ABOUT US

Established in 2004 in Konya, Turkey, BARAK ARMS has become one of the country's leading firearms manufacturers. With its experience and knowledge gained in all areas of the arms industry since the 1970s, the company was among the first shotgun manufacturers in Turkey. BARAK ARMS is committed to producing weapons that fully comply with TSE, ATF, SAAMI, and CIP standards.

BARAK ARMS gained international recognition after producing Turkey's first 12-gauge mag-fed shotgun, commonly known as the BR99. This success led the company to develop 20-caliber and .410 caliber versions of the same model, making important contributions to the defense and weapons industry in Turkey.

BARAK ARMS is dedicated to exceeding expectations in the global market and is committed to presenting innovative firsts to the sector by investing heavily in R&D activities. The company carries out all production processes, including barrel and receiver production and assembly, in its own 2000 square meter factory. BARAK ARMS uses 7075 aluminum for the receiver, lower, and upper, and 4140 steel for barrel production. Additionally, BARAK ARMS has a FACILITY SECURITY CLEARANCE CERTIFICATE issued by the Turkish Ministry of Defense.

BARAK ARMS has shipped nearly 100 thousand shotguns to its domestic distributors to date and is gradually strengthening its presence in foreign markets.

In addition, BARAK aims to gain an important place in the world market with its MTX9 and ETX9 9mm pistol models, which have the only interchangeable grip feature in the world and are easily available as almost all parts are compatible with the most commonly used spare parts.

BARAK ARMS has successfully passed various rigorous tests in America, Canada, England, and many European countries, proving its commitment to quality.

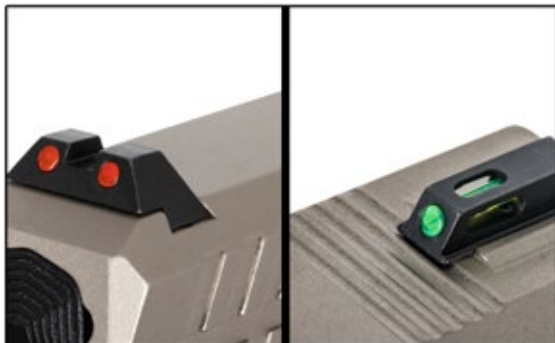

Standardized trigger weight

Trigger weight is a factor that directly affects the performance and user experience of the pistol.. That's why all our models are based on globally accepted, standardized trigger weight measurements.

Special slide design

The specially designed back shape of the slide provides the user with a hand grip, giving ease of grip

Improved, detachable front sight

It allows you to focus on the target perfectly thanks to fiber optics. It meets all needs with its standardized and robust structure.

Adjustable grip

Adjustable grip according to palm size and changeable design according to customer preference

COMPATIBLE

90% of the gun's parts such as trigger, trigger plate, triangular piece, barrel, upper slide and needle, grip, magazine are compatible with the most commonly used spare parts in the world. In this way, they can be easily obtained and replaced anywhere in the world.

1. REAR SIGHT
2. 4.4" BARREL
3. FRONT SIGHT
4. LIGHT/LASER RAIL
5. TRIGGER SAFETY
6. REVERSIBLE MAGAZINE CATCH
7. INTERCHANGABLE GRIP

**PERFECT EXPERIENCE WITH
INTERCHANGEABLE GRIP,
CHOOSE YOUR STYLE,
FOCUS ON THE TARGET,**

INTERCHANGEABLE GRIP

What makes our product unique in the world is that it has a replaceable handle. . While in other pistols, only the front and rear parts of the grip are changed, in the BARAK brand pistol, the grip can be changed according to preference. This use is important for hand comfort. In addition, in large quantities, the appearance (pattern) of the handle can be changed in accordance with customer demand.

BARAK MTX9 9*19 mm pistol has the only interchangeable grip feature in the world. All its parts are compatible with the most commonly used spare parts in the world and can be easily obtained. When fired, some of the pressure exerted by the slide backwards is absorbed, which reduces the recoil effect.

BARAK MTX9 has a polymer body with an extremely solid structure, is light and flexible, and can be easily carried. It is resistant to moisture.
