Cyber Security services

Cyber Security that protects your business.

We combine strategic consulting, modern technologies, and operational excellence to deliver measurable cyber resilience. In doing so, we integrate holistic security approaches with flexible services—tailored precisely to your organization.

Security Operations Center (SOC):

A SOC serves as the central point of contact for cybersecurity in companies and organizations and is responsible for ensuring their IT security. The primary goal of a SOC is to protect the IT infrastructure from cyberattacks, and it offers the following benefits:

- 24/7 monitoring of the IT infrastructure
- Monitoring and threat analysis using a SIEM (Security Information and Event Management) system for centralized collection and management of alerts
- Analysis and verification of false positives and threats
- Defense mechanisms through countermeasures against threats
- Our cybersecurity experts monitor security incidents and ensure a rapid and efficient response and resolution of threats

DATAGROUP's Cyber Security Services at a glance:

- **SIEM:** Security Information & Event Management as a centralized alerting system
- **EASM:** Continuous monitoring of the external attack surface
- **EDR, MDR und XDR-Service:** Endpoint Detection and Response can be provided as a managed service and expanded through XDR to provide comprehensive protection for endpoints, servers, networks, applications, and cloud services
- **Incident Response:** fast and professional support for IT security incidents
- **Penetration Testing und Offensive Security:** Through penetration testing and offensive security, we proactively identify vulnerabilities before attackers can exploit them
- **Darknet Monitoring:** Identifying hidden threats from the darknet at an early stage.

Why DATAGROUP?

DATAGROUP is one of Germany's leading IT service providers, with approximately 4,000 employees who plan, implement, and operate IT infrastructures and business applications nationwide. Its focus areas include AI, cyber security, and cloud services; with CORBOX, DATAGROUP offers full-service support for IT workstations to small and medium-sized businesses, large enterprises, and public sector clients.
