

SCIENCE-BASED NEXT GENERATION NUTRITION

3-Way Intestinal Support Prebiotic+Postbiotic+Nucleotide

Prebiotic Complex (MOS, Inulin, Psyllium)

- Nourishes beneficial bacteria
- Supports digestion
- Helps reduce hairball formation

Postbiotic Support

(*Bacillus subtilis*
fermentation product)

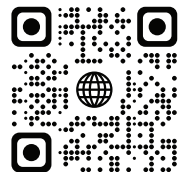

- Supports intestinal barrier
- Contributes to optimal stool quality
- Supports healthy immune function

Nucleotide Support

(Yeast Nucleotide Protein)

- Supports cell regeneration
- Contributes to immune response

Fi Petfood develops complete and balanced pet foods specifically formulated according to the age, breed, activity level, and health status of cats and dogs.

Our products are carefully crafted using highly digestible, high-quality protein sources, low glycemic index non GMO ancestral grains and premium raw materials sourced in accordance with global standards.

These scientifically developed formulas play a supportive role in digestive health, immune function and overall well-being.

With both ancestral grain and grain-free options, we ensure compatibility with sensitive metabolisms while offering targeted nutritional solutions through our diet product range.

We continue to expand our portfolio with scientifically proven formulations.
