## PP corrugated sheets tailored to your unique applications

Distriplast is your **one-stop-shop to design and convert** corrugated plastic packaging sheets into robust solutions for all industries—especially where traditional cardboard falls short. **From initial concept to final assembly**, we streamline every step to ensure you receive a rigid plastic packaging perfectly suited to your operational needs.

### Flexible options

Select your preferred size (1.5 mm to 10 mm thickness), weight (200 gr to 2000 gr), length (up to 8m), density, properties and color and even format (boards or rolls).

### Specific treatments

UV protection, flame retardancy, anti-corrosion (VCI), ESD, antistatic, corona treatment and more to suit niche market needs.

### Long-standing expertise

Three decades of technical know-how enable us to customize solutions for unique applications.

### Reliability & quality

ISO-certified processes ensure each batch meets strict standards. Specific product properties are certified or validated and available on request.

**Diversity meets reliability:** Distriplast's production lines run 24/7, 360 days a year, guaranteeing consistent quality and on-time delivery.

**Take advantage of this diversity to find the corrugated plastic boards that align perfectly with your project requirements**, whether you're in packaging, construction, or retail display.
