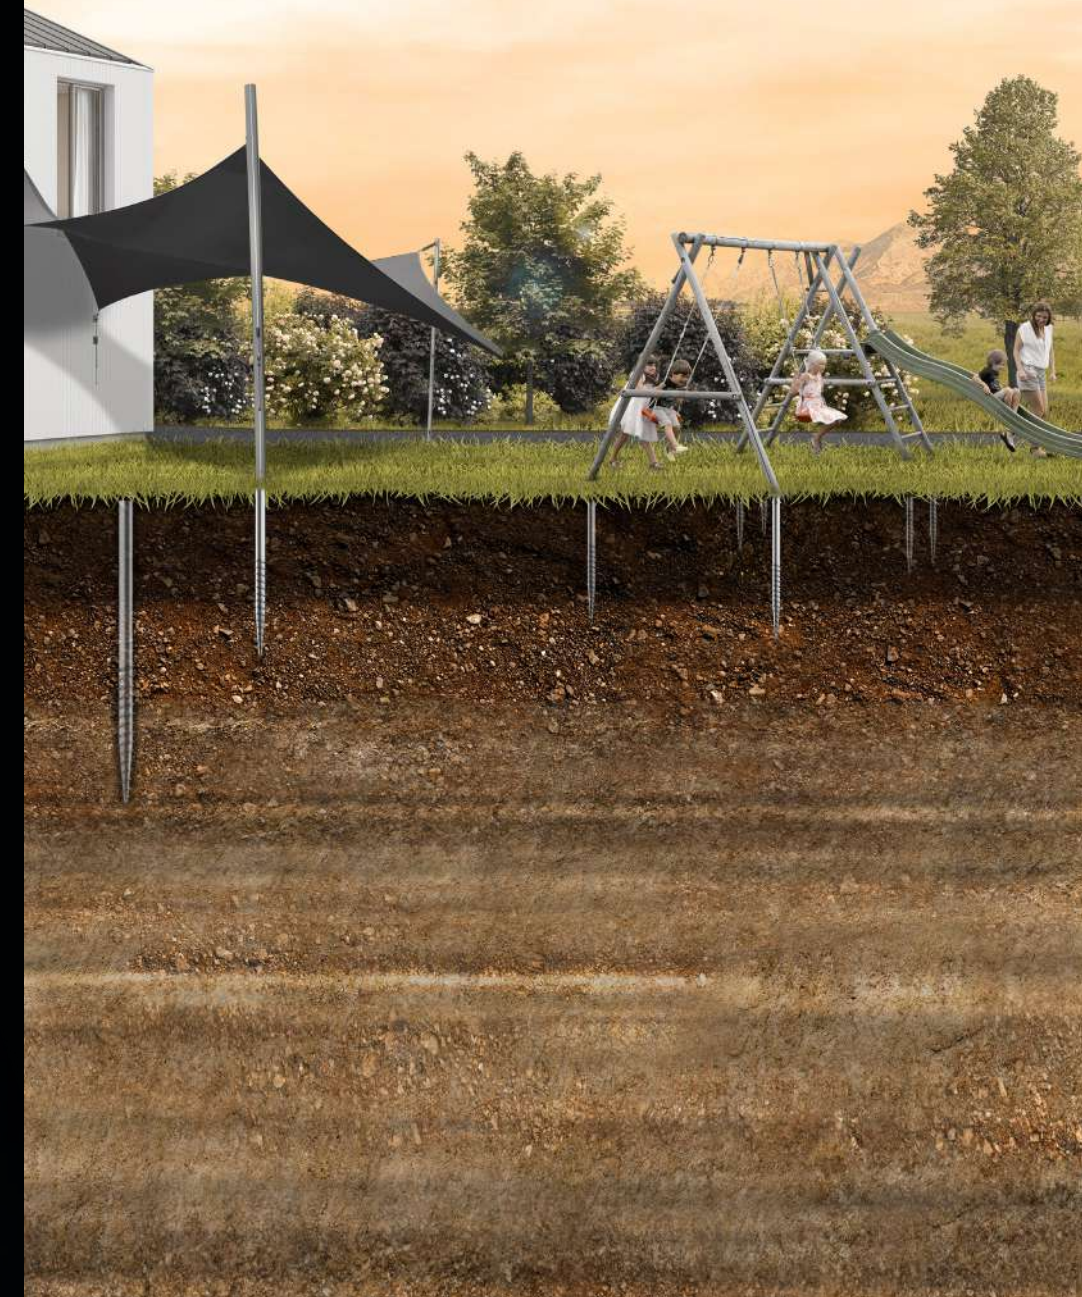

- › No digging
- › High load bearing capacity
- › Easy to install
- › No concrete, no drying time
- › Suitable for every soil type
- › Reusable & recyclable
