NEOX Networks

Unified Network Visibility for IT, OT and Security Operations

NEOX Networks delivers unified, packet-level visibility for enterprise networks, cloud environments and critical operational technology infrastructures. Our solutions help organizations monitor, optimize, secure and troubleshoot complex network environments with high-fidelity visibility, scalable architecture and operational efficiency.

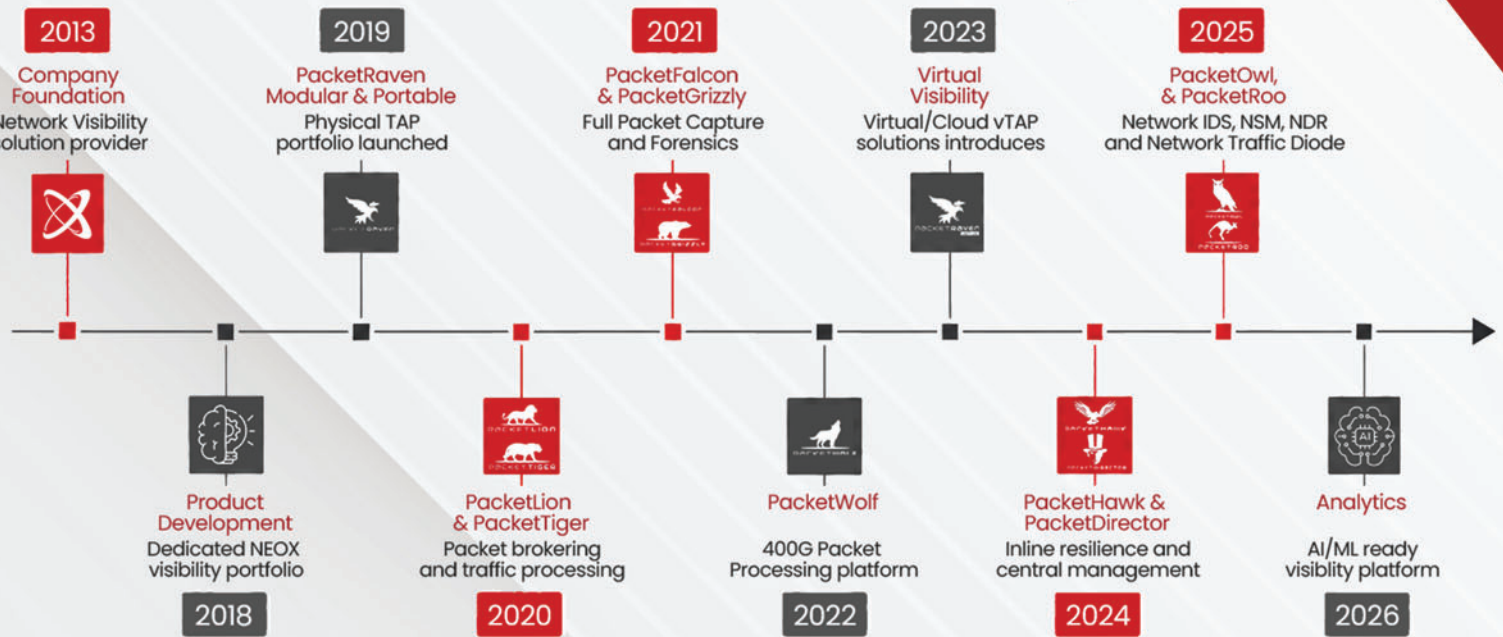

From data centers and hybrid cloud environments to manufacturing plants, utilities, transportation systems and telecom networks, NEOX enables actionable intelligence across packets, flows, applications and connected assets.

Our Mission

We, at NEOX, believe visibility is the foundation of cybersecurity, operational resilience and digital transformation. Our mission is to empower organizations with intelligent, scalable and unified visibility solutions that help them secure, optimize and modernize critical infrastructure environments.

- **Founded** | 2013 in Germany
- **Ownership** | Founder-led, privately owned, and independently financed
- **Focus** | Unified Network Visibility Stack and Security Monitoring
- **Headquarters** | Langen, Germany
- **Regional Offices** | Santa Clara, USA; Istanbul, Türkiye; Seoul, South Korea
- **Team** | 50+ network visibility and security professionals worldwide
- **Revenue Growth** | 25–40% year-over-year revenue growth in recent years

What We Deliver

Unified Visibility Architecture

NEOX provides a unified visibility fabric that collects, aggregates, filters, optimizes and delivers packet-level data to monitoring, security, analytics and observability tools.

