We make the IoT simple!

Multi-networks SIM cards

Our SIM attaches to the strongest network

High performance, worldwide

Using regional infrastructures

Blazing fast SIM management

Leading web interface
and APIs

No strings attached

Use eSIM or bring
your own connectivity deal

Ubiquitous IoT Connectivity

2G - 3G - 4G - 5G & LTE-M

PUBLIC MOBILE NETWORKS

Connect from 200+ territories using local
infrastructure for optimal performance

Private LTE & 5G

PRIVATE MOBILE NETWORK

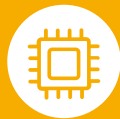

Commercial deployments of the private
network extension solution since 2018

Non-terrestrial networks

SATELLITE-TO-CELLULAR

First mobile operator to partner with
4 non-terrestrial connectivity providers

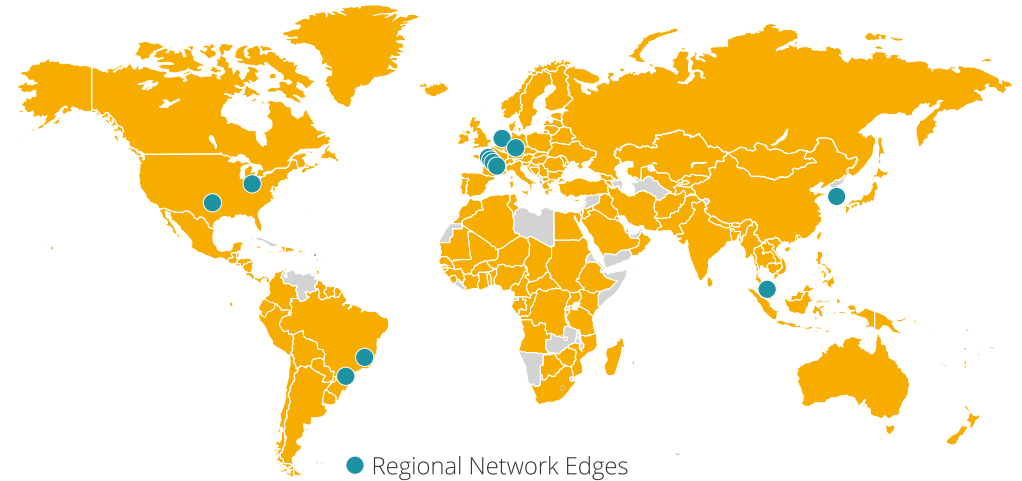

eSIM

Available in any form factor: plug-in,
embedded, eSIM profiles, iSIM

Integrate once, deploy globally!

With multi-network connectivity across
200+ countries and territories

All you need is...

1 contract

1 SIM type

1 support

1 powerful SIM fleet
management portal

1 invoice

1 IT or telecom
integration
