Ressource management

Intuitive resource planning: Employees and inventory in the right place at the right time

- ✓ **Easy to use: with drag & drop and construction-specific functions**
- ✓ **Works for every planning situation – thanks to specialized deployment plans**
- ✓ **Brings focus to the team – and gives you a competitive edge**

NEW:
Vanillaplan AI

Your personnel planning
with just one click

Capacity planning

**Forward-looking capacity planning:
the strategic tool for your operating
capacity utilization**

- ✓ **Quick overview of your staffing requirements**
- ✓ **Identify bottlenecks early on: thanks to intuitive red-green diagrams for overloading and underloading**
- ✓ **Keep an eye on capacity utilization at all times – for long-term security**

Mobile App

Communication is key

- ✓ Stay informed at all times: Your employees have all assignment and project information in their pockets—clear, up-to-date, and immediately accessible.
- ✓ Push notifications for assignment changes, practical file attachments including scans, and route display.

Scoreboard

- ✓ Everyone knows what's going on: a shared, central source of information for the entire team
- ✓ Transparent planning for today and tomorrow – reduces queries and creates peace of mind in the business

Time and performance recording

Employees

- ✓ Confirm working hours with a single click – directly in the relevant project
- ✓ In addition to working hours, you can also enter travel, expenses, materials and project reports
- ✓ Plan vacations in the mobile app – and they will immediately be visible in the absence plan

Supervisor

- ✓ Central access to all employee entries
- ✓ Efficient approval: approve multiple entries at once
- ✓ Optimal overview – thanks to compact information summaries

Interfaces

Vanillaplan Fair interface platform: The best of everything

- ✓ No more double entry: thanks to automatic data transfer of master data, times, and services
- ✓ Can be optimally combined with any ERP or special tool – for seamless interaction between all systems