Packet-Level Observability & Network Intelligence

NEOX solutions provide high-fidelity packet-level visibility for:

- Network performance monitoring
- Application performance monitoring
- Cloud & hybrid monitoring
- Threat detection & response
- Compliance & forensics
- Security operations

Intelligent Traffic Optimization

NEOX reduces tool overload and operational complexity by:

- Eliminating unnecessary traffic
- Optimizing data feeds
- Improving tool efficiency
- Reducing infrastructure costs

Unified IT & OT Visibility

NEOX bridges visibility gaps across complex IT and OT environments, including:

- Enterprise IT networks
- Industrial OT environments
- Data centers
- Remote sites
- Cloud infrastructure

Key Solutions

Network & Security Analytics

Transforms network data into actionable intelligence for performance monitoring, threat detection and operational decision-making.

Packet Capture & Forensics

Enables high-performance packet capture, retention and forensic analysis for troubleshooting, investigations, compliance and incident response.

Network Detection & Security Monitoring

Provides deep network visibility to support threat detection, security monitoring and response across IT, OT and critical infrastructure environments.

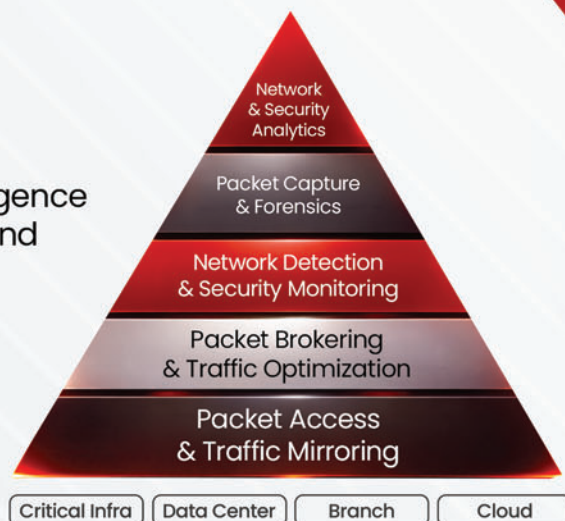

Packet Brokering & Traffic Optimization

Aggregates, filters, deduplicates and optimizes traffic to improve tool efficiency and reduce monitoring complexity.

Packet Access & Traffic Mirroring

Creates the foundation for reliable network visibility by making relevant network traffic available for monitoring, security and troubleshooting.

Industry Focus

NEOX supports visibility, security and resilience across:

