

Recorded Future Intelligence Cloud

Reduce risk and securely drive business

The global landscape is changing, reshaping challenges for security teams. Events like the pandemic and war in Ukraine have fundamentally changed business models and risk considerations.

The scope of threats is growing across cyber, brand, supply chain, geo-politics and physical, and no organization is immune.

 **93%**

Security leaders think that geopolitical instability will lead to a far-reaching catastrophic cyber event in the next 2 years.

Source: WEF Global Security Outlook, 2023.

This is **reshaping challenges for security teams.**

Cybersecurity is not a niche issue in organizations any more. It is part of **foundational business resilience, elevating beyond securing teams and under the spotlight of leadership, board, investors and customers.**

Security teams are being asked to respond to questions around:

Cyber Risk

Which threat actors are targeting my industry/organization?

Operational Risk

Which of my vendors represent the highest security risk?

Reputational Risk

Are my brand and logo being exploited?

Financial Risk

Is my business exposed to digital fraud attacks?

Physical Risk

What is the risk of operating in Country X?

However, **with the current model it isn't easy for you.** You have all these questions to answer, asks to fulfill and initiatives to support while dealing with your day to day operations. The current model doesn't enable you to get these answers, it creates more data and questions because of

Lack of visibility and prioritization

Lack of actionability

Lack of automation

Lack of continuous validation

Lack of business alignment

You need an advantage to get ahead of risks and threats

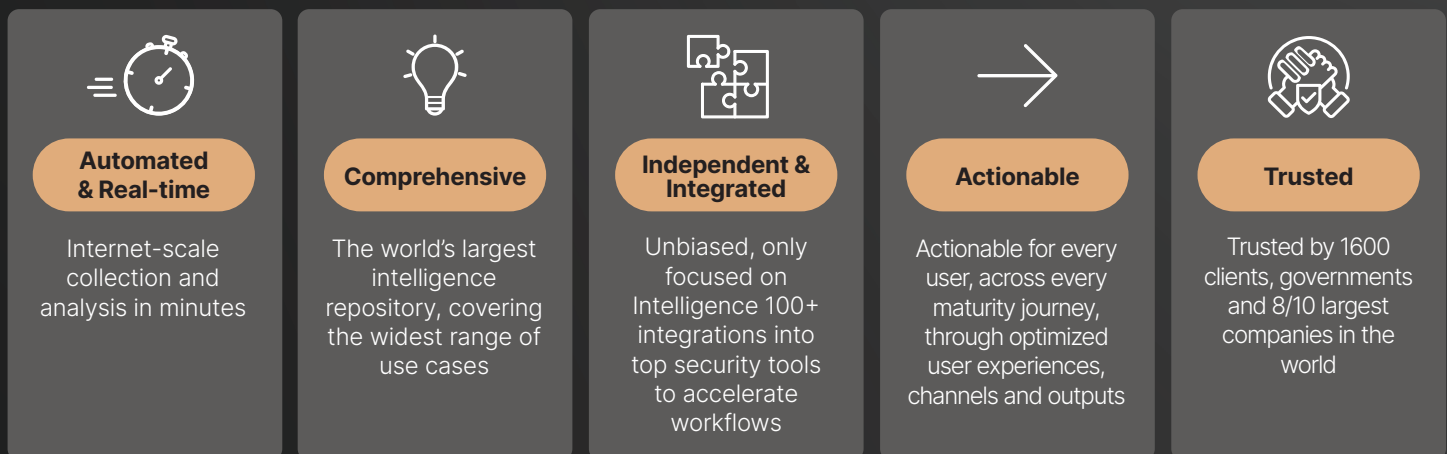

Recorded Future Is the Most Comprehensive and Independent Threat Intelligence Cloud Platform

The Recorded Future Intelligence Cloud enables organizations to have real-time visibility into their expanding attack surface and act on cyber and physical threats, to reduce risk and securely drive business growth.

With Recorded Future Intelligence Cloud you can make the right decisions across your entire maturity journey.

Our Differentiators
