in real beef or
chicken

THE GOODNESS WITHIN

Chewllagen is a dog treat made from the collagen extracted from South American grass-fed cattle hide. The collagen proteins are hydrolysed and broken down through a heating process into smaller and more easily digestible molecules. The collagen is then shaped and baked where it acquires its bread like texture before being dipped in real beef or chicken.

PREMIUM COLLAGEN TREAT FOR DOGS

Collagen is the most abundant protein in the body and has many important functions, including the growth and repair of bones, tendons, ligaments, skin and fur. As animals age, they produce less and lower-quality collagen.

THE HEALTHY CHOICE
MADE IN SOUTH AMERICA

Consisting of mainly type 1 and type 3 collagen, Chewllagen stimulates cartilage production, cushioning joints and reducing joint pain. Not only does it aid your dog's recovery after a long walk but also improves their muscular strength and power. In addition, Chewllagen also improves the gut health of your dog making it The Healthy Choice for your four-legged friend.
