Centrifugal Atomizers For Laboratory Applications

The AM Centrifugal Atomizers for Laboratory Applications are high speed rotating machines specifically designed for use in laboratory scale spray drying and spray cooling processes. The use of high quality materials, a customer-oriented design and years of engineering experience make our atomizers the best choice when it comes to find reliable and high performing centrifugal atomizers.

Main Features

- Capacity up to 20 kg/h
- Rotational speed up to 60000 rpm
- Highly customizable design
- Completely oil free design
- Available in a wide range of dimensions, shapes and materials (stainless steel, hastelloy, etc)
- Available with a wide range of atomizing wheel (straight holes, straight vanes, curved vanes, etc)
- Full monitoring and diagnostic system for operating parameters
- Sanitary, hygienic, GMP and ATEX execution available

AM Atomizers Technology designs, manufactures and sells its products under its own brand. Any reference to other manufacturer's names, brands, codes or other is only for indication.