Financial Services

Telecom

Manufacturing

Healthcare & Pharma

Utilities & Energy

Government

Transportation

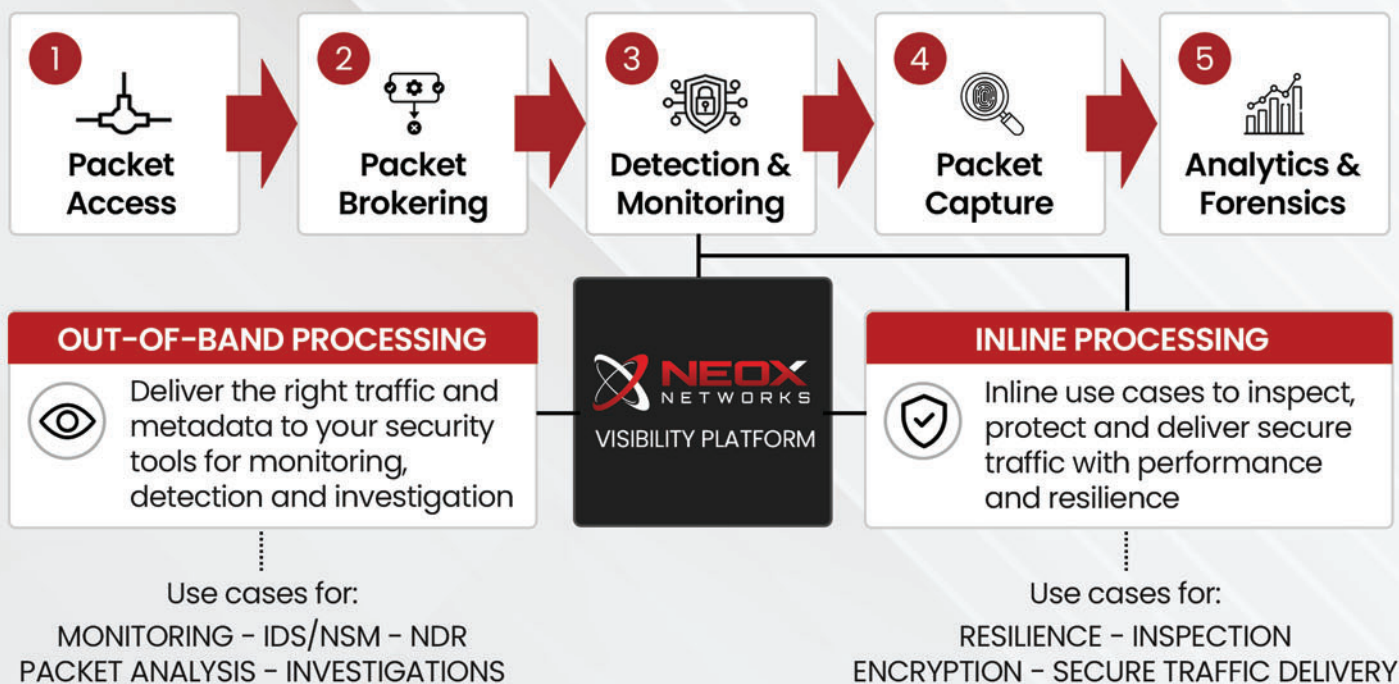

Cloud & Data Center

Unified Visibility Platform

End-to-End packet visibility from access to analytics

NEOX provides the packet-level visibility foundation for modern security operations across enterprise, cloud and critical infrastructure environments. By combining packet access, packet brokering, inline and out-of-band processing, packet capture and traffic delivery, NEOX enables open security delivery across a broad ecosystem of partner and customer solutions.

The NEOX Visibility Platform

Partner and customer ecosystem

OPEN ECOSYSTEM APPROACH

NEOX is not a closed platform. It integrates openly into the customer's existing security and observability ecosystem and enables partner and third-party solutions with the right traffic and metadata.

This preserves prior investments, avoids vendor lock-in and strengthens threat detection, monitoring, investigation and response outcomes.

Where NEOX operates

Data Center

Multi-Cloud

Industry Site

Critical Infrastructure

Why NEOX

Built for Modern Enterprise and Critical Infrastructure Networks

NEOX combines high-performance packet visibility, open integration and scalable architecture to help organizations secure, monitor and optimize complex IT, OT, cloud and critical infrastructure environments.

Performance & Flexibility

- Faster threat detection and troubleshooting

- Non-blocking architecture
 - Up to 400Gbps throughput
-
- Engineered to minimize blind spots and packet loss

Scalability & Manageability

- Operational resilience at scale

- Future-ready connectivity
 - Flexible performance tiers
-
- Centralized management across physical, virtual and hybrid environments

Simplicity & Economics

- Simplified visibility operations

- Transparent and predictable pricing
 - Flexible licensing for scalable deployments
-
- Pay-as-you-grow expansion with ROI-optimized scalability

- **Improve Security Posture**

Increase threat visibility and accelerate detection, investigation and response.

- **Optimize Monitoring Investments**

Deliver the right traffic to the right tools and improve efficiency across existing monitoring and security infrastructure.

- **Reduce Operational Complexity**

Simplify traffic access, brokering and delivery through a unified visibility architecture.

- **Accelerate Troubleshooting**

Quickly isolate performance bottlenecks, anomalies and network issues with packet-level intelligence.

- **Enable Compliance & Forensics**

Support audit, regulatory and investigative requirements with reliable packet capture and forensic analysis.

- **Scale for Future Growth**

Support cloud, edge, AI and industrial transformation initiatives with a scale out – visibility platform.

Global Presence

Global reach through local partners

NEOX delivers global reach through a growing ecosystem of channel, technology and solution partners across North America, EMEA, APAC and the Middle East.

Together with our partners, we enable localized procurement, deployment, integration and support for enterprise, government and critical infrastructure customers worldwide.

Our open platform approach allows customers to integrate NEOX into existing security and observability ecosystems while working with trusted local and regional partners.

EMEA

Austria
Belgium
Cyprus
France
Germany
Greece
Ireland
Italy
Romania
UK
Poland
Portugal
Switzerland
Türkiye

APAC

Australia
