Integral access control solution for door maintainers in neighbourhood communities

jcm  **tech**
technology & imagination

Door Maintainers:

Avoid trips to doors that work properly

- **Control remotely and instantly:**

Check the status and operation of your door anytime, anywhere.

- **Know the life of the door:**

Have a complete and detailed vision of access use, which provides greater security and control at the facilities you manage.

- **Extend the life cycle of your installations:**

Avoid unnecessary wear to the door and motor, reducing long-term maintenance costs. Leave the door open during maximum traffic hours and manage activation schedules.

- **Manage operators:**

Register or de-register operator fobs in real time, from your office. Modifying staff or operator routes is no longer a concern.

Property Managers:

Increase security in your communities by controlling them in real time from your office

- **Forget key delivery:**

Remotely open access points to all maintenance staff or workers to enter without needing to give them physical keys.

- **Greater control and security:**

Improve security by avoiding key copying or loss, all while making it easier to manage schedules and maintenance tasks in the building.

- **Immediate response:**

Manage lost fob replacements, access to industrial buildings, and incidents, all in a fast, efficient way, increasing customer satisfaction.

- **Manage access permission:**

You can quickly and easily manage access permission through the platform, from the comfort of your office, in real time and with no need to travel.

Users:

Secure and comfortable access on your phone

○ **Secure access:**

Forget worrying about lost keys or unauthorised access. Cutting-edge technology to guarantee that only authorised people can enter, reducing the risk of undesired access or intruders.

○ **Open the door with your mobile:**

Does not require an internet connection at all times to use it.

○ **Hands-free opening:**

The door opens when you approach, and you do not need to remove your phone from your pocket.

○ **Always in touch:**

Contact your property manager or access manager to report incidents or purchase new services.

○ **Compatible with traditional systems:**

Open with your fob, proximity key, or mobile, from in front of the door or remotely, from thousands of kilometres away.

cloudAssistant

The definitive web app for installation management

- Control all the solution's devices and users in real time from any location.
- With the peace-of-mind of working with Microsoft Azure, you always have secure data available to you. Guaranteed services.

HDOOREVO

Motion and Honoa Receiver compatible with Wiegand devices
