

# **PREMIER CIMA PRO**

*Lightness Perfected. Technology Redefined. Bergara's Finest*

The PREMIER CIMA PRO represents the pinnacle of Bergara's pursuit of precision, innovation, and craftsmanship. It is not simply a rifle, but the embodiment of decades of expertise in barrel-making and firearm design, elevated through the use of cutting-edge technologies and premium materials. Designed for hunters and shooters who demand the very best, the CIMA PRO delivers a seamless balance between lightweight construction, rugged dependability, and refined performance.

Every component has been carefully selected and engineered with purpose—from the advanced carbon fiber stock to the stainless-steel Premier action—ensuring that the rifle performs flawlessly in the most challenging environments. Its modern aesthetics, enhanced ergonomics, and meticulous detailing reflect Bergara's commitment to creating firearms that inspire confidence and pride of ownership.

A rifle built not just to perform, but to inspire.

## **AUTOCLAVE CARBON FIBER STOCK**

At the core of the CIMA PRO lies its autoclave-cured carbon fiber stock, a technology that achieves the highest possible ratio between fiber and resin to deliver unmatched performance in terms of strength-to-weight. The result is an exceptionally lightweight yet incredibly rigid platform, offering superior recoil absorption, consistent accuracy, and extreme resistance to impact, temperature changes, and harsh environmental conditions.

Beyond its technical advantages, this stock embodies an aspirational quality: manufactured through a process traditionally reserved for the aerospace industry and high-performance competitions, it represents elite engineering and provides the shooter with absolute confidence in every shot, under any condition.

## **PREMIER GEN II ACTION**

The CIMA PRO is powered by Bergara's Premier Gen II action, a precision-engineered evolution built from 416 stainless steel. Designed for strength, efficiency, and long-term durability, it features lightening cuts, a wider ejection port, and a smoother, lighter operation that ensures a fluid action cycle even under the most demanding conditions.

The GEN II action includes an oversized bolt handle, spiral-fluted bolt body, dual ejectors, and a sliding plate extractor. It is fully compatible with Rem 700-style scope bases (8-40 screw pattern) and triggers. This blend of advanced engineering and versatile design makes the Premier Gen II action a robust, lightweight, and adaptable foundation for precision shooting.

## **PRECISION TRIGGERTECH**

Equipped with a TriggerTech trigger, the PREMIER CIMA PRO offers a crisp, clean break and unmatched adjustability. This premium trigger system enhances control and precision, ensuring the rifle responds precisely to the shooter's intent.

## **ADVANCE RECOIL MANAGEMENT**

The new bidirectional muzzle brake significantly reduces recoil, improving comfort and stability. This innovation enables faster target reacquisition and greater confidence in follow-up shots, making the rifle as practical as it is powerful.

## **STAINLESS STEEL ELEGANCE**

Every steel component of the PREMIER CIMA PRO — barrel, action, bolt, muzzle brake, bottom metal, trigger guard, and sling swivels — features a stainless Cerakote finish. This not only provides superior protection against the elements but also gives the rifle a modern, striking appearance that reflects its premium character.

## **REFINED FUNCTIONALITY**

A redesigned trigger guard with integrated magazine release improves ergonomics and efficiency, allowing fast and intuitive operation in the field. Combined with Bergara's renowned carbon barrel technology, the CIMA PRO delivers repeatable precision and unwavering reliability.

NEW IN 2026

# PREMIER CIMA PRO

*Lightness Perfected. Technology Redefined. Bergara's Finest*

## ***A rifle built not just to perform, but to inspire***

The PREMIER CIMA PRO is much more than a lightweight hunting rifle: it is the embodiment of Bergara's highest standards of performance, innovation, and craftsmanship. Built entirely with carbon technology through an advanced autoclave curing process that extends from the stock to the barrel, it achieves an exceptional balance between strength and weight, ensuring rigidity, consistency, and lasting reliability.

Combined with the Premier Gen II stainless steel action and premium components such as the TriggerTech trigger and the newly designed bidirectional muzzle brake, the CIMA PRO delivers precision and control with every shot.

Although it is not the lightest rifle on the market, its carefully engineered weight reduction guarantees the precision and reliability that define Bergara, giving hunters the confidence of repeatable performance in the most demanding conditions.

This is not just another rifle: it is a benchmark piece for those seeking the best of Bergara—the most advanced technology, the finest materials, and uncompromising attention to detail. A true premium investment for hunters and shooters who demand excellence without compromise.

### **TECHNICAL SPECS**

- Sub-MOA Guarantee
- Autoclave-cured carbon fiber stock
- Bergara CURE carbon fiber barrel
- Premier Gen II action
- Stainless steel action and barrel
- TriggerTech trigger
- Bidirectional muzzle brake
- Cerakote finish over stainless steel
- Trigger guard with release button
- Adjustable L.O.P.
- Fluted Bolt
- Integrated sling swivel mounts
