

OUR MISSION:

TO SUPPORT COMPANIES ON
THEIR JOURNEY INTO THE
DIGITAL FUTURE

- Founded in 2007
- Headquarter in Wehrheim (Frankfurt/Main)
- Value-added Distributor
- Consulting, training, workshops
- System integration and development services
- Expert knowledge from research and development projects
- Awards for innovation and product quality
- Large partner network

EMPOWERING WIRELESS DIGITALISATION

m2m Germany

Your competent partner
for M2M and IoT solutions

www.m2mgermany.de

WHAT WE DO

m2m Germany enables companies across industries (ranging from electronics and automotive to food & beverage and retail), system integrators, energy suppliers, and organisations with critical infrastructures (KRITIS) to successfully implement their IoT and digitalisation projects.

This includes consulting, providing the suitable hardware, and the deployment of a high-performance IoT infrastructure based on the most suitable wireless technology for each use case.

As a long-standing expert, m2m Germany advises customers on the planning and selection of wireless communication technologies, ensures on-time delivery, and guarantees the long-term availability of all components. Where required, we also provide configuration, programming, and integration into third-party systems.

m2m Germany's solutions combine reliable hardware, secure communication technologies, and tailored services, providing customers with a solid foundation for their digital applications.

Through this combination of technical expertise and a strong service orientation, we enable efficient project realisation, maximum system availability, and a future-proof IoT infrastructure.

IOT NETWORK SOLUTIONS

- IoT consulting
- IoT procurement
- Radio planning
- Network planning and site selection
- Setting up the IoT infrastructure, incl. network server and commissioning
- Configuration, kitting and programming

IOT SERVICES

- Consulting
- Pre- und After-Sales support
- Requirements analysis
- RF module integration & Design services
- Cloud connectivity and integration
- Support with certification processes
- Support throughout the product lifecycle

DISTRIBUTION

- Industrial and vehicle routers
- Gateways (LoRaWAN/IoT/telematics)
- LPWAN sensors and actuators (e.g. LoRaWAN, NB-IoT)
- LoRaWAN network server
- Embedded modules (e.g. Bluetooth, 5G, LoRaWAN, 450 MHz)
- Evaluation boards
- Antennas & accessories

TRAINING & WORKSHOPS

Would you like to learn more about IoT, use cases, real-world applications, or technologies such as LoRaWAN, NB-IoT, LTE and 5G – and their practical benefits?

Join one of our IoT workshops or training courses, or book a customised workshop tailored to your individual needs and the specific challenges within your organisation.

We focus on your individual use cases to ensure maximum practical relevance and impact.
