B&W PROTECTS WHAT IS VALUABLE.

B&W International has been supporting the defense services in their operations for more than a quarter of a century by developing customised solutions and the provision of reliable and sustainable solutions. Ensuring the right case is provided at the right time for the right type of deployment and mission.

Ready for deployment – fit for purpose.
We call it: plug & protect

B&W

Cases of Success

Certified. Customized. Colorful.

CERTIFIED International certificates, high standards, on-site test laboratory, 30 years of experience.

CUSTOMIZED Tailored to customer requirements. From individual components to pre-configured solutions and exclusively manufactured products.

COLORFUL The diversity of the portfolio, the possibilities, the people and their success stories.

SYSTEMATIC SUCCESS THE B&W ECOSYSTEM WITH THE 6S

STRATEGY

The careful analysis of your requirements, your customers, your goals, your market and much more.

SELECTION

The basis, in which your needs are addressed for an individually configured solution using existing elements.

SOLUTION

The ready-to-go solutions that have been developed over many years of experience and in direct cooperation with users from different industries and applications.

SUPREME

The one-off that is completely tailored to you, developed according to your technical requirements, design ideas or with the desired safety certificates.

SECURITY

Certified quality, in line with the highest security standards and international permits.

SERVICE

Additional services that range from logistics, maintenance, spare parts supply and data management to sales support.

DEFPOWER.CASE PP.326.B.4H2

A dual movement and storage solution; cost-efficient and timesaving option: during post-deployment “back to base” logistics your batteries require no additional packaging. An additional added value provided is the on-site storage solutions. Moreover, the batteries can be packed within 90 mins.

DEFPOWER.CASE PP.166.B.4H2

The transport solution for 152 radios and their lithium batteries. Three variants of UN-certification are available. Assured safe movement of fragile equipment with fully charged batteries upon arrival.

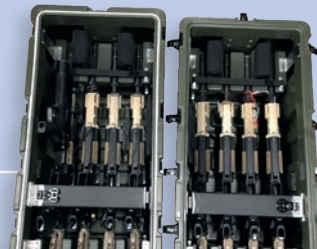

DEFPOWER.CASE EC.428.BT.500

This is the ideal case for sustainable mobile power supplies under extreme conditions. This temperature-resistant case reliably supplies power for communication-systems, computing systems, Operations Centers as well as Medical Treatment Facilities, etc.

DEFPOWER.CASE WEAPON.CHEST

With the Weapon Chest, you possess an extremely flexible and versatile logistics solution; a dual Weapon Chest and Transport & Storage Case in one. A solution which complies with all legal requirements, and the Weapons Chest is already being deployed by NATO partners.

DEFPOWER.CASE PP.326.B.P911

The first case which holds the ADR P911 packaging certification; essential for flexible and the safe transport of instable and defective batteries.

THE DEFENSE SUCCESS STORY THE SOLUTIONS FOR ALL OPERATIONS.

Defence forces world-wide must be battle ready, be able to deploy rapidly, and ensure the delivery of essential equipment; all of which depends on safe and secure transportation, safe storage of equipment, harmonised by certified and Transport & Storage Cases. Successful deployment must be independent of weather and climate conditions, terrain, and environment; from humid jungles, to frozen tundras all equipment must arrive safely, be readily stored, and ready to use.

With many years of proven experience, in the provision of defense-cases that comply with the highly stringent Safe Movement of Hazardous Goods and International Conditions for Transport Regulations as well as providing cases which comply with, UN, NATO or EU regulations (HAZMAT). B&W not only deliver optimal mobile defense solutions for a wide range of types of deployment, they also provide safe storage solutions during non-deployment activities and unit storage.

CO-AUTHOR OF YOUR SUCCESS STORY
