Exclusive Opportunity: Interview KF CEO at Embedded World 2025

Nürnberg, Germany – March 11-13, 2025 – KF, a leading European supplier of customized industrial monitors, is set to make a powerful impact at Embedded World 2025. Visit Booth 1-655 to explore how KF's unique blend of Asian technology and European precision manufacturing is shaping the future of embedded solutions.

KF's clean room production, smart robotics, and rigorous testing ensure the highest quality standards, delivering industrial displays that excel in performance, reliability, and customization. Through its ongoing partnership with ASUS IoT, KF is further enhancing its ability to provide high-performance embedded solutions tailored to the industry's evolving needs.

At the booth, attendees will discover:

- Next-generation industrial monitors built for seamless integration.
- Zero-defect manufacturing powered by clean rooms and smart robotics.
- European-quality customization tailored to the most demanding embedded applications.

KF remains the trusted European partner for high-performance, customized embedded solutions.

Press & Influencer Invitation: You'll have an exclusive opportunity to interview Massimo Romani, CEO of KF, and gain insights into the latest industry trends. Schedule your one-on-one session today by contacting us.

Join us at Booth 1-655 to experience the future of industrial displays. For more information or to schedule an interview, please contact:
